

# DISCOVER OASE

“We feel an obligation to nature.  
Water is our passion.  
Living, natural, and healthy water.  
In short: LIVING WATER. This is what OASE stands for, it is our conviction.”

Thorsten Muck, CEO

## Discover OASE

If you want to discover OASE, you will travel into the countryside.  
More precisely into the region known as Tecklenburger Land, a water-rich  
landscape with peat bogs, wetland habitats and canals.  
No wonder that water is the central theme at OASE.

---

Water is our element: It is the reason for our products, the objective of our research and development, the measure of our actions and the habitat that we shape. OASE started with water gardens. Today we offer everything to do with garden design and aquatics: inspired by nature and our customers.

## Discover conviction

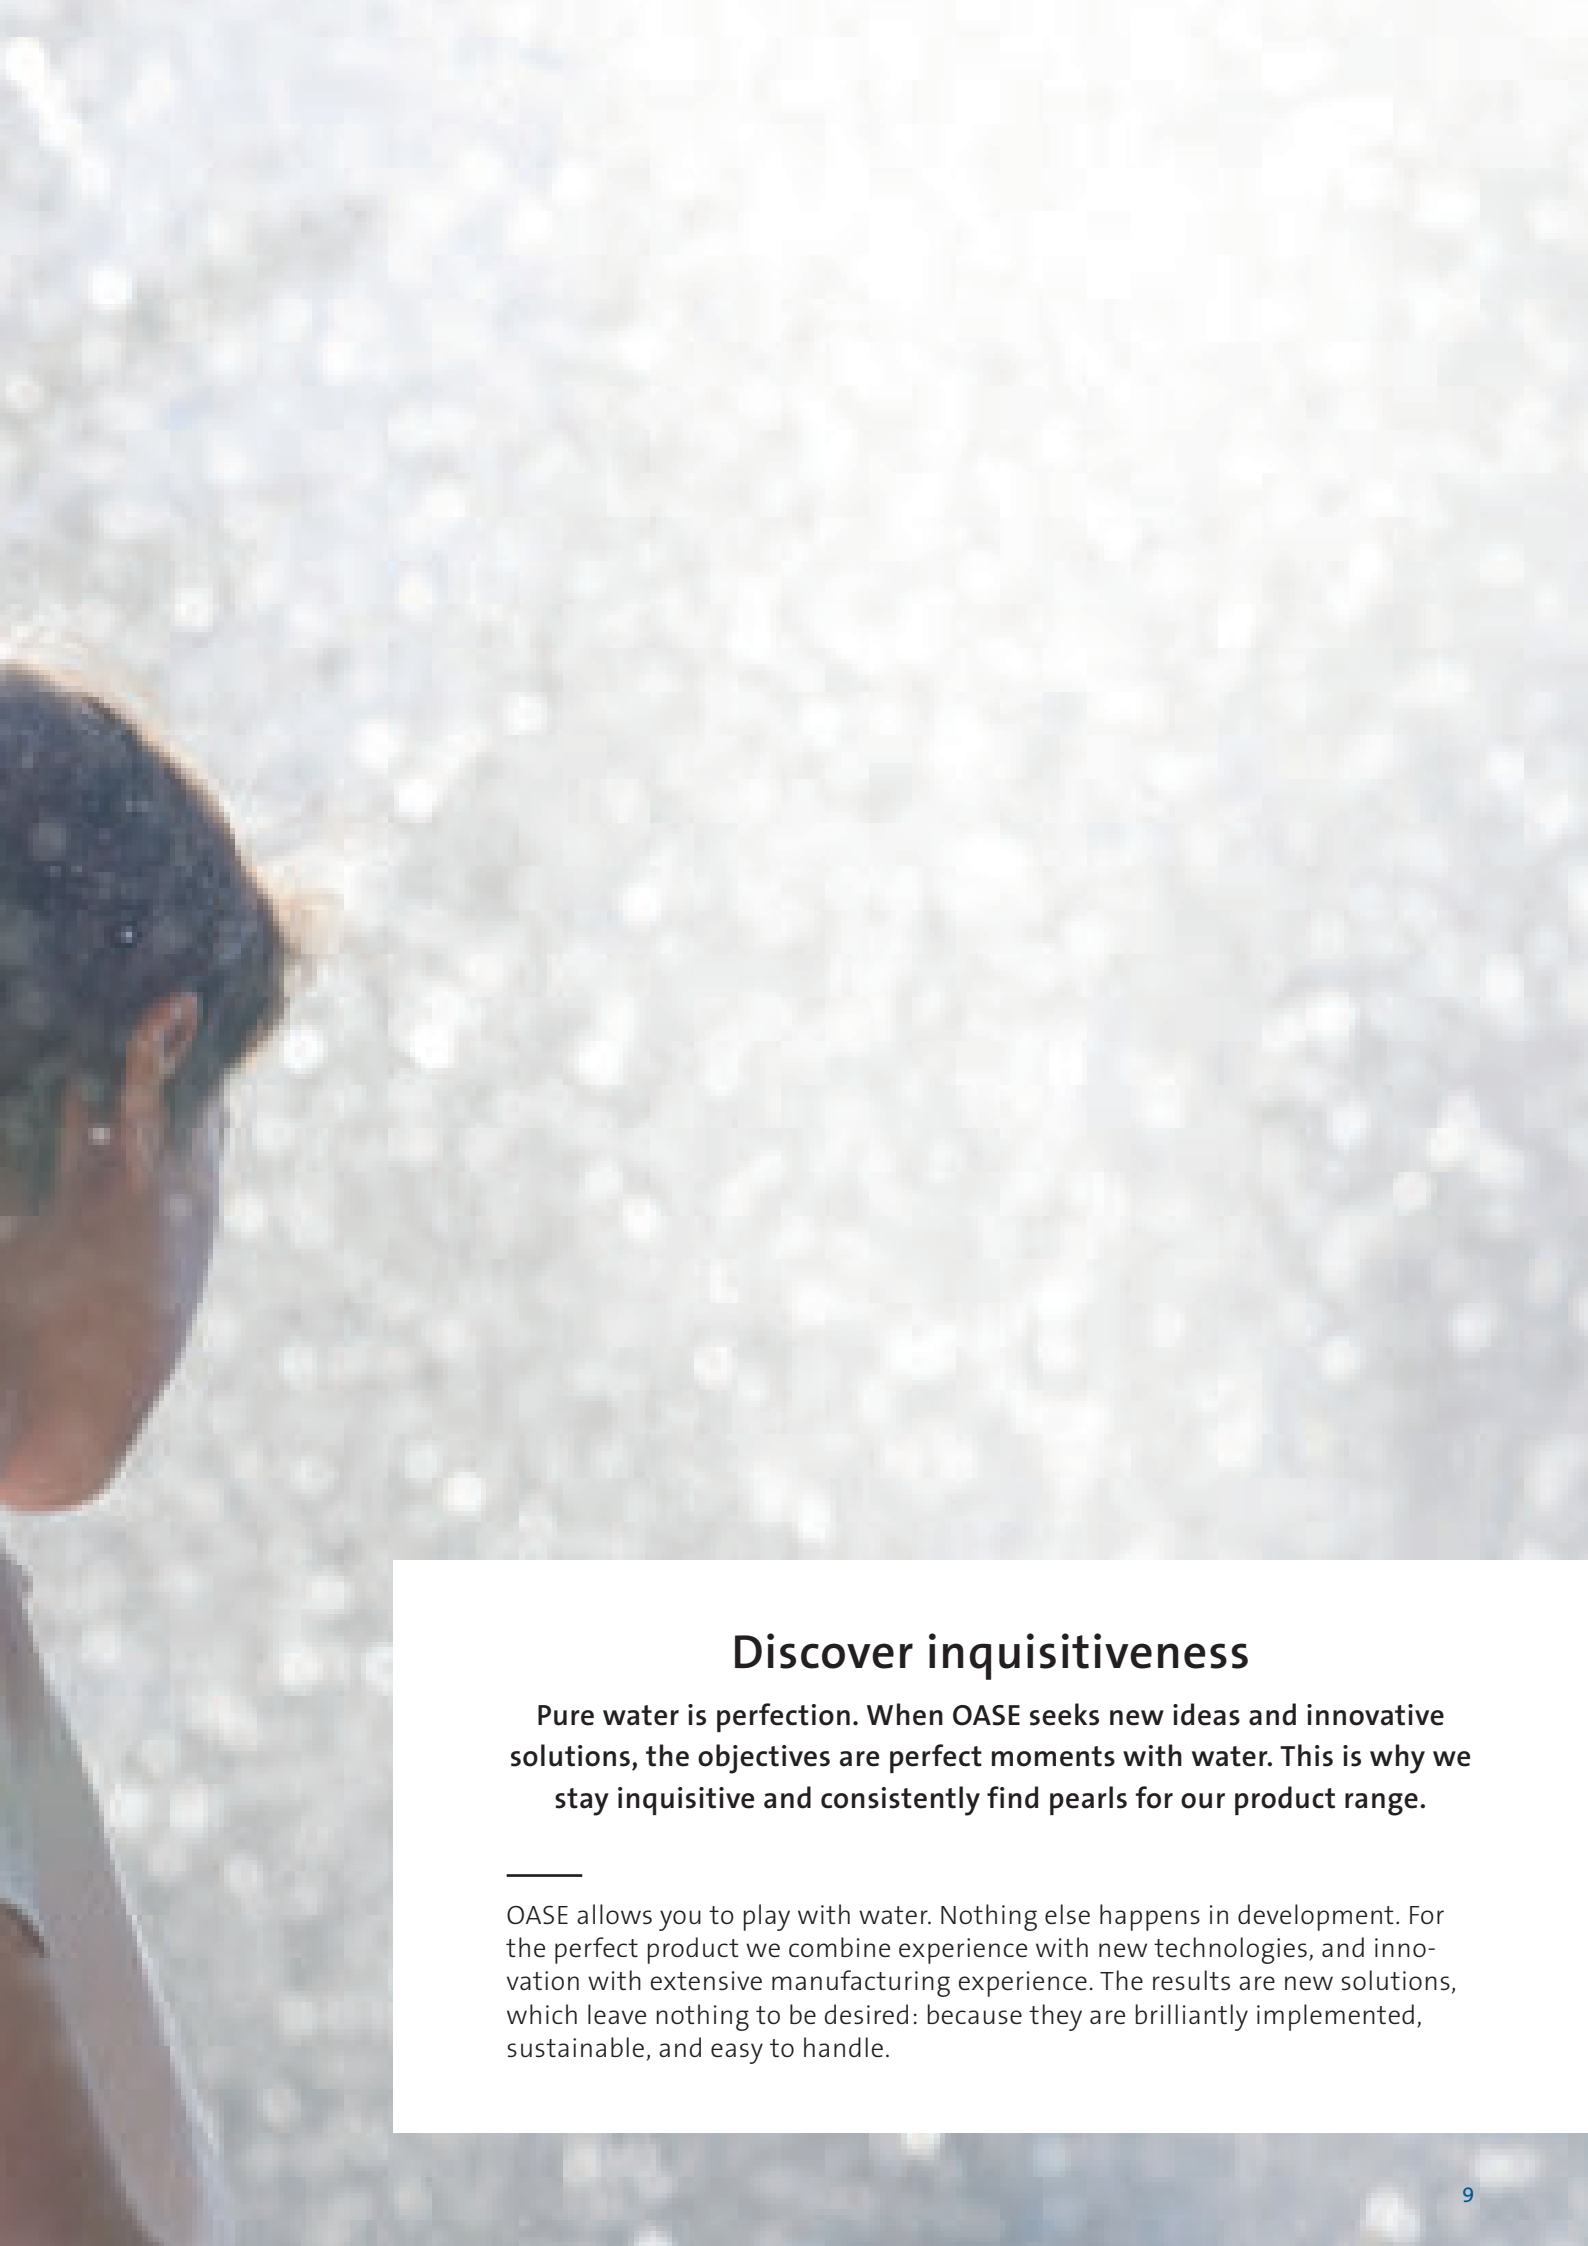

Quality is produced when people give their best.  
Garden enthusiasts, water designers, aquarists work at OASE.  
They develop products that they like to buy for themselves.  
This is our quality.

---

OASE products are high-quality products designed to make people happy, that provide design freedom and long-lasting satisfaction. This is why we make everything ourselves, critically measure the results, test the quality – and we do this again and again.

## Discover inquisitiveness

**Pure water is perfection. When OASE seeks new ideas and innovative solutions, the objectives are perfect moments with water. This is why we stay inquisitive and consistently find pearls for our product range.**

---

OASE allows you to play with water. Nothing else happens in development. For the perfect product we combine experience with new technologies, and innovation with extensive manufacturing experience. The results are new solutions, which leave nothing to be desired: because they are brilliantly implemented, sustainable, and easy to handle.

## Discover biOrb

The beauty of an underwater world is not something to be separate from the aquarium itself. On the contrary, aesthetic details can enhance your fish keeping experience. Today, technology is far from being cold and unemotional. This is particularly true for biOrb.

---

biOrb brings nature into your home. Beyond water, you can now experience the fascination of tropical plants with a biOrb AIR. Today we offer features for your home: inspired by nature and our customers.

