THE OZTENT GROUP

***We're probably a lot like you.
Adventurers who love the great outdoors.***

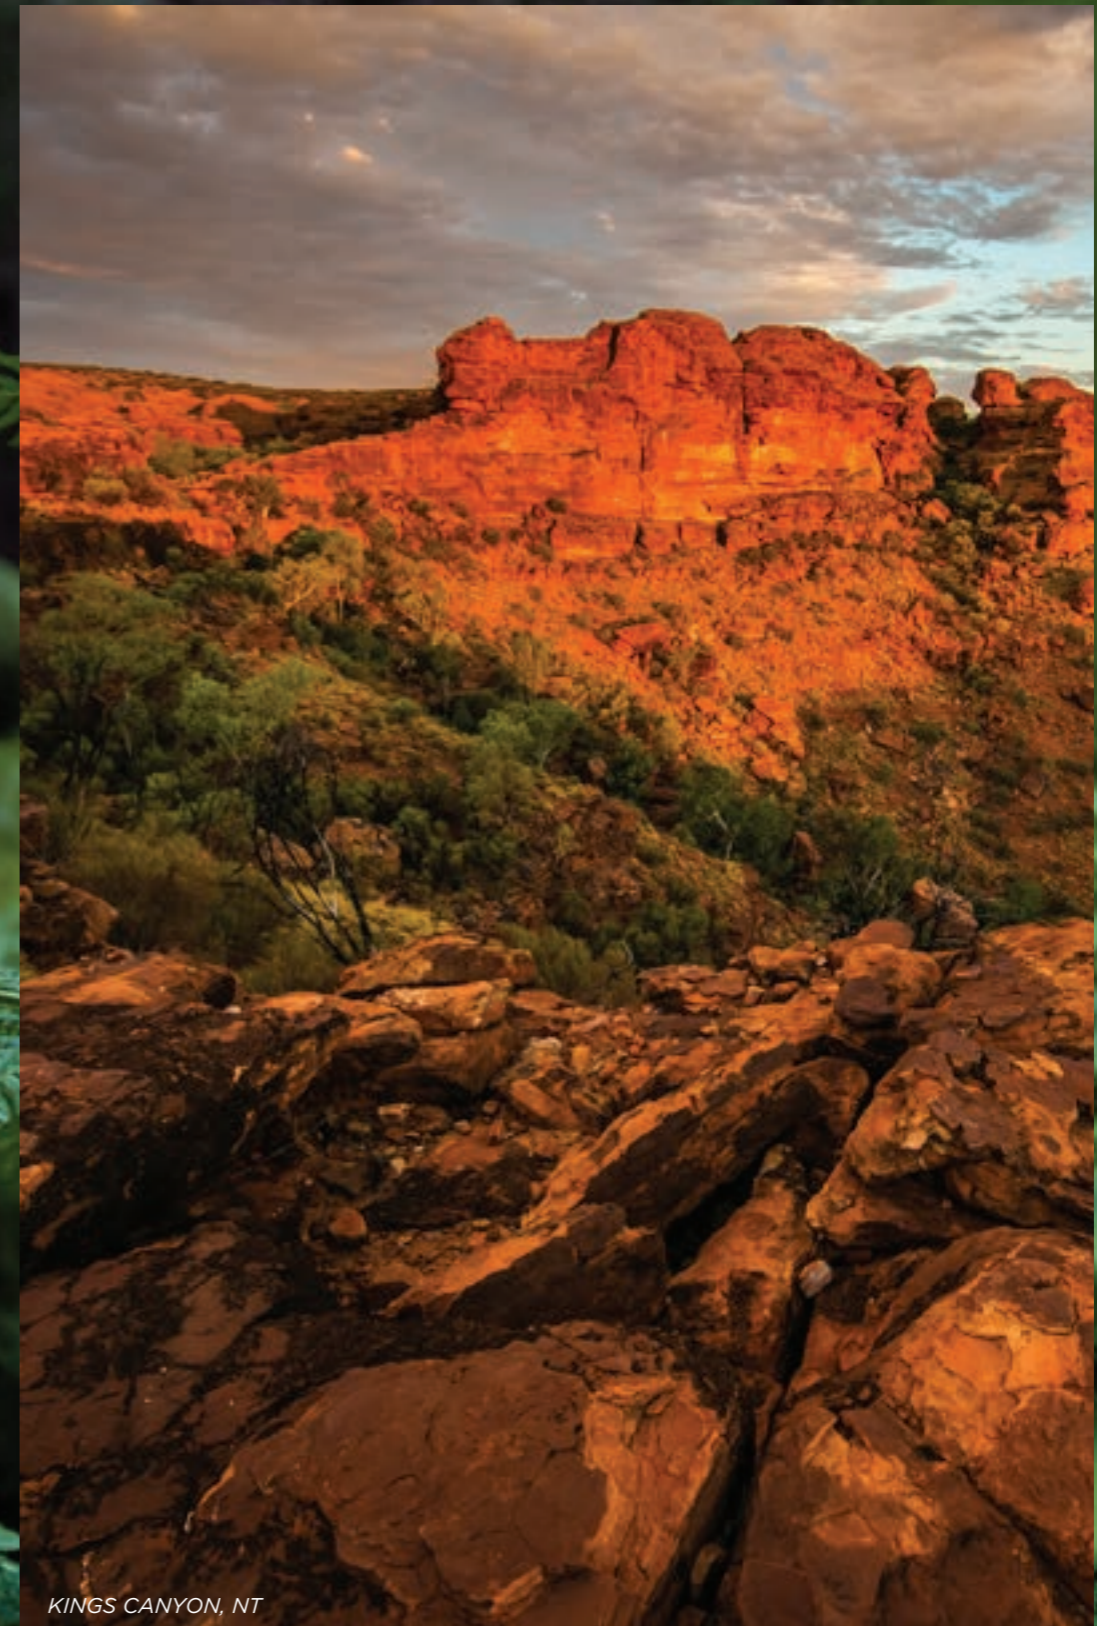

OZTENT was founded over 30 years ago by Joe Viglione, who was frustrated that it took too long to set up a tent. He dreamed of a tent that would literally set up in seconds. Thankfully, he also invented it, and in doing so redefined pitching a tent.

