

UV RESIN Leaf Bangle Bracelet

SKILL LEVEL 2 | 30 Minutes

TOOLS:

- (10627461) UVR UV Lamp White
- (10627494) UVR Tool Tweezers
- (10627491) UVR Tool Mixing Kit

MATERIALS:

- (10627629) UVR Flat Mold Bangle Mold
- (10627463) UVR Resin 60g
- (10627090) UVR Preserved Limonium Cream
- (10626383) UVR Wildflower White

DIRECTIONS:

- 1** Make sure mold is clean, dry and free of dust. Pour UV Resin into the mold directly from the bottle into the Circle hoop mold, filling the cavity less than 1/3 of the way. Pre-cure under the lamp for one minute.
- 2** Add dried flowers and leaves, placing them precisely with tweezers. Take your time to move each element in place, making sure that no air bubbles get trapped underneath.
- 3** Fill the mold with Resin. Make sure not to over-fill this mold as it will result in an undesirable shape.
- 4** Cure the mold under the UV Lamp for several minutes until completely cured. Cool for 1-2 minutes. De-mold the shapes by popping them out of the mold. If still slightly tacky, cure again under the UV light, or leave in sunlight for several minutes.