## How and when it started

**We exist because we couldn't find the products we were dreaming about.  
So we made them.**

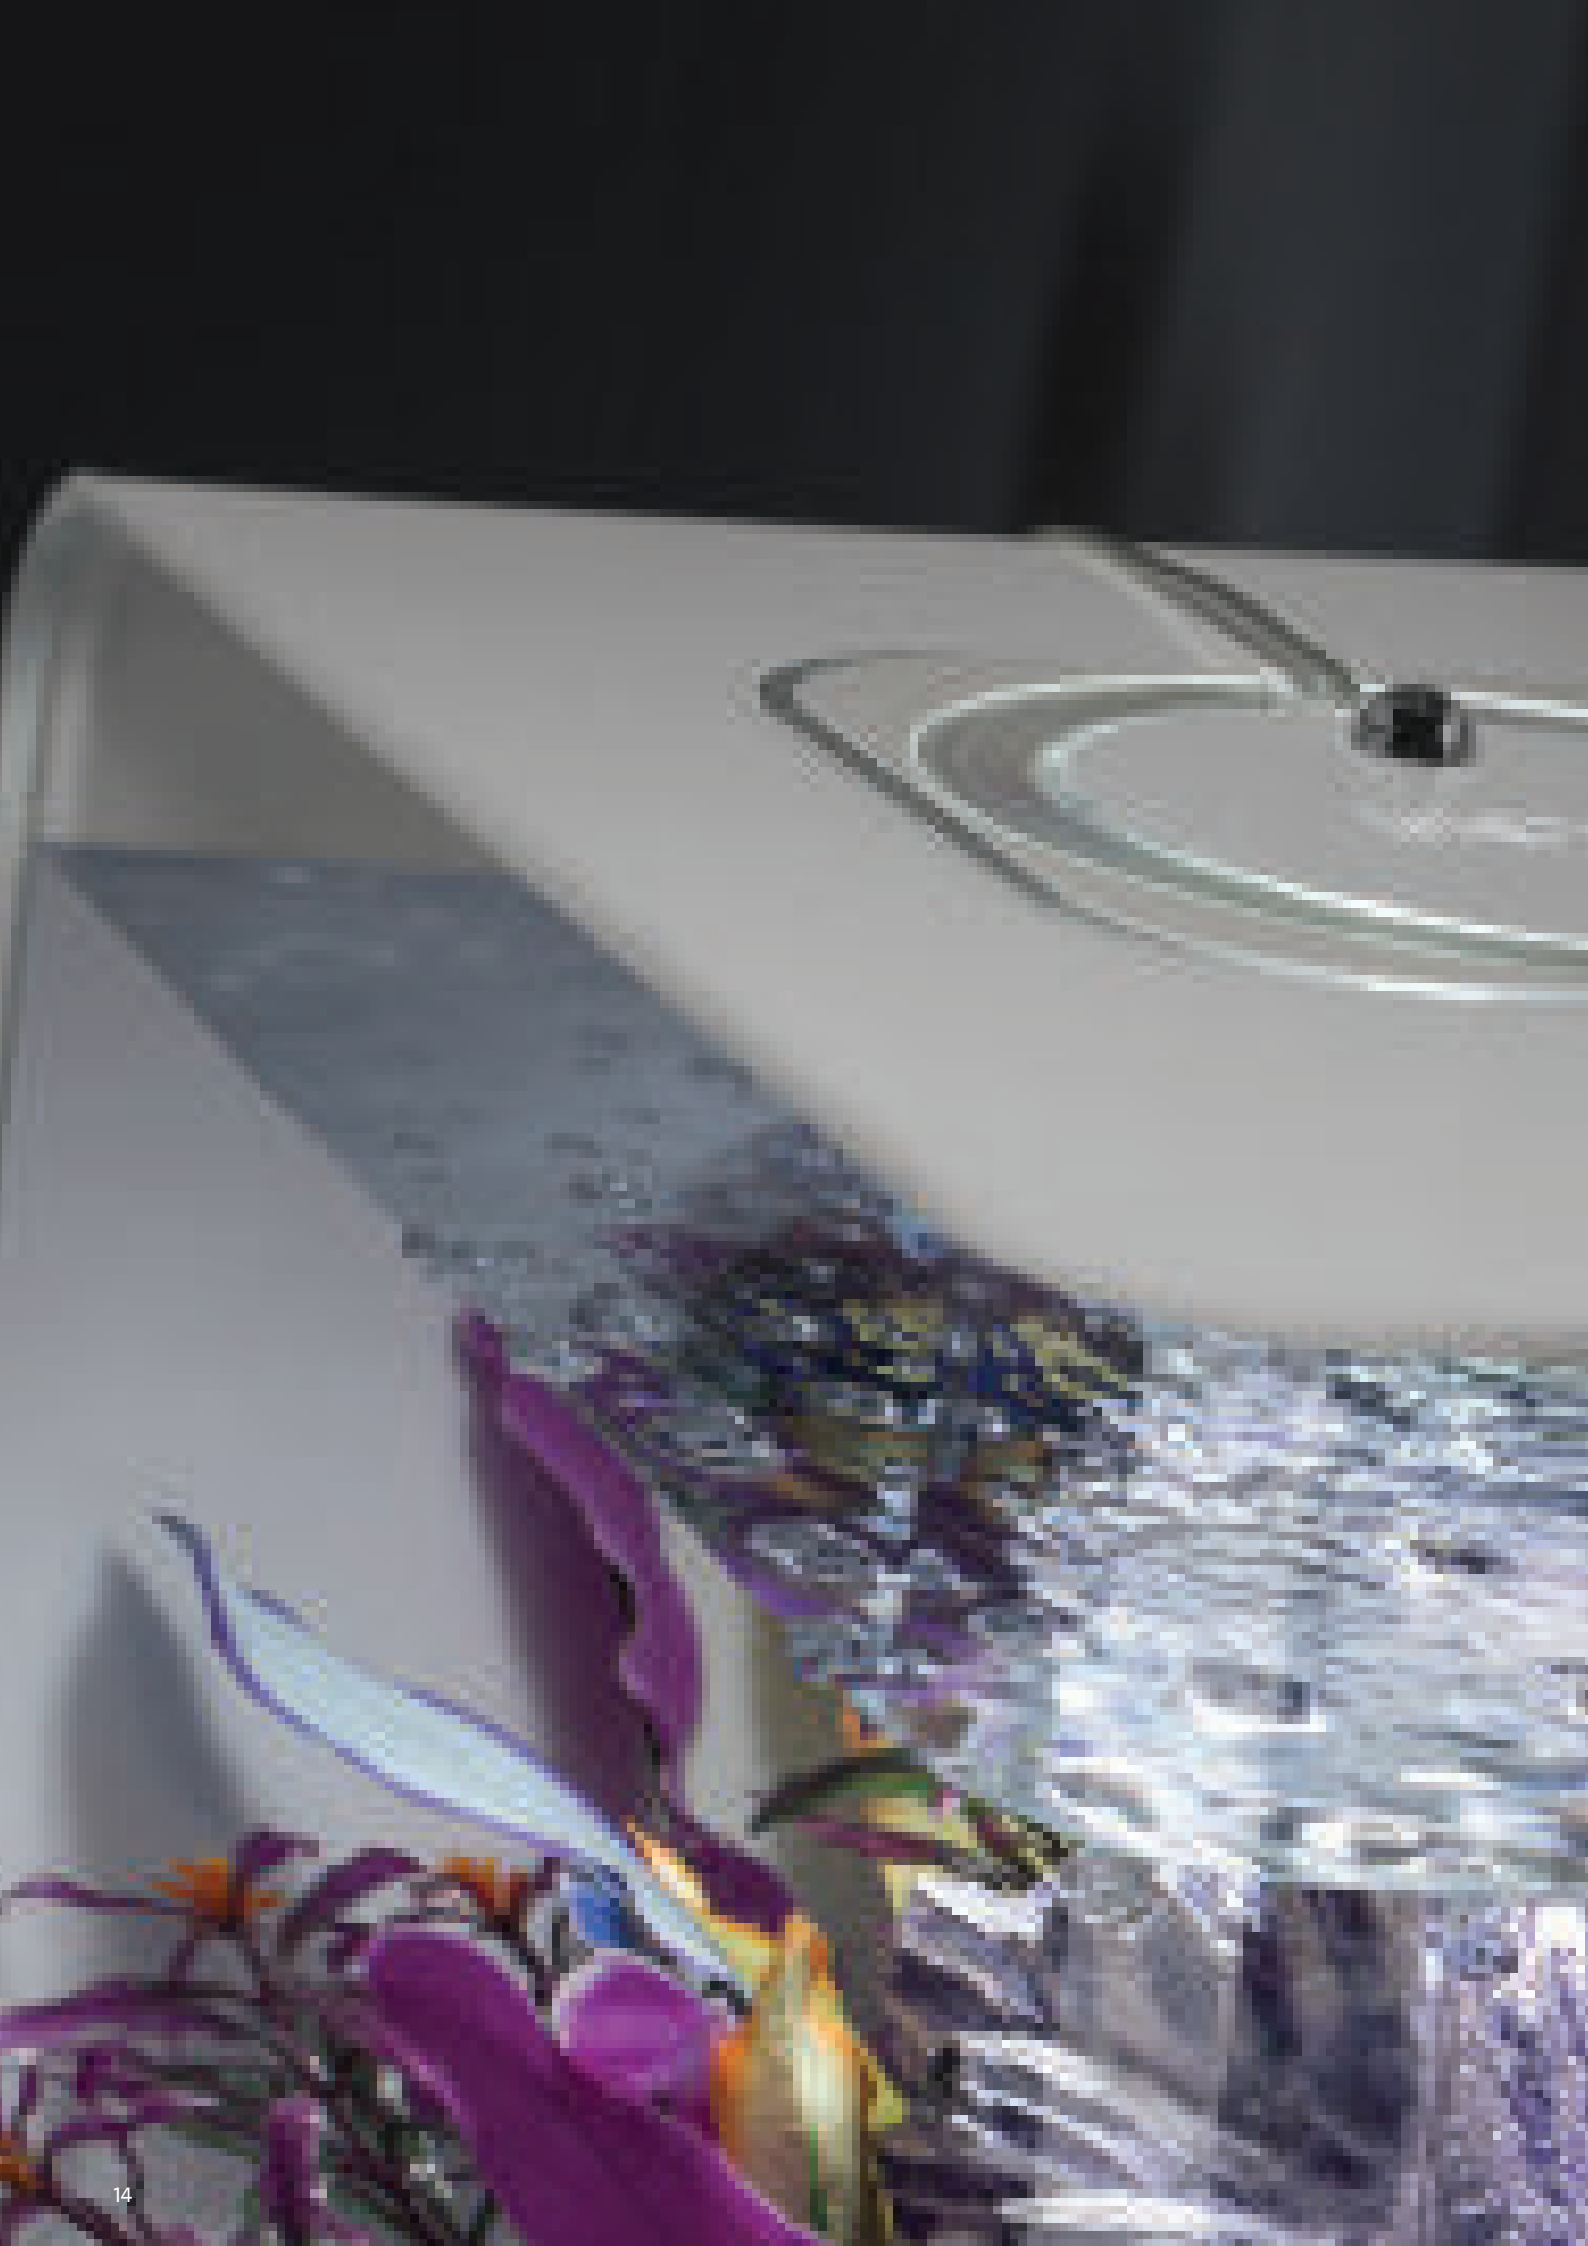

---

It's 1999, two years before the first iPod launched. If you wanted an aquarium it had to be a glass box, there was simply no other option.

We didn't want a glass box so we designed an aquarium we wanted to own. It had to be simple. We thought about the needs of the fish and the needs of the owner. The fundamentals had to be right.

We threw away the rule book and started with a blank sheet of paper. The result is an aquarium where everything is integrated into one design instead of many component parts. Back then, we had a fully working prototype but like all start-ups, no orders. Not one.

Everyone we showed it to really liked it, and yet we were told "The aquatics industry doesn't need a design-engineered aquarium".

## From then ...

**Who cares about a cold Thursday in October?**

---

We do. Thursday 19th October 2000. It was a big day for us. That was the day we got our first order. At last, someone believed in us. We began working day and night until we completed biOrb order number one. Then the phone started ringing and more orders followed. Our ideas were becoming real.

