

Installation Instructions

1. Cut a round hole in the wooden ceiling. (Cutout template included)
2. Install the ring in the hole with a rubber hammer untill the ring flushed with the ceiling.
3. Fasten the screws into the rings holes to ensure a rigid grip (Allen Key included)
4. Interlock the addapter on to the module by twisting it clock wise.
5. Twist the module clockwise into the installed ring for final installation