Today we are the **Oztent** Group, an Australian owned and operated business, driven by a passionate team who live and love the outdoors. A team driven by a vision to be the world's premier outdoor company, creating experiences that can only be described as awesome. Knowing that we all experience adventure in different ways, we currently design and develop a range of products under three different brands:

Designed to suit a lifestyle of adventuring, each brand is defined more by an attitude, than age, wealth or aspiration.

All brands are based on quality and created with integrity. We take immense pride in developing products that will help you and adventurers everywhere create awesome outdoor experiences.

KINGS CANYON, NT

DESIGNED FOR AWESOME EXPERIENCES

Design and innovation sit at the heart of our business. From the day Joe first pitched his 30-second tent we have maintained a tradition of creating deeply considered, high quality and reliable products to make it easier for people to experience the wild and wonderful outdoors.

All of our products are designed, developed, tested, and trialled in Australia to ensure that they can endure the harshest Australian conditions nature can throw at them.

While each of our brands is unique, the *Oztent* Group's products are designed around four core principles: things must simply work better, they must have aesthetic balance, be reliable and they must help you to create awesome experiences (and sensational memories).

Over the years these principles, and the innovations they have inspired, have seen us achieve many national and international awards.

We really appreciate such accolades, because it's recognition from those smarter than us, leaders in design and innovation, that encourages us to keep changing the game and developing better products for you.

"We have maintained a tradition of creating deeply considered, high quality and reliable products"

MATERIALS & TESTING

Combined with unique and patented innovations, the **Oztent** Group employs stringent material assessments with certified laboratories that carry out testing that utilises the best practice of globally recognised standards. This is all to ensure that your *Oztent* product meets all requirements, is durable to withstand the harshest environmental conditions and will perform as promised.

Simple Tip:

When reviewing a product's performance claim, make certain that it has been verified by the relevant independent authorities.

“Our designs need to be intuitive, and work time after time – there is no tech support deep in the desert or in an isolated forest”

DESIGN COURAGE

Design and innovation in outdoor equipment is all about pushing boundaries to achieve contrasting goals. You want a small pack size, but also a big and spacious tent; and you also want a product that is lightweight to carry, and at the same time, rugged and durable enough to endure the elements. Designing outdoor equipment takes courage and a great deal of consideration. Our designs need to be intuitive, and work time after time – there is no tech support deep in the desert or in an isolated forest. Brands that last thirty years in this industry are tried, tested and trusted.

PROTECTING US, PROTECTING YOU

Our love of the outdoors and making the experience more enjoyable for everyone means that we work hard to develop ideas, designs, innovations and the highest quality products to continuously deliver better experiences.

Simply this means awesome adventures for you, with speed, ease and reliability.

As not everyone puts such passion and dedication into products, and may even try to 'borrow' our hard-yakka and smarts, we protect what we do with various Intellectual Property Rights such as patents, registered designs, and trademarks.

This means you can be assured that if your product comes from the **Oztent** Group it is authentic and protected. It also means that you can be certain we have taken the greatest of care in its development and it will continue to be supported and looked after by us long after you have made your purchase.

Fun Fact:

Did you know that the profile of the OZTENT RV is so unique that it has been awarded a Registered Shape Trademark? This trademark is so difficult to secure, that it is only awarded to products with a distinguishing and unique aesthetic. Think the Coke bottle, the Porsche 911, the Sydney Opera House, the original iPod and our own OZTENT RV tents.

...it's the experience.

The OZTENT brand sits at the heart of the **Oztent** Group. It is the inspiration upon which the business and all our brands were built.

OZTENT is not a symbol of status, it is statement of freedom, nature and travel, achieved with ease and surety.

OZTENT is all about the experience.

The sheer delightful ease of use, its rugged durability, the comfort it delivers, its innovations, the locations it allows you to enjoy and the memories it fosters... These are just some of the qualities that makes the OZTENT experience so unique.

TENTS & SHELTERS

It's the experience. Seconds to pitch. Second to none.

Around the world the OZTENT range has earned a reputation for speed, innovation and durability with campers who won't settle for second best.

OZTENT inspires passion. Of all the gear that experienced campers carry, some would sooner part with their 4WD than they would their trusty OZTENT. Like all great innovations, the OZTENT just works and keeps working. Rugged, spacious and straightforward, there's an OZTENT design for every camping application.

SWAGS

Nothing says freedom like a swag.

As iconic as utes and riding boots, the swag has forever been a symbol of independence and freedom in the Australian bush. Essential since drovers first cut the world's longest roughest stock routes little has improved with swags ... until now.

By infusing our core principles of design into the swag we have created a new generation of products that are appealing, reliable, work significantly better and assure awesome experiences.

OZTENT TECHNOLOGY

ULTRA LIGHT SWAG

The swag created for two-wheel adventuring.