## ... Till now

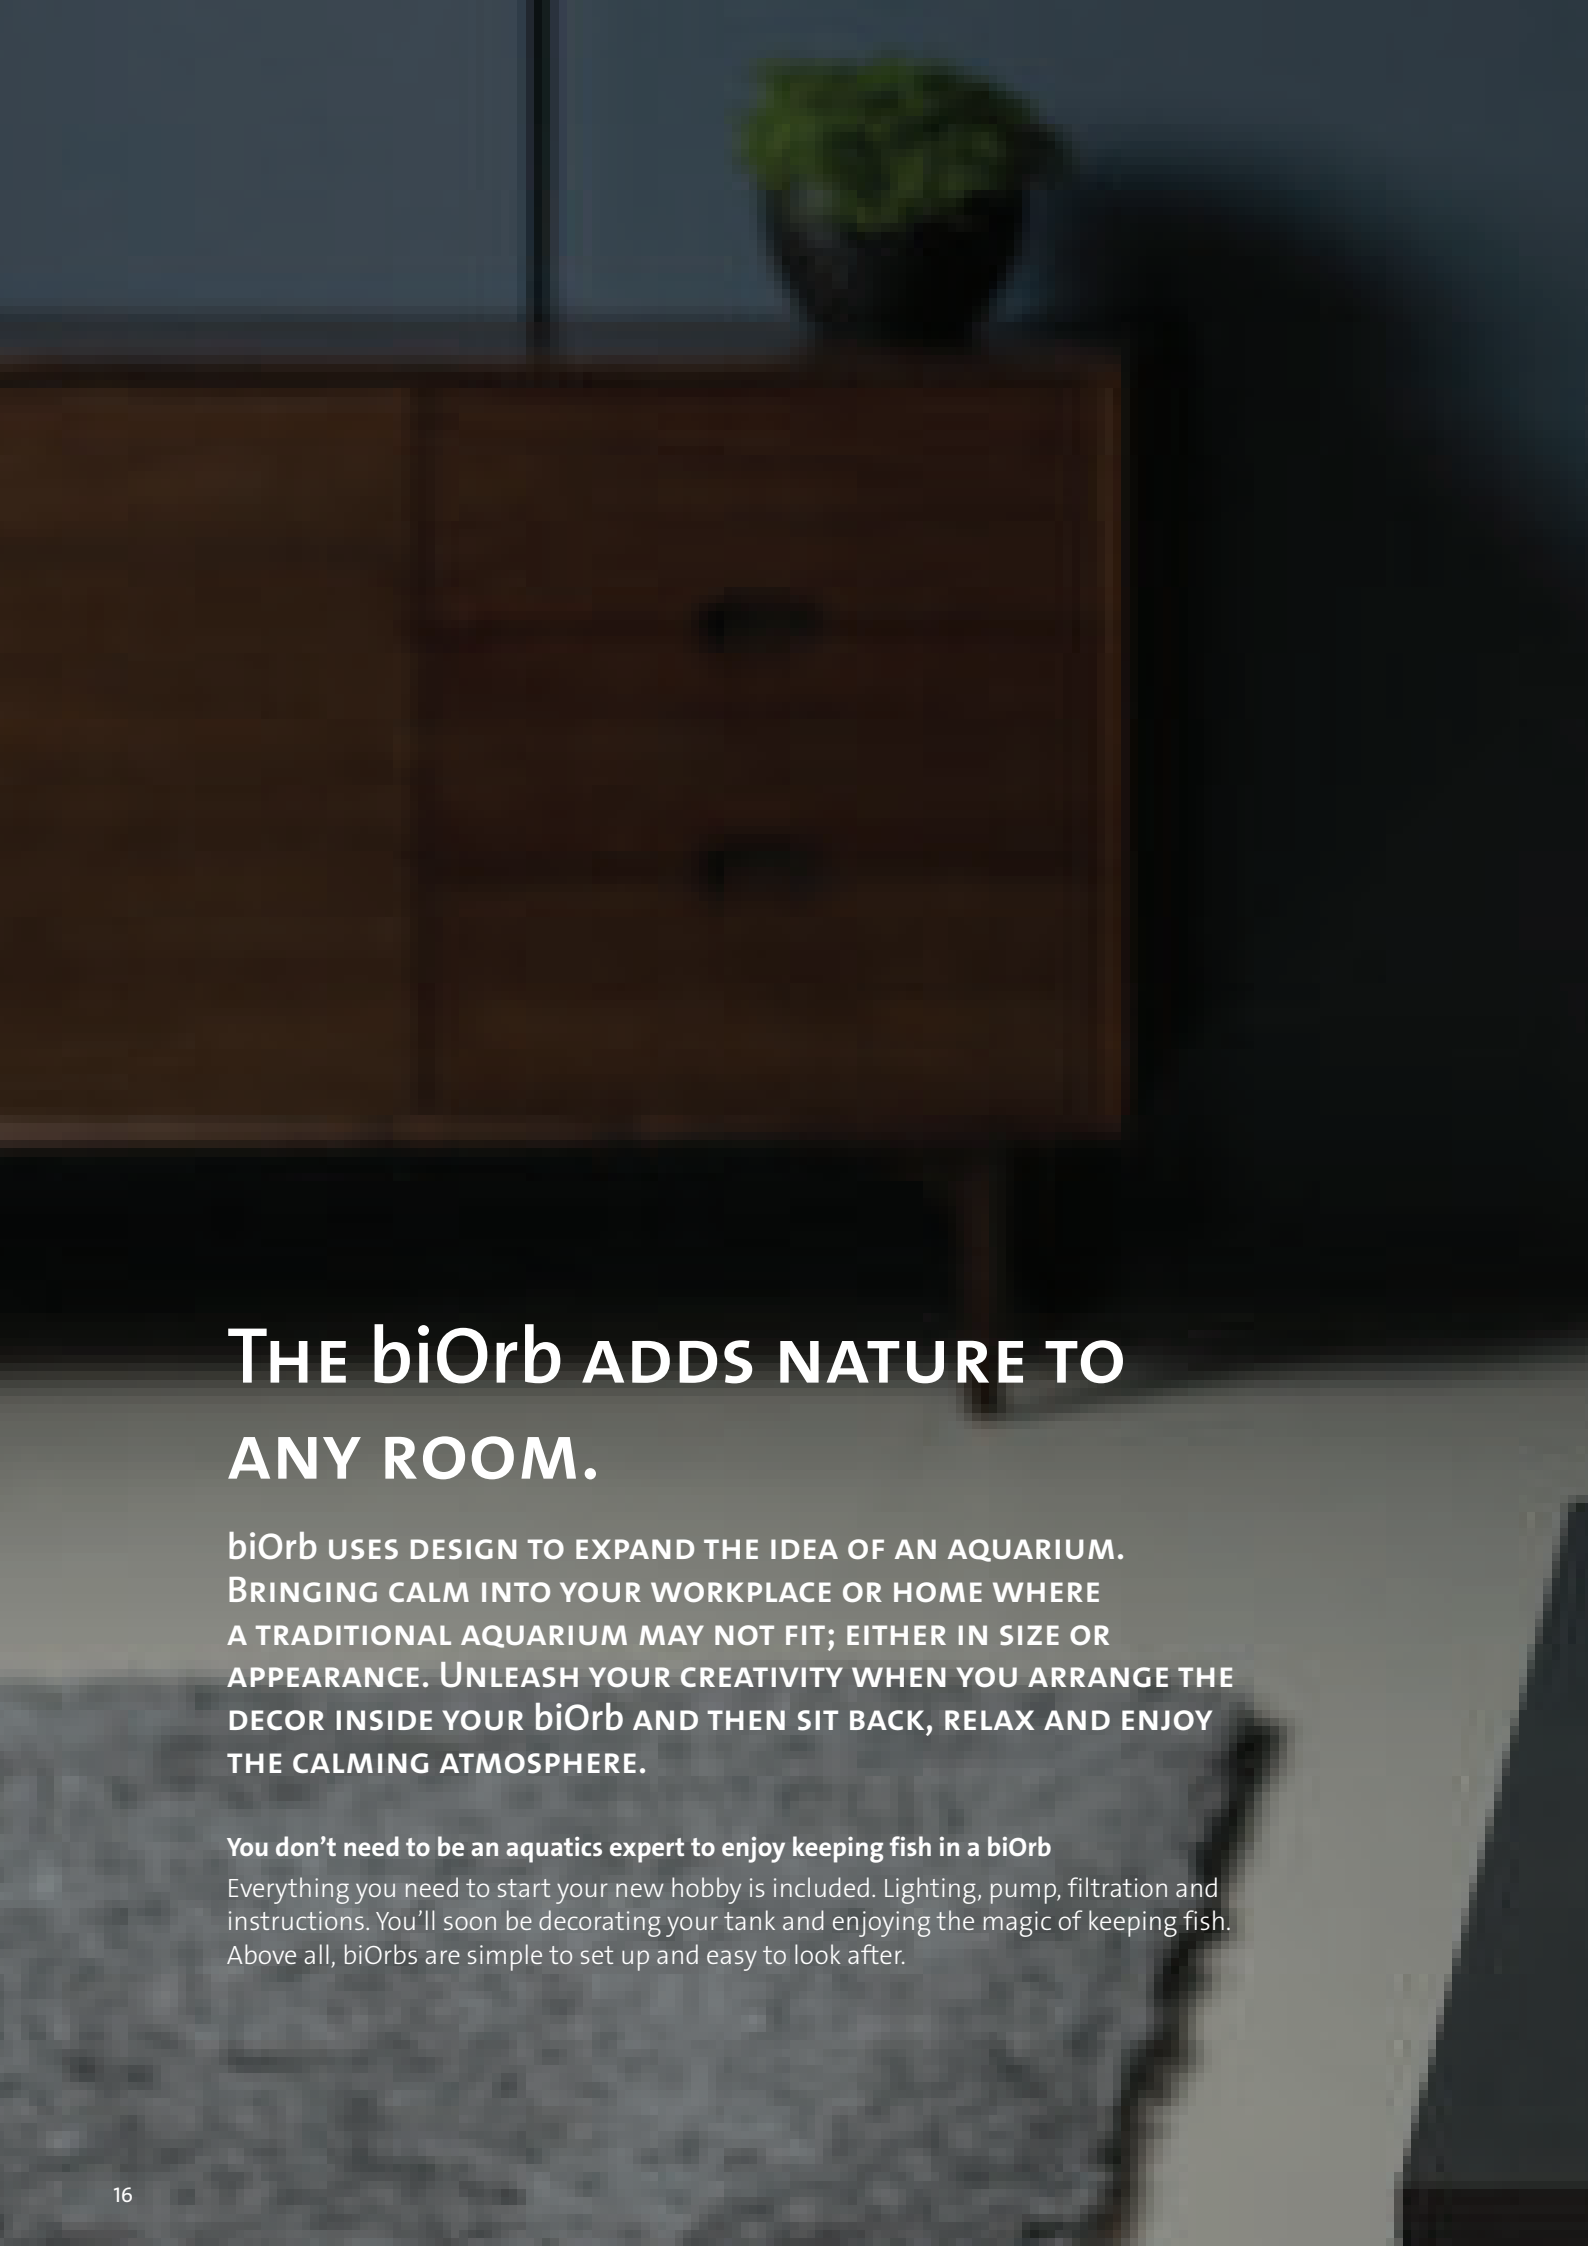

**Fast forward to today.**

---

Over the years, we've grown and right now over 1,000,000 people enjoy keeping fish with a biOrb.

We're bigger now, but we still chase ideas. We still dream about products and we're still true to our pioneering roots. We believe improvements and breakthroughs only come by having ideas, asking questions and testing.

At heart, we're still dreamers.

## THE biOrb ADDS NATURE TO ANY ROOM.

biOrb USES DESIGN TO EXPAND THE IDEA OF AN AQUARIUM. BRINGING CALM INTO YOUR WORKPLACE OR HOME WHERE A TRADITIONAL AQUARIUM MAY NOT FIT; EITHER IN SIZE OR APPEARANCE. UNLEASH YOUR CREATIVITY WHEN YOU ARRANGE THE DECOR INSIDE YOUR biOrb AND THEN SIT BACK, RELAX AND ENJOY THE CALMING ATMOSPHERE.

**You don't need to be an aquatics expert to enjoy keeping fish in a biOrb**

Everything you need to start your new hobby is included. Lighting, pump, filtration and instructions. You'll soon be decorating your tank and enjoying the magic of keeping fish. Above all, biOrbs are simple to set up and easy to look after.

# INTRODUCING BIORB EARTH: THE FIRST AND ONLY VIVARIUM THAT'S AS BEAUTIFUL AS THE ANIMALS YOU KEEP IN IT

## BRING THEIR WORLD INTO YOURS

The stylish, contemporary biOrb EARTH is the perfect centrepiece for any room... even before you look inside to be transported to join your animals in their natural environment.

\*Available late 2021

# How does it work?

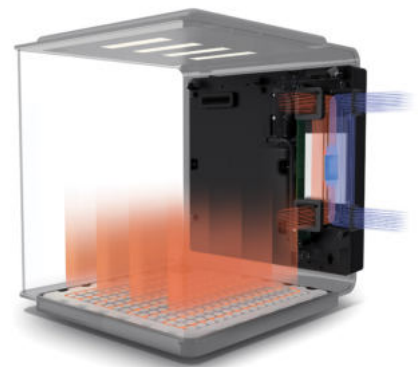

## Air filters

Fresh air enters the EARTH from a fan drawing it through an activated carbon pre-filter to keep it pure and free from any contaminants, such as aerosols ...

... this new air displaces some from within the tank which is exhausted through activated carbon filters in the lid's wings.

## Authentic 3D temperature gradients

On biOrb EARTH's floor, a substrate heater cable maintains ground temperature. Mounted at the rear of the tank is a temperature control unit (patent pending). Using a solid-state Peltier and fans, air is constantly recirculated within the tank – heating and cooling as required.

## The humidity your animal expects

biOrb EARTH's ultrasonic mister (A) is built in with its own dedicated fan and tank hidden at the rear.

What's more, there are also twin integrated, directional nozzles (B) to create rain inside your biOrb EARTH.

Two sensors (C).

## The closest to real sunlight in any vivarium

Sunlike LEDs are manufactured in a unique way to make them the closest to real sunlight of any light available. Includes UVA, UVB and Infrared.

# Total control with the EARTH app

Every aspect of biOrb EARTH's internal environment is set using the EARTH app. Temperature, humidity, daylight hours, etc can all be set for individual seasons or for the entire year.

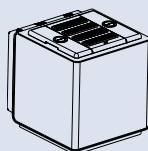

