

Lite Ryder

This is one of the lightest available power chairs. The frame is constructed of carbon fibre so it is super lightweight and robust, weighing less than many non-motorised manual wheelchairs. It folds easily to fit in the car boot and is suitable for flatter areas such as shopping centres, hotels, airports and so on. The easy to remove battery pack can be charged on or off the chair.

- * Super lightweight carbon fibre frame
- * Folds easily for transportation
- * Comfortable padded seat and backrest
- * Folding backrest
- * One button retracting armrests
- * Compact easy to use USB joystick