Easy Set Up & Pack Down - Enjoy a simple hassle-free set up and pack down, fast and easy. Including colour coded poles for intuitive assembly.

Soft Ground Support System - Aluminium foot pole soft ground support system (SGS-System) assures ventilation and support, even on sand.

No-See-Um Mesh Sky Screens - All of the view, none of the bites.

Ventilation - Well ventilated with great airflow to minimise condensation and maximise comfort.

100% Waterproof

8oz Ripstop Polycotton Canvas

350gsm Heat Sealed PVC Tub Floor

Seam-Sealed Double Stitching

UV+ Protection - Designed to endure the sunburnt land.

Easy Access - Through the side or the head of the swag.

Vestibule - Front vestibule area for extra storage.

Rugged Hardy Construction - Designed to go the distance no matter how rough.

ULS-1 ULTRA-LIGHT SINGLE SWAG

The swag created for two-wheel adventuring.

Tiny and tough, the ULS-1 is designed for those who want to travel beyond the beaten track. Ride rough and sleep well, the ULS-1 is a high quality, well ventilated, lightweight swag built to endure the elements.

ULTRA-LIGHTWEIGHT

OZSHBUPROA

TENTS

It's all in the name.

We have cut our teeth on designing, developing, and providing customers with tents we believe are the best in the world.

Engineered for ease of use and to withstand the harshest of Australian conditions, no other tents are as fast to set up, durable, and easy to use as our OZTENT R series tents. From here, we simply refine the features to meet specific desires and make certain that your experience is awesome.

ORANGE, NSW

YOUR TENT - GETTING IT RIGHT REALLY MATTERS

“A tent that you can pitch in 30 seconds is going to get you out of a lot of trouble in a downpour”

All tents are not equal - if you believe they are be very careful next time you go camping.

A great deal of thought, many nights of camping in all sorts of conditions and a lot of certified testing to the world's highest standards go into creating a tent that will be easy to use, reliable and still standing after nature has had a really good crack at you.

Some things to think about when looking for a tent that is right for you include:

- 1.** How often are you camping and for how long? Your tent does not just need to be easy to use and durable when on site, you also want to be able to store it easily when at home.
- 2.** What conditions are you facing? A tent that you can pitch in 30 seconds is going to get you out of a lot of trouble in a

downpour, but you also need to ensure that it will still be standing in windy conditions and that no matter how wet it is outside, you still stay dry and comfortable inside.

- 3.** What is the climate like? A good tent should not only keep you warm on cold nights but be well ventilated to ensure you don't swelter on scorching summer days. Good ventilation also helps manage condensation and while it is impossible to avoid completely it can be minimised significantly.
- 4.** How many people will be sleeping in the tent? Be careful here; you want to be comfortable and not every tent allows for enough space between people sleeping in the tent.

R SERIES TENTS

Dare we say it, when we launched the first RV tent, we empowered a new type of camper and created a new camping category, pioneering the concept of quick set-up tents. At the same time, we removed complexity, angst and often arguments from the joy of setting up a campsite.

While others have since joined the market with fast tents, our 30-Second Frame tents (and swags) have three unique features:

- 1.** They are constructed around a High Quality Aluminium Frame, ensuring that they can stand solid and endure the harshest conditions.
- 2.** You can set up the complete body of your tent in less than 30 seconds - free from poles and arguments.
- 3.** There is no faster tent of this quality in the world.

High quality, easy to use, OZTENT R Series tents, being the first up at any location and the last standing under any conditions have helped family and adventure campers around the world have incredible experiences.

As time has changed, so have our tents, seeing more offerings and space being provided.

Whether it be a family weekend away, a month at a favourite site, or two years touring through the back of beyond, our 30-Second Tents assure experiences second to none.

RV-3

Rugged, reliable, super easy. All in 30 Seconds.

Made from high quality, waterproof, 8oz ripstop polycotton canvas and a heavy-duty, heat-sealed PVC floor.

AIR TENTS

At *Oztent* our love for adventure goes beyond the great outdoors.

We strive and thrive on exploring new ideas and developing better products that create awesome experiences for you.

Our Air Tents personify this enthusiasm. Super-fast and easy to set up, incredibly durable, and packed with features you won't find in other tents; they remove much of the time and complexity usually associated with large cabin tents.

They have the room, space, ventilation, and air (pardon the pun) to make certain you can enjoy that precious time away, free of hassle and filled with fun, regardless of the conditions.

With plenty of wide openings for views and ventilation, especially in summer, they can all be completely closed and sealed from inside if the weather turns wild.

Power inlets that can be zipped tight to keep nasties out, large internal pockets, doors that convert to awnings for additional shade and our signature reflective guy-ropes are just some of the smart additions you'll discover with these tents.

Simply peg down, pump-up, kick back, and enjoy the experience.

(And, yes... of course the pump is included in the kit.)

AT-4 AIR TENT

The airy, easy and practical tent for four.

Fast, easy and durable, the OZTENT AT-4 Air Tent sleeps 4 people comfortably and boasts a large, covered living area. Designed for entertaining, the AT-4 delivers excellent all-weather shelter.

TENT & SHELTER ACCESSORIES

***All you should ever need for
shelter is OZTENT.***

We design all of our OZTENT tents and shelters to be modular, making sure that you can add, build, and adapt to yours as and when you require.

You can even attach it to caravans, your FOXWING Awning, sail tracks or connect tents together.

Here is a great selection of accessories you can add to your OZTENT or just use onsite - all helping to create great outdoor experiences.