## Automatically controlled climate

Simply choose the preset climate zone appropriate for your animal, Equatorial, Temperate or Arid. Then select the correct regional sub-climate for the species or create your own climate profile.

Once set, the biOrb EARTH automatically controls the climate, giving your animal living conditions that replicate nature all year round.

**COMING  
SOON\***

**INTRODUCING A NEW WAY  
TO ENHANCE ANY SPACE  
BIOORB AIR 30**

\*Available second quarter - 2022

# biOrb AIR 30

Today's world of sprawling cities, time spent in cars and buildings all isolates us from nature.

Simply gazing into a world of wonder in your biOrb AIR immediately reconnects you with the living world. It's a place for your mind to escape.

There is a theory called 'Biophilia'. It suggests we all have an innate, deep rooted desire to connect with nature. And research has shown a strong connection to nature can positively affect our mood.

If you think all this sounds like nonsense, remember hospitals have long used gardens to speed up the healing process. And of course it's not just you who benefits ... everyone who sees your biOrb AIR will experience the same blissful meditation.

# How does it work? AIR 30

An easy way to grow plants indoors. Either tropical, moderate or semi-arid.

Controls lighting, humidity and air movement, creating the perfect growing environment for healthy plants

## THREE COLOURS. THREE MODES. A MILLION POSSIBILITIES.

### ***Tropical climate***

For keeping tropical plants that like high humidity.

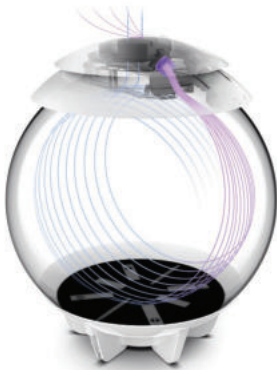

### ***Semi-Arid climate***

For keeping Cacti and succulents.

### ***Medium climate***

A medium setting for keeping temperate plants.

### ***Clean air system***

Prevents stagnation and condensation by drawing in fresh air, circulating then returning through a replaceable carbon filter.

### ***Capillary matting***

Draws water up into the coir compost, constantly hydrating without overwatering.

### ***Needs no daylight***

The LED lighting automatically provides all the light plants need to thrive.

### ***Water level indicator***

Discreet and easy to read indicator for checking the level of water in the base.

### ***Automatic humidity***

Triggered automatically when humidity drops. A gentle mist hydrates the plants right down to the roots.

### Remote control

Easy to use. Set-up the terrarium at the touch of a button.

**77668**  
Filter cartridge

**77669**  
Coir brick

**85240**  
Arid substrate

### biOrb AIR 30 MAINTENANCE

## PRODUCT DETAILS

### *Fish waste sinks*

All biOrbs have a filter\* at the bottom of the aquarium. It's where the waste naturally settles. Put simply, the filter works where there is most to filter.

### *Made from acrylic. Here's why*

Acrylic is incredibly strong. In fact, it's used in aeroplane windscreens. It's also very clear, with a transparency rate of 93% it is the clearest material known.

Another benefit of acrylic is insulation. It has very little heat loss and so minimal energy is needed for heating your biOrb.

