

18th San Francisco International Symposium on TCM Men's Health

TOPIC:
MEN'S HEALTH

The event will bring together six of the most knowledgeable experts on TCM andrology in the world whose presentations will explore three common conditions:

- Male Sexual Dysfunction
- Prostate Disease
- Oligospermia

MEN'S HEALTH EVENT

During their presentations, professors will:

- Introduce the latest research progress in the field of TCM for men's health
- Share the latest and most standardized treatment protocols
- Present their unique approach and prospective research results on andrological diseases

The aim is to foster a collaborative environment and provide valuable insights into the advancements in TCM for men's health.

HISTORY

THE SAN FRANCISCO INTERNATIONAL SYMPOSIUM ON TCM

The San Francisco International Symposium on TCM was founded in 2004 by the California Certified Acupuncturists Association (CCAA) and the Research Institute of Chinese Medicine (RICM). In 2015, it was taken over by the American Association of Chinese Medicine and Acupuncture (AACMA).

Over the years, the symposium has established long-term cooperative relationships with esteemed institutes such as the Guangzhou University of Chinese Medicine, Yunnan Provincial Society of Traditional Chinese Medicine and the Huaxia Foundation. Additionally, it enjoys the support of the World Federation of Chinese Medicine Societies and the World Federation of Acupuncture and Moxibustion Societies. With the assistance of its cooperative partners and supporters, the symposium has successfully organized 17 annual events. Each year, it brings together experts and enthusiasts from the field of Traditional Chinese Medicine, fostering knowledge exchange and collaboration on a global scale.

THE SAN FRANCISCO INTERNATIONAL SYMPOSIUM ON TCM

TRANSITION

Since 2022, the symposium has been held online due to the pandemic. Fortunately, the virtual format has garnered even more attention and participation from TCM practitioners in China, the US, and around the world. Since making the transition online, hundreds of international Chinese medicine practitioners have joined each year to actively participate in the Symposium. With almost 20 years of experience in hosting both offline and online educational events, and thanks to the dedication and passion committed team, the San Francisco International Symposium on TCM has become a trusted and well-regarded name in the world of traditional Chinese medicine.

THE SAN FRANCISCO INTERNATIONAL SYMPOSIUM ON TCM

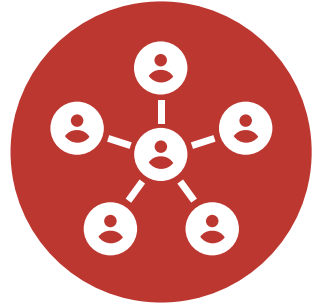

COLLABORATION

This year, the symposium is collaborating with the World Chinese Medicine Forum to further expand the event's availability to practitioners worldwide, featuring simultaneous translation in Chinese and English. More accessible than ever before, this year's event aims to provide the same exceptional superlative educational opportunities to international practitioners that the community has come to expect.