CARAVAN CONNECTOR

Connect your caravan.

Connect your OZTENT tent to any fixed surface that has a sail track including caravans, campervans, horse floats and four wheel drives.

AWNING CONNECTOR

Connect your tents.

A stunningly simple innovation that allows you to zip two OZTENT tents together, awning to awning. Great for travelling with a family as it allows you to have two separate rooms with a large undercover area in between.

RV/RV PLUS MESH FLOOR SAVER

Protect your tent.

The RV Mesh Floor Saver extends all the way underneath the base of the tent and out to the front of the awning.

SV-5 MAX MESH FLOOR SAVER

Protect your tent.

The SV-5 Max Mesh Floor Saver extends all the way underneath the base of the tent and out to the front of the awning.

FURNITURE

Bring the experience of OZTENT furniture to your camp. High quality, easy to use, comfortable and smartly designed.

Over the years, encouraged by campers from around the world, and our own experiences, we have expanded our OZTENT range well beyond the tent.

At the forefront of our design thinking for OZTENT products is the question, "How do we help you have a great experience while camping?"

The answer is we do this by constantly striving to create smarter, high quality products that are tough, easy to use, eye catching and practical.

From chairs that are so durable they are the only brand backed with a five year warranty, to big, solid, three-level camper cupboards that fold flat; it's all about the experience with OZTENT.

CHAIRS

Unsurpassable quality, comfort, and ease.

Sit in one of our chairs ... we dare you. Once you have, you'll never want another.

Perfect for camping or events, we have created a broad selection to cater to your specific needs.

Whichever chair you chose you'll never experience better.

MEET THE BEST SEAT FOR YOU

“All reputable camping stores carry a selection of OZTENT chairs, so you’re sure to find one perfect for you”

Every aspect of our chairs has been thoroughly thought through. They are designed to go the distance and are the ONLY camp chairs supported by a five-year warranty.

When it comes to chairs, personal preference differs considerably. Here are some points to consider:

- 1.** Do you like high backs and sitting tall, or lower backs that won't knock your hat off?
- 2.** How about the arms? Consider whether you would prefer them to be hard. That makes it easy to push up from; or soft arms which are more flexible and form to better cradle your build.
- 3.** What about size and weight? Many of our chairs have a 200kg load bearing capacity.
- 4.** Why not one chair for all conditions? Our HotSpot™ chairs are perfect for any season, but when it gets cooler they provide heated comfort throughout the chair. No need for electricity, cords or worry.
- 5.** How's your back? OZTENT developed Lumbar Support so you can adjust your chair to suit your size, seat, and posture.
- 6.** Smart Additions - Want a table with your chair, or a table that turns into a chair? How about a cooler, a mini storage unit or storage for your technology?
- 7.** If you can test the chair in person, do so. All reputable camping stores carry a selection of OZTENT chairs, so you're sure to find one perfect for you.

DOVE LAKE BOATSHED, TAS

BEDDING

Sleep better and enjoy the experience. Quality, comfort and reliability, everything you need for your campsite.

At the **Oztent** Group, we thrive on creating products that deliver great outdoor experiences. Like you, we know that no matter how wild the adventure and rough the travel, if you don't sleep well your enjoyment can dramatically dissipate. This is why we have worked hard to design and develop a comprehensive range of innovative sleeping gear that is durable, practical, easy to use and very comfortable.

PILLOWS & MATTRESSES

Experience proper sleep when camping.

'Great sleep when camping' is usually a contradiction. Not anymore.

We've invested a lot of time and effort into understanding how to sleep... All in order to design a range of pillows and mats that will help you sleep better when camping.

Experience better bedding products for camping, and better enjoy your camping experience.

OZTENT TECHNOLOGY

BEDDING

Bigger, better sleeping comfort.

AeroFrame Foam Core™ - AeroFrame is a unique, high quality mattress foam core construction design that delivers full form support - allowing you to twist and turn without disturbing your partner.

R-Values - OZTENT mattresses deliver market leading insulation. You can be sure that no matter how cold the ground below your mat, you'll stay comfortable and warm on top of it.

Hi-flow Multi-Function Valve™ - Dual direction valve ensures full inflation and complete deflation with speed and ease, while also allowing you to fine tune your mats firmness. Developed for OZTENT Cirrus and Stratus mats.

Easy Flow Valve™ - A complete pillow in a few short puffs and even easier to deflate. Developed for OZTENT Cirrus and Stratus pillows.

X-Hale™ Pump Sack - Fast, easy inflation of your mat, preventing humidity from your breath going into the mat.

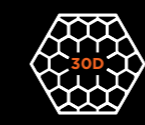

Mattress Adjustability - Simple, fast and easy to adjust to your desired mattress firmness by using the Hi-Flow Multi-Function Valve™ to control the amount of air.

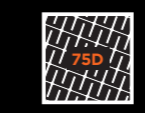

Disturbance Free - the award winning AeroFrame dampens movement vibrations to minimise partner disturbance.

Full-Form Support - When you sleep on your side, AeroFrame™ reduces hips and lower back stress by preventing your hips from sinking too deep into the mattress.

Hivetec™ 30D Soft Touch Stretch Fabric - Hivetec™ surface is a luxuriously comfortable 30D soft touch stretch fabric.

Tuff-Tek™ 75D Polyester with Laminated TPU - Designed for the harsh environments and abrasion resistant to go the distance.

10cm Thickness - Though it packs neat and tight AeroFrame™ delivers 10cm of luxurious comfort in our Stratus mats.