\*Patented in Great Britain

## Features

- *All-in-one kit. Everything you need to start your aquarium is included.*
- *Available with Standard or MCR*
- *Choose from White or Black.*

## CHANGE THE ATMOSPHERE OF YOUR ROOM WITH THE TOUCH OF A BUTTON.

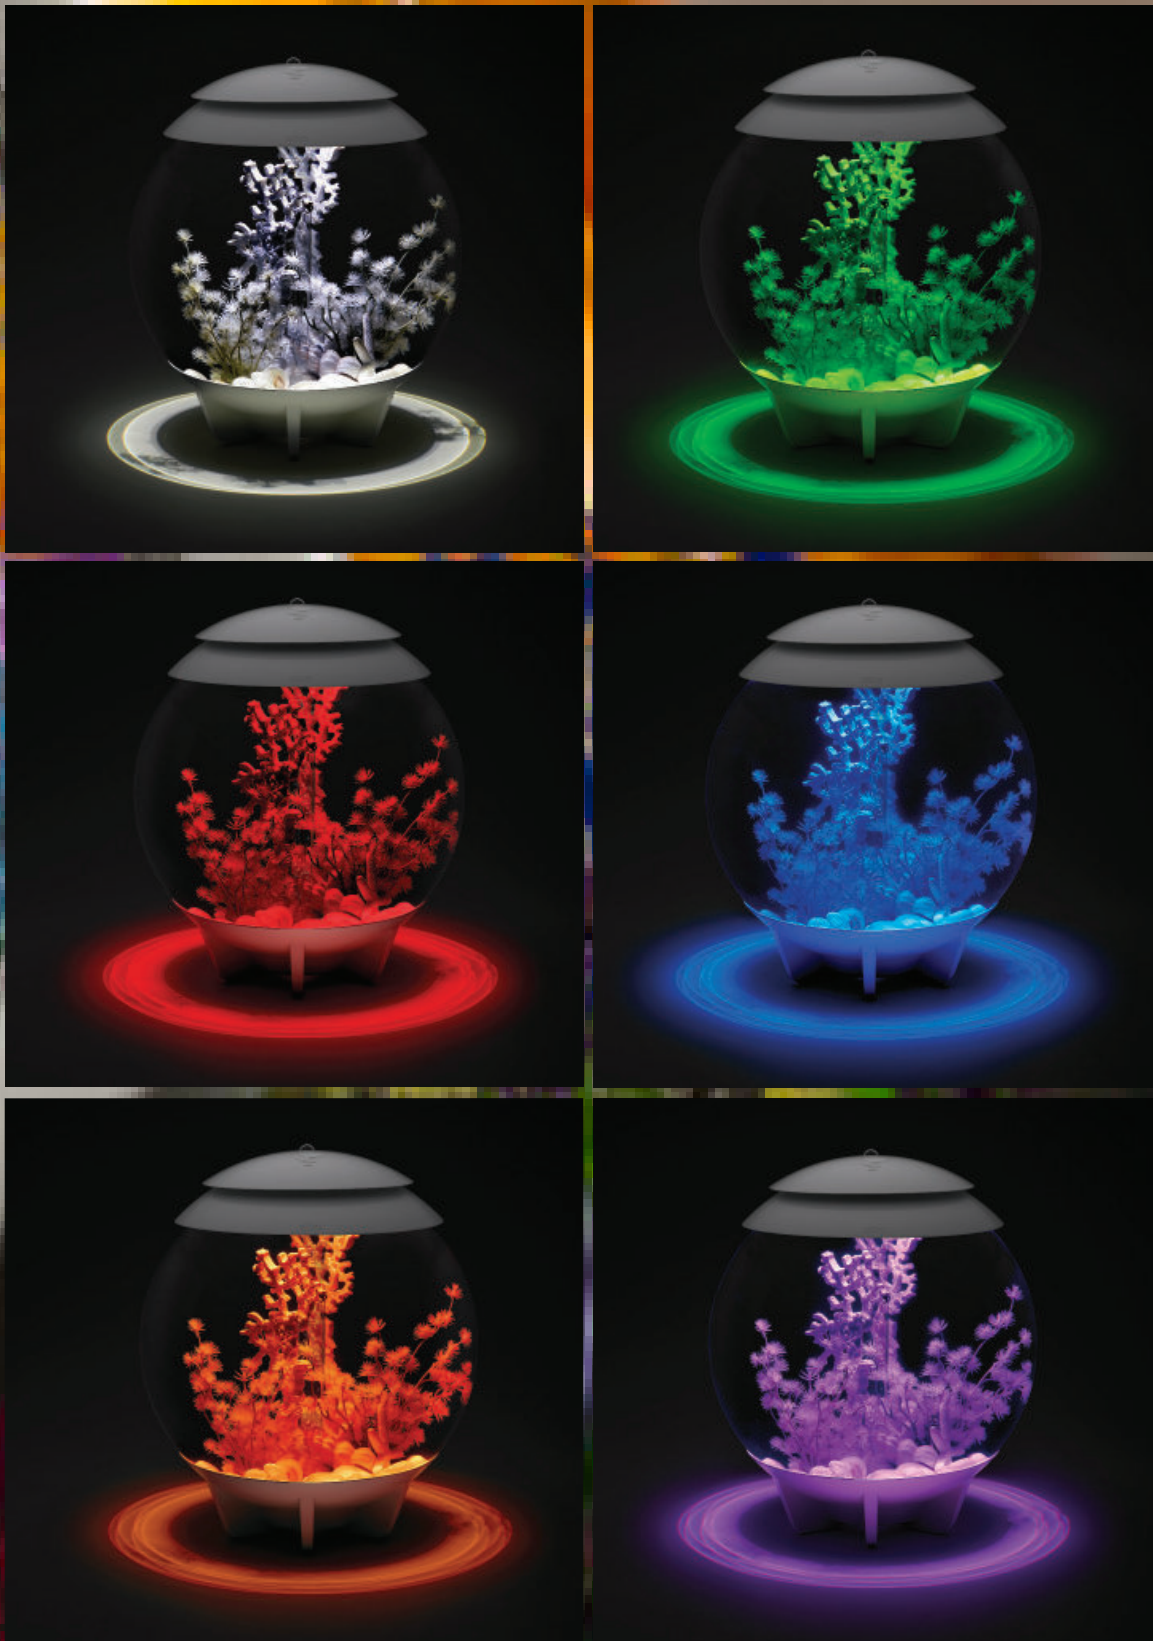

Play with colour. Change the brightness. You can even set an automatic day and night light cycle.\*

The MCR light will change how you experience your biOrb. Choose from 16 pre-set colours and control the brightness. There's a setting to suit every mood and add to your sense of well-being.

\* Automatic day and night light cycle not available on HALO 15

Remote control for MCR lighting

**FEATURE AVAILABLE ON ALL MODELS.**

The MCR light is an option on all biOrb models.  
Please note that the MCR light is built-in to the biOrb HALO MCR models.

