

### Airtec 7.5 Mattress

The AirTec 7.5 Mattress is an advanced pressure care mattress that is suitable for those who are at medium to high risk of developing pressure sores. The system is easy to set up and operate, with only the patient weight needed to set the appropriate inflation level and the intelligent control digital pump is whisper quiet. This pressure care mattress features a number of advanced settings including a static mode, max inflate mode, alternate mode, adjustable cycle times with 10, 15, 20 or 25 minute programs, seat inflate mode to provide extra support when the backrest is elevated, and adjustable support weight with 10 comfort levels. In alternating mode the individual air cells are inflated and deflated to periodically redistribute pressure throughout the body in order to mimic natural sleep movement patterns, this helps to reduce the risk of pressure related injuries

- \* A & B cells alternating mode with static pillow section
- \* Quiet digital pump, easy to use and adjust
- \* Advanced pump features; static/nursing mode, seat inflate mode with static and alternate option and adjustable cycle times