8cm Thickness - 8cm of comfort in our Cirrus mat.

CIRRUS PILLOW

The right sized pillow.

Designed to be fast and easy, while delivering cloud like comfort. This is a great little pillow to help you sleep well and enjoy the experience.

4.5+

SUGGESTED R-VALUE FOR COLD SLEEPERS

R0.5

1.5

2.5

3

3.5

4

4.5+

What is an R-value?

An R-value is a measure used to indicate how well your sleeping mat will stop heat loss. It's a scientific measurement that is more accurate than a suggested temperature rating generally given by some companies.

The R-value is a measurement of Thermal resistance that indicates a material's ability to insulate. In real terms, the R-value tells you how well your sleeping mat will help to keep you warm as part of your sleep system.

Simply put, the higher the R-value figure, the more insulating and therefore the warmer, the mat will be.

R-value standard from 2020

From 2020, a new industry standard was introduced for the measurement of R-value, developed by ASTM International - the ASTM FF3340-18 R-value standard. OZTENT mattresses are tested to this standard to help you make the right decision when choosing a mat.

Every person has different sleep patterns, so it's impossible to give exact temperature estimates. Factors such as ground temperature and the shelter you are using can also change the performance of your mat. Also, other factors like physiological differences, sleeping bag selection, diet, tiredness etc can all affect how warmly a person sleeps.

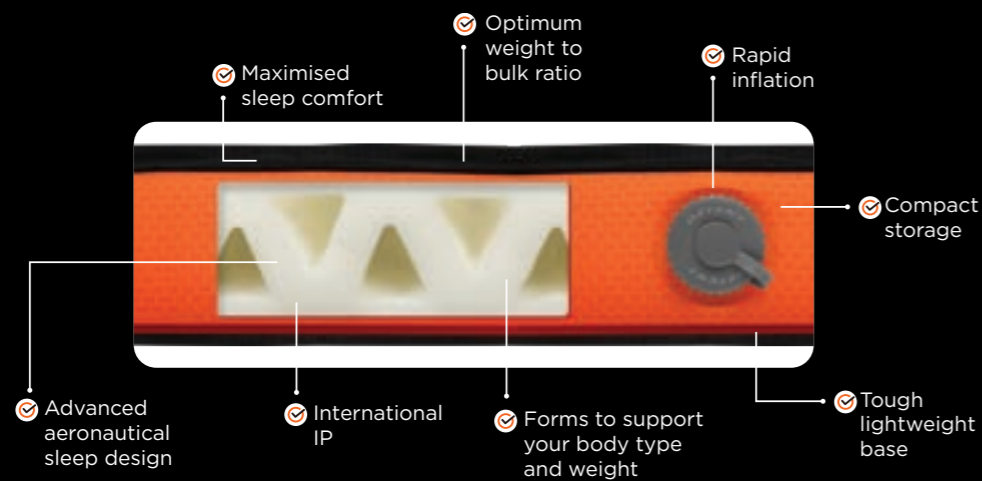

So really a mat can be broken down into 4 categories for you to consider when choosing - Warm, Cool, Cold and Extreme.

- **Warm (Summer):** Suggested R-value 0.5 to 2 in consistently warm air and ground temperatures
- **Cool (Spring/Autumn):** Suggested R-value 1 to 3.5 in Cool air and ground temperatures during the night and morning
- **Cold (Winter):** Suggested R-value 2.5 to 4.5 in Cold air and ground temperatures during the night or morning
- **Extreme (Alpine):** R-value 3.5 to 5+ - Freezing air and ground temperatures during night and morning

AEROFRAME FOAM CORE™

Unprecedented sleep comfort and support.

The OZTENT AeroFrame Foam Core™ is precision designed for maximum sleep comfort, rapid inflation and compact storage. Inspired by advanced aerostructure design, the Aero Frame Foam Core™ offers evenly distributed sleep support while minimising bulk and weight. The structure also intakes air swiftly during roll-out and ejects air quickly when you roll it up. Its construction delivers full form support - allowing you to twist and turn with minimal disruption to your partner.

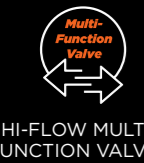

Most people move about twenty times a night to avoid pressure overloading and to avoid muscle soreness. Our stretch TPU fabric helps you roll easily while AeroFrame dampens the vibrations from your movements to minimise partner disturbance.

When you sleep on your side, AeroFrame reduces hips and lower back stress by preventing your hips from sinking too deep into the mattress.

You can also adjust your desired mattress firmness by controlling the amount of air AeroFrame holds with the Hi-Flow Multi-Function Valve.

Our Hi-Flow Multi-Function Valve helps you roll up your mattress into a super small roll, and our compact storage bag makes sure it stays that way.

The mattresses feature many innovations that keep them super lightweight, such as the carry bag that also doubles as an air pump when you need a bit of extra firmness.

CAMPSITE SLEEPING REDEFINED

“This is a well-designed mattress that offers ultimate luxury!!”

Judge's comment
2021 Good Design Awards

We love making the outdoors an accessible and enjoyable experience for all. We also know that the inability to have a comfortable night's sleep when camping is a deterrent for many and if sharing a bed, it can be even worse. That's why we solved the issue and more...

Our range of mattresses and pillows have been designed for those who want to sleep in comfort when camping.

