

### Monarch Volta 4 Mobility Scooter

The Monarch Volta 4 Wheel mobility scooter is a larger mid-size scooter that combines comfort and performance, equipped with powerful electronics and a bigger motor. The larger pneumatic tyres, fully independent suspension on the front and mono-shock on the rear provide a softer ride, making this scooter ideal for those wanting a tougher mid-size everyday scooter that can tackle steeper terrain. A high ground clearance and powerful drive-train place the Volta at the top end of the mid-size scooter class.