# Inside your biOrb

*Insert tray  
(available in white or black)*

*MCR light large*

*Light tray*

*Bubble tube*

*Filter cartridge*

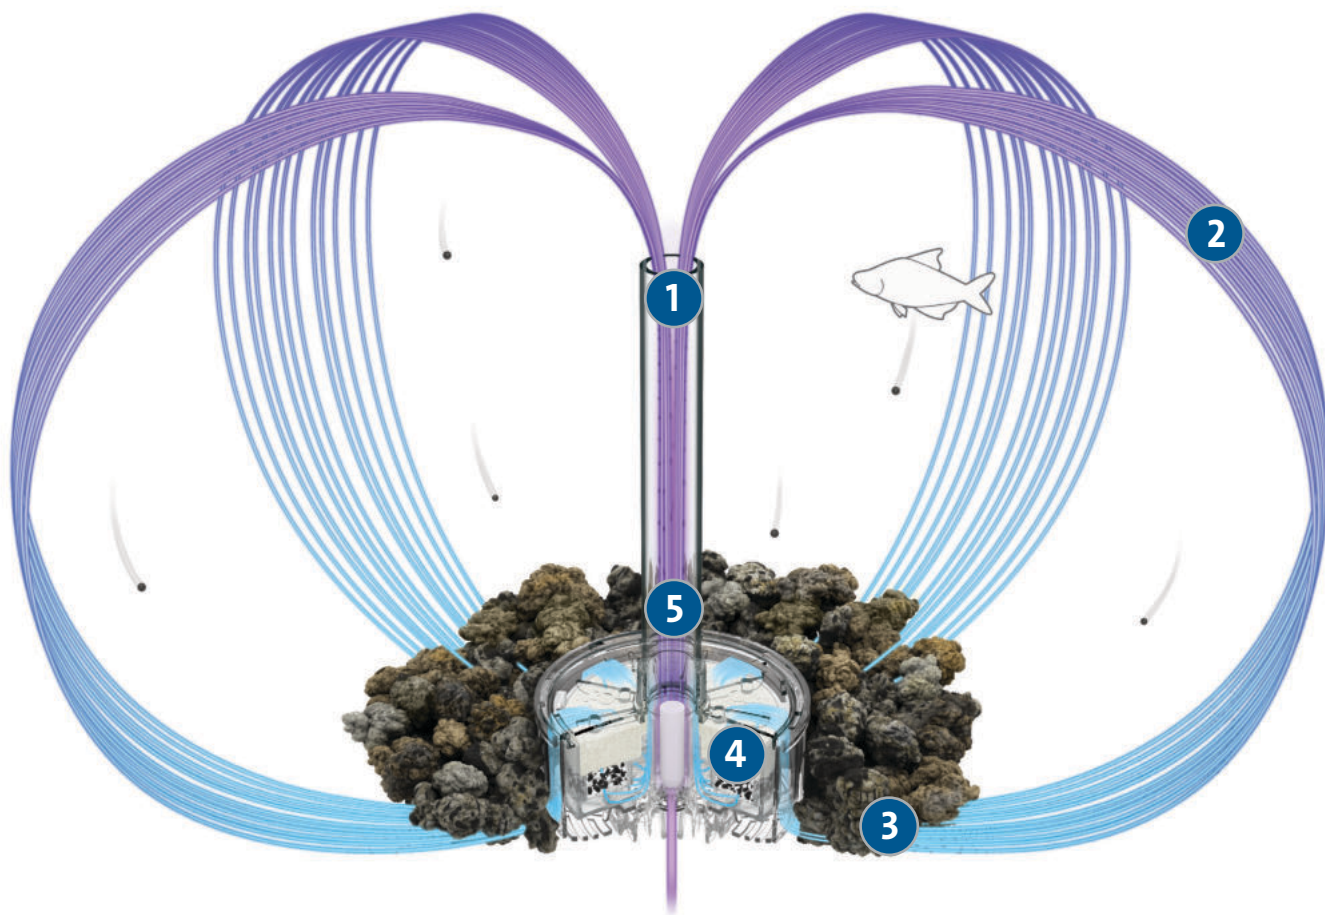

*Air stone*

*Filter body*

# Here's how the filtration works

1. Air driven filtration system creates vigorous water flow and a constantly changing water surface. This maintains oxygen saturation.
2. The circular flow of water then collects any fish waste on its way down.
3. It draws the waste through the ceramic media where the natural biological filtration absorbs some toxins. The freshly oxygenated water also feeds the bacteria.
4. Any remaining waste is trapped in the sponge cartridge. The water then passes through resin particles and natural stabilisers to remove toxic substances and keep the pH levels constant.
5. The clean water is then oxygenated as it flows back up the bubble tube to repeat the cycle.

# biOrb CUBE

**“IT IS A BEAUTIFUL CENTREPIECE  
TO MY ROOM”**

A new approach to a traditional shape. The biOrb CUBE has clean lines and provides you with an open space for aquascaping. Set your creativity free inside this well-proportioned aquarium. It will frame your underwater creation perfectly.

# biOrb HALO

**“IT’S VERY STYLISH AND ADDS TO THE ROOM;  
LOVE THE CHANGING LIGHTS AND DECOR”**

The biOrb HALO has a hidden water line that makes your underwater view appear suspended in space. The simplicity of the curved design creates an appearance of lightness and neatly houses the lights, filter and airline.

*Inspiration for this aquarium*

## PRODUCT DETAILS

### *Fish waste sinks*

All biOrbs have a filter at the bottom of the aquarium. It's where the waste naturally settles. Put simply, the filter works where there is most to filter.

### *Made from acrylic. Here's why*

Acrylic is incredibly strong. In fact, it's used in aeroplane windscreens. It's also very clear, with a transparency rate of 93% it is the clearest material known.

Another benefit of acrylic is insulation. It has very little heat loss and so minimal energy is needed for heating your biOrb.

## Features

- *All-in-one kit. Everything you need to start your aquarium is included.*
- *Available with Standard or MCR.*
- *Choose from White or Grey.*

