

Bariatric Walking Frame

The Bariatric Walking Frame is a stable and helpful option for those needing additional support when walking. This frame is heavy duty, sturdy and height adjustable with a wide base. Foldable, making it easy for transportation and storage, bringing the sides in with two easy push buttons helps those with limited dexterity.

- * Sturdy heavy duty frame
- * Height adjustable
- * Easy push buttons to fold, transport and store
- * Dual front and side brace for extra support
- * Contoured foam handgrips for greater comfort
- * Can be customized with walker skis
- * Weight capacity 270kg