Called the 'inspired products' by our Global Product Development Manager, these products were developed with his own comfort in mind. A well travelled adventurer, our lover of the scrub had a broken back and

a wife who disliked his constant tossing and turning when camping. You can see where this is going

But don't just take his word for it. The thinking and design that has gone into these products are not only world class in terms of certification; they have also been awarded an international design award for their comfort, durability and function.

“... uses an innovative combination of high quality materials very clever use of the cover as a pump for additional air in the mattress. This is a well-designed mattress that offers ultimate luxury!!”

Judge: 2021 Good Design Awards

OZSIMSDMA

SLEEPING BAGS

A sleeping bag for everyone.

Designed for family camping adventures, our sleeping bags are packed with smart features.

With a good selection of sizes and weights, when paired with our tents and insulated mats, you will find one perfect for your sleep requirements on warm, mild or cooler nights.

OZTENT TECHNOLOGY

SLEEPING BAGS

Catering to every camper.

T-Therm™ insulation - 'T-Therm' Insulation filling is a matrix of T-Therm Polyester fibres that will keep your body insulated, warm and cosy. T-Therm fibres are naturally moisture resistant to maximise your sleeping comfort.

Comfort Plus™ - Designed to provide maximum comfort. The inner fabrics, the collar and side baffles, ensure that you get a great night's sleep.

Simple Glide™ Zipper System - OZTENT combines smooth gliding zipper technology with auto locking sliders and anti-snap guards. This results in hassle-free operation where the zipper opens easily, but only when you want it to.

Zip Connect™ - OZTENT designs sleeping bags to allow you to join two sleeping bags together to give you a double width. Simply ensure that you are connecting the Left and Right-hand versions of the same model.

Inner Storage Pocket - Keep important items close and secure.

Draw Cord Closure & Hook+Loop Closures at Zip Opening Point - Maximise warmth retention.

XSIL™ - Brushed polyester inner.

HOW TO SELECT THE RIGHT SLEEPING BAG

If you're into family camping or recreational camping, OZTENT has the right sleeping bag for you.

Estimate the temperature

All OZTENT sleeping bags are designed to the highest quality standards and meet the strict requirements of the latest and most up to date international ISO Standards (ISO 23537-1:2016/Amd. 1:2018) for temperature ratings.

'COMFORT TEMPERATURE' & 'LIMIT TEMPERATURE' - If you are concerned that you might feel cold in a sleeping bag, then look at the 'Comfort Temperature' rating and the 'Limit Temperature' rating. (Refer to the table on the next page.)

*** IMPORTANT ***

The ISO temperature rating for each OZTENT sleeping bag is your guarantee that the sleeping bag has been tested and will perform to the level indicated on the rating.

For the cooler months

1. Estimate the lowest overnight temperature you will experience.
2. Refer to the table on the next page and decide whether the 'Comfort Temperature' rating or the 'Limit Temperature' rating applies to you.
3. Select an OZTENT Sleeping bag that has a temperature rating below your estimated overnight temperature.

In 2016, the old EN Temperature Rating system was replaced with the ISO Temperature Rating system [ISO 23537-1:2016] because consumers demanded a more accurate and reliable temperature rating system for sleeping bag performance.

Consequently, it is strongly recommended that you always only use the ISO Temperature Rating system because the ISO rating is a more accurate and more scientific method of testing sleeping bags.

What you need to know about sleeping bags

There is a physiological difference between men and women, an 'average woman' will feel colder in the same sleeping bag as an 'average man'.