**“IT ADDS TO THE BEAUTY OF THE  
PLANTS, AND TO THE ROOM IN  
WHICH IT’S PLACED”**

## **biOrb AIR 60**

**NATURE ISN’T JUST BEAUTIFUL, EVEN IN SMALL  
DOSES IT CHANGES THE WAY WE FEEL.**

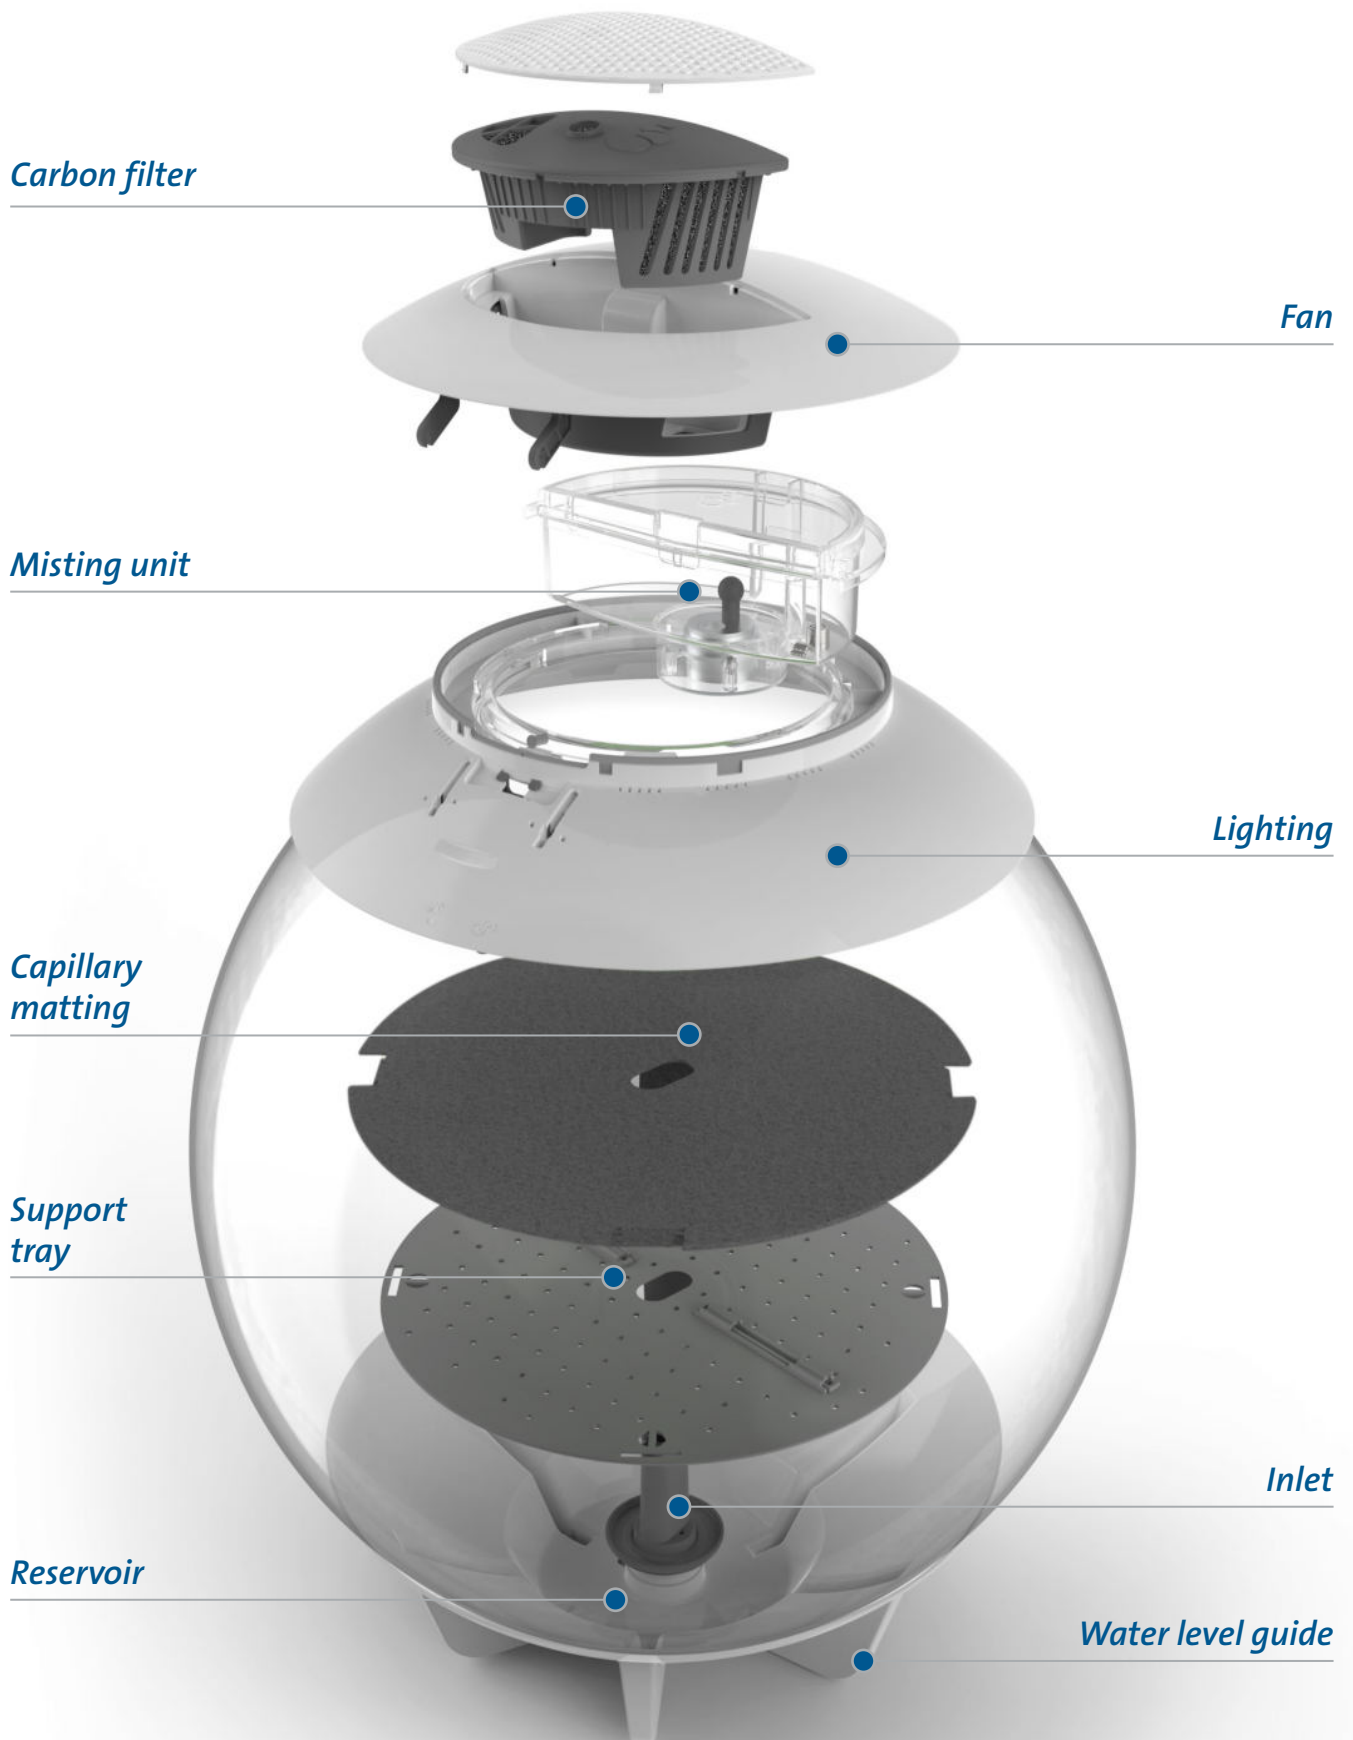

**Say hello to biOrb AIR.**

An intelligent terrarium for growing tropical plants in your home. It automatically takes control of lighting and humidity, providing everything your plants need to thrive.

Now you can enjoy the feel-good benefits of being close to nature in your own home, even in a room without any natural daylight.

# Inside your biOrb AIR 60

## How does it work?

- 1 The biOrb AIR uses sterilized coir compost as the growth media to cultivate your plants roots. The coir compost is placed on top of a capillary mat which gently draws water up to it from a small water reservoir in the base.
- 2 Natural daylight is not necessary. The LED lighting is arranged in a circular pattern at the top of the sphere. They emit the perfect light output for encouraging natural growth and prevents plants bending towards a single light source. Plus, the light also works on an automatic 24 hour cycle, simulating sunrise, daylight, sunset and night time.
- 3 To discourage stagnation and condensation a constantly running fan recycles air through a replaceable carbon filter. A small amount of fresh air is regularly introduced as part of this circulation process.
- 4 To maintain the humidity within the micro-climate, water is added using an ultrasonic mister mounted in the top water reservoir.

## PRODUCT DETAILS

### *Automatic humidity*

Automatically triggered when the humidity drops below a pre-set level. Plants are moistened to the roots with a light spray.

### *LED lighting*

With an automatic day-night cycle to give your plants as much light as they need.

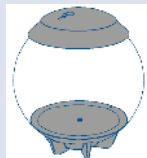

### *Easy-read gauge*

Discreet and easy-to-read indicator for checking the water level in the base.

## Features

- *An automated terrarium that offers hassle-free plant care.*
- *Can be filled with hard-to-maintain exotic plants.*
- *Now you can feel the benefit of seeing the natural world, indoors.*

## Set your creativity free

Discover the detailed range of sculptures designed by Samuel Baker, exclusively for biOrb. Samuel explores the natural world to gain inspiration for his sculptures and has worked with biOrb for more than 10 years. He has created over fifty designs for you to choose from. Make your biOrb an object of desire by mixing your choice of sculptures and plants. After all, your biOrb should be as individual as you are.

# INSPIRED BY NATURE

*When you see a landscape, you experience many different elements.*

*Each of those elements are an abstract landscape in themselves. They're different textures and different forms. They're all unique. This is the inspiration for the Samuel Baker range of biOrb sculptures.*

## **Creating Worlds**

*In nature, every texture and every small detail is an opportunity to create impressions. The designs are an organic process.*

*It starts with an idea and by bringing in found elements, slowly a form starts to grow.*

*The result is a re-creation of nature where the details all come together, creating mini worlds that come to life.*

*Watch a film about Samuel Baker's creative process at [www.youtube.com/biorbtv](http://www.youtube.com/biorbtv)*