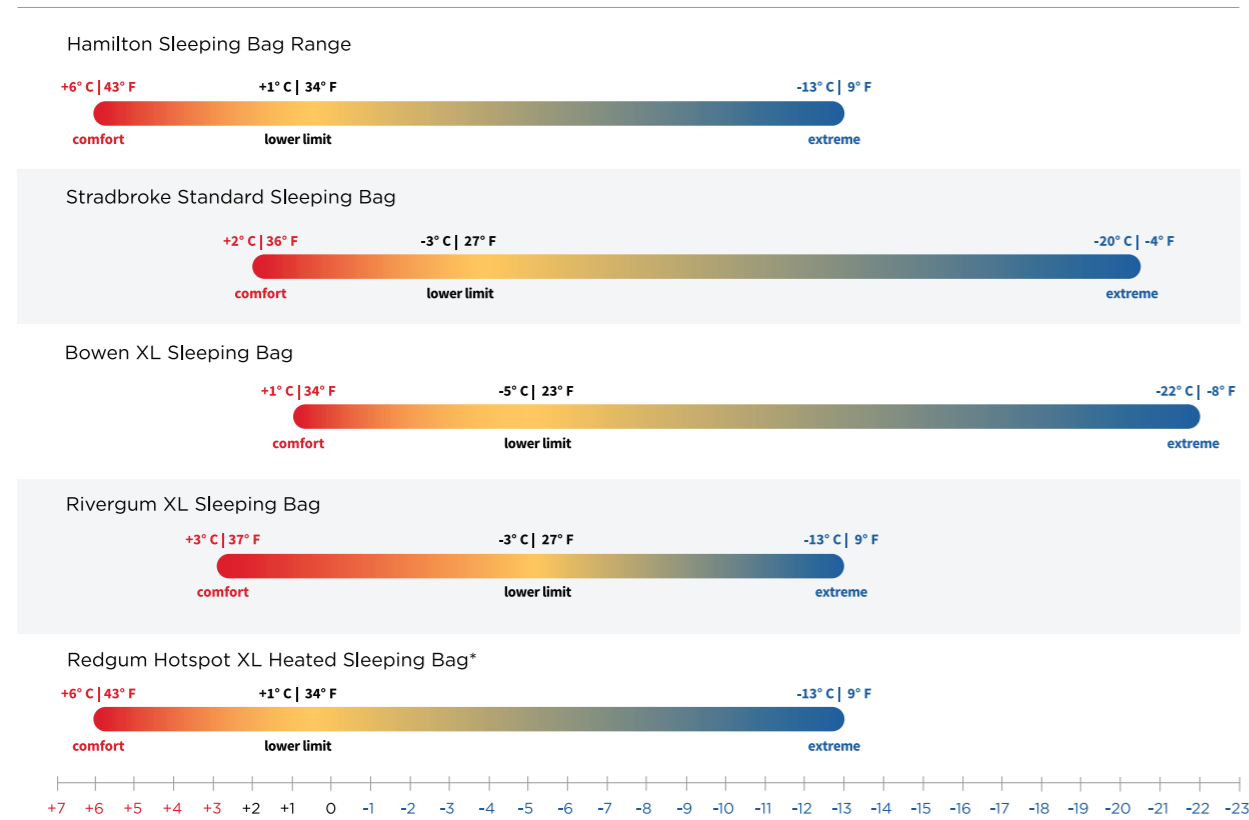

Don't make a mistake - an EN Temperature rating IS NOT the same as an ISO Temperature rating.

All sleeping bags using the ISO standard provide three temperature ratings shown in the 'ISO Temperature Rating' table.

Only purchase sleeping bags that carry the official ISO Temperature Rating so that you can have confidence that your sleeping bag will perform the way you need it to.

ISO Temperature Ratings are not used for children's sleeping bags.

Outside Temperature °C / °F

Comfort temperature

The lowest temperature at which a person with a relaxed body posture such as lying on their back can sleep in comfort (i.e. in thermal equilibrium and does not feel cold).

Lower limit temperature

The lowest temperature at which a person in a curled up body posture can sleep in comfort (i.e. in thermal equilibrium and does not feel cold).

Extreme temperature

WARNING - At this very low temperature and below (i.e. colder) the risk of health damage by hypothermia is possible. This is a danger which can lead to death.

** DO NOT USE THIS SLEEPING BAG IN THESE VERY LOW TEMPERATURES. The Redgum Hotspot™ sleeping bag can provide additional heat by turning on the HotSpot™ pouches that are included with the sleeping bag.

NOTE:

- If the weather is warmer than expected you can always moderate your temperature by adjusting the zipper on your bag to a point that is more comfortable; and then zip it up as the night cools.
- ISO Temperature Ratings are not used for children's sleeping bags. Consequently, children's sleeping bags are not ISO tested and not given an ISO Temperature Rating.

HAMILTON JUNIOR

For smaller family members.

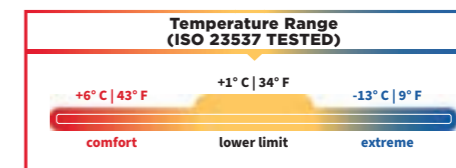

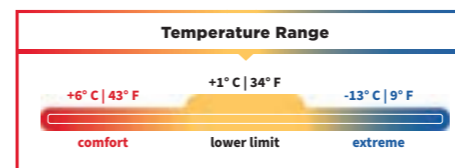

This little ripper was built for smaller campers of the family. More compact in size the Hamilton Junior is still big on features and comfort.

HAMILTON STANDARD

The perfect bag for mild nights.

A high quality, comfortable sleeping bag with everything needed for a great night's sleep in milder conditions.

STRETCHERS

Stretch(er) your boundaries.

When good things work, why not make them better ...

This is the philosophy we have with our stretchers.

With our OZTENT Series II Stretchers we have iterated on what was great in our previous range of stretcher, to deliver even better.

And, of course, we continue to back their quality and durability with our industry leading five-year warranty.

GOANNA STRETCHER SERIES II

Perfect for smaller sleepers.

The Goanna Stretcher [Series II] redefines comfort and practicality. Compact size, with easy to reach storage and 150kg weight rating, this stretcher is designed for smaller campers.

GECKO STRETCHER SERIES II

A great night's sleep in any OZTENT tent.

The Gecko Stretcher [Series II] is all about comfort and practicality. It has an easy to reach storage system and easily fits into any OZTENT tent.

KING GOANNA STRETCHER SERIES II

Big in size and style.

The King Goanna Stretcher [Series II] redefines comfort and practicality. Over 2 metres long, with an easy to reach storage system and weight-rated to 150kg, this stretcher is designed for campers of all shapes and sizes.

RS-1S STRETCHER SERIES II

Big, strong, and stable

- put your RS-1 Swag on top!

Experience true comfort with the RS-1S King Single Stretcher [Series II]. Built big, tough and functional, it has a 200kg weight rating and is designed to hold the RS-1 Swag.

STORAGE

Everything together, safe and secure.

Find your perfect travel partner, with the OZTENT range of storage solutions. Our range of products come in various shapes and sizes to carry everything you need for your next camping adventure.

The OZTENT RV Pro Travel Case is designed for serious campers who want to enjoy the experience knowing everything is together in one neat and easy kit. Easily pack your RV tent (regardless of size), and accessories all in one neat, durable, easy to manoeuvre travel case.

The 48L Pro Travel Bag is designed to be an easy to use, extremely reliable and waterproof means of protecting your ULS-1 Swag and kit when travelling.