# GUARANTEE

OASE GmbH offers a manufacturer's guarantee under the conditions specified below; the respective duration of the manufacturer's guarantee is marked based on the product. The guarantee period is also provided in text form with the product. The term of the respective guarantee period starts with the first-time purchase of the new product from the authorised OASE dealer. If the product is resold, the guarantee period does not start over again. The guarantee period is neither extended nor restarted through guarantee performances, nor do legal warranty claims arise on guarantee performances. If the guarantee is not expressly specified, then OASE provides a guarantee in the scope cited below: The prerequisite for claiming any guarantee from OASE, including the extension guarantee, is that the customer must have properly and exclusively installed original OASE spare parts when replacing parts, or for a repair or for any kind of improvement. If products from third-party manufacturers are installed, any OASE guarantee is rendered null and void.

At our discretion we provide a guarantee through free-of-charge repair or free-of-charge delivery of original spare parts, or of an equivalent replacement device. If the type in question should no longer be manufactured, we reserve the right, at our discretion, to deliver a replacement device from our product range that most nearly approaches the type that was the object of the complaint. Reimbursement of expenses for removal and installation, checking, claims for lost profit and compensation for damage, as well as reverse transaction claims are not included in the guarantee, likewise more extensive claims for compensation of losses, regardless of the type, that have been caused by the device and its

use, are not included in the guarantee. The guarantee only applies for the country in which the devices were purchased from an authorised OASE dealer.

According to these conditions German law with exclusion of the United Nations Convention on Contracts for the International Sale of Goods (CISG), applies for this guarantee. The legal rights of the purchaser, in particular arising from the warranty are not affected by this guarantee. Defects or damage due to faulty installation or operating error, as well as insufficient care or the use of unsuitable cleaning agents or neglected maintenance, non-intended use, damage, impact, the effects of freezing temperatures, etc., cutting of the plug, shortening the cable, limescale deposits or improper repair attempts, are not covered by the guarantee. In this respect, relative to the intended use, we refer to the operating instructions; compliance with the operating instructions is the basic prerequisite for any claim arising from the guarantee. Wear parts, e.g. bulbs, etc. are expressly not a component of the guarantee; wear parts are specified in the operating instructions of the products. If there is a guarantee claim, please contact the OASE dealer, who sold the product to you. If this possibility does not exist, you can assert claims arising from the guarantee relative to OASE GmbH, Tecklenburger Str. 161, 48477 Hörstel, Germany, by sending to us the product that is the object of the complaint, carriage paid, and at your transport risk, with a copy of the original purchase receipt of the authorised OASE dealer, the original guarantee certificate, as well as written specification of the fault that is the object of the complaint.

A directory of authorised OASE dealers is provided at: [www.oase.com](http://www.oase.com)