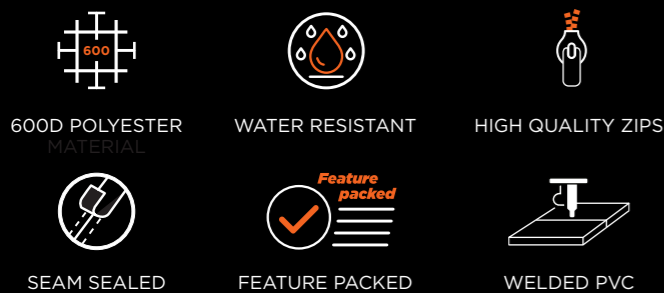

We got sick of messy campsites and disorganised vehicles. So, we've created a collection of innovative storage bags, pods and hangers, designed to make camping and adventuring a more organised experience.

RV PRO TRAVEL CASE

Keep it all together.

The RV Pro Travel Case is designed to be used in conjunction with the existing range of tent carry bags, rather than replacing them, although it can be used solely by itself if required.

Additional Features: Full weather protection for your tent, large wheels for easy transport of your tent, extra-large three-sided opening for easy packing of your tent + accessories, fits all RV, RX, SV and RV Lite tents

Material: Heavy-Duty PVC
Base: 600D Reinforced Polyester

HYDRATION

Tough stainless steel exteriors and vacuum insulated interiors, experience pure flavours at correct temperatures.

Knowing how hot and thirsty you can get camping, the OZTENT Hydration range is a perfect selection of products to keep your thirst quenched, even on the hottest days.

This well thought out range consists of two sizes of water bottle, a coffee cup and a can cooler.

Built upon our principles of design, each item is tough, easy to use, eye catching and practical.

Each one delivers double wall vacuum insulation and several neat little features to make drinking even more enjoyable whilst camping.

ALPINE CAN COOLER

Keep your drink cold.

Sick of cold cans going warm in minutes? This stylish cooler will never let you down, keeping your cans and bottles icy cold for up to 4 hours! It fits all standard 375ml cans and will also fit some bottles.

STAYS COLD FOR 4 HOURS

STAYS HOT FOR 3 HOURS

DOUBLE WALL CONSTRUCTED

Additional Features: Double wall vacuum insulation - keeps your drink icy cold for up to 4 hours, fits standard 375ml (12oz) can size and some bottles, the lid locks the can/bottle inside - it won't slip out, sweat-free so your hands stay dry, BPA free

Cooler: Food Grade 18/8 Stainless Steel
Lid: Silicone

Net Weight: 168gm | 5.9oz

Size: 7cm (W) x 7cm (D) x 11.5cm (H)

FOXWING

We've got you covered.

FOXWING is the brand that's built for vehicles – employing the quality and design approaches of all **Oztent** products.

All FOXWING awnings are designed for single person set up, straight off your vehicle's roof rack, so shade is fast and always available.

With a great selection of modular accessories, you can turn your shade into a fort against the elements in mere minutes.

Fun Fact:

The designers of the first FOXWING product were so inspired by the wings of Australia's native flying foxes (bat-like creatures) that they engineered a product which would replicate their durability, flexibility, and functionality, hence its unique patented design and the name.

AWNINGS

Shade in seconds.

A whopping big shady roof in seconds, straight off the side of your vehicle. We design all of our awnings to be hassle free and hardy, making certain that we've got you covered wherever you may be.

Simply pull over, pull out and kick back.

FOXWING HAS GOT YOU COVERED

Top four reasons why FOXWING has got you covered.

1. One-person operation

The 270° Awning's unique design allows for a quick and easy one-person set up in minutes. The single piece attaches neatly onto the roof rack and swings outward.

2. Full coverage of side and rear

Unique to the FOXWING is side and rear coverage, providing 270° of shade and comfort. Made from high quality material (Oztent's exclusive Ripstop ModCan) it is UV protected, waterproof and mould resistant.

3. Fits a wide range of racks

Fits Rhino-Rack, Thule, Yakima, ARB, TJM and most leading roof racks with specific fitting kits.

4. Zipped edges for accessories

Features zipped edges allowing for a modular camp setup. Quickly and easily connect awning extensions, walls and OZTENT tents.

180° AWNING (LHS)

Fast, easy shade when you need it.

Delivering a vast 6.5 square metres of expandable coverage, one-person operation and tent-compatibility, the 180° Awning is an instant shelter like no other.

MAFUBCOA

FAST & FUN

Designed to always be good on the go, these chairs, and all products in the MALAMOO range are light, comfortable and simple to use.

With MALAMOO you always have the perfect gear to enjoy a quick dash to the beach - now all you need to do is find the perfect location in which to enjoy them.

Like all products from the **Oztent** Group we have designed these chairs to simply work better than others in the category, be reliable, have an aesthetic balance and help you create awesome experiences.

Just make certain you don't get sunburnt, because that's not awesome. But, we can help you stay shaded too... which is awesome!

AFTER SALES SERVICE

At the **Oztent** Group we strive to create the highest quality products. Products that are comfortable, smarter, more durable and easier to use than others. Naturally, if you love wild adventures in rugged territories as much as we do, you will realise that no product will last forever.

Whilst we try hard to make indestructible products, in product testing, we also try harder to break them and if we try long enough and hard enough we eventually succeed - but it's not easily done!

Our years of outdoor experiences have taught us that the best design should incorporate easy solutions. Should you go hard on one of your products and it wears out, we are likely to have a replacement part available for it. So, if you encounter an outdoor problem, it's possible that the solution is just a click away at **Oztent**. So, jump onto the website or reach out to our *Oztent* Group Customer Care team for more information.
