

About Us

Inspired by the movement of improving quality of life all over the world, the Maxgreenwall helps through increasing the amount of nature indoors.

The eye-catching Maxgreenwall creates a healthy, productive and pleasant indoor environment. With multiple designs and options available, you can easily bring the outdoors inside and **maximize your green life!**

The idea of the Maxgreenwall emerged via collaboration of Sempergreen and Parus Europe. This movable and user-friendly indoor living wall is an addition to a wide range of sustainable, healthy and green solutions.

'Promote healthier work environments'

Indoor nature contributes to an improvement in mental- and physical health.

It boosts productivity levels in the office and significantly reduces stress levels. Plants also purify the air and enhance indoor air quality.

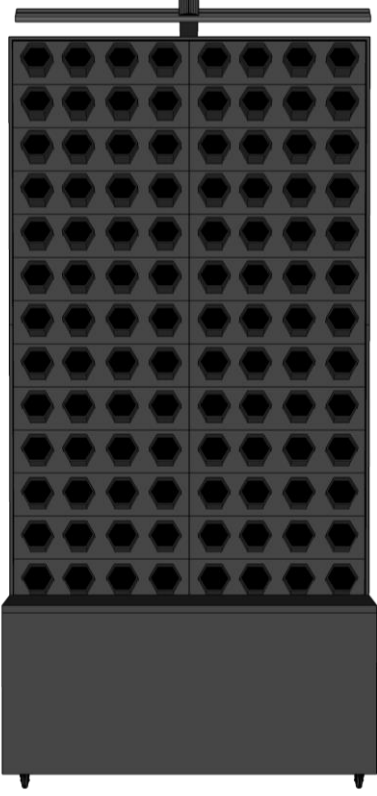

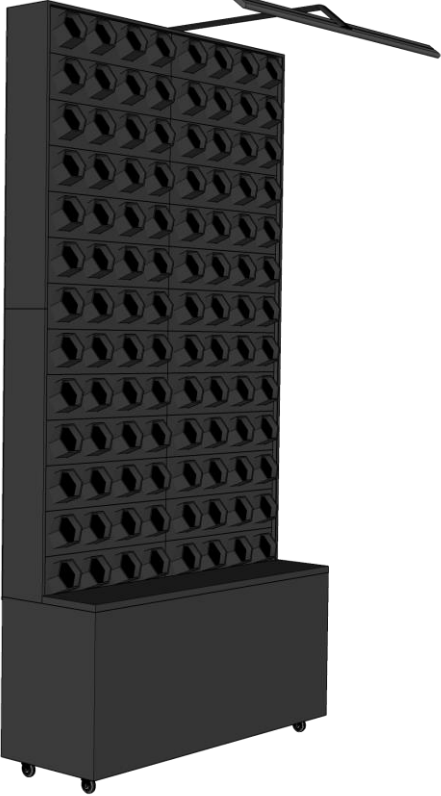

'Improve the acoustics'

Green walls reduce noise pollution, which is beneficial within the office and for a comfortable home environment. Moreover, a living indoor wall improves building aesthetics.

Due to its movability this green wall can easily be used as a room divider, making the Maxgreenwall stand out.

Maxgreenwall 360°

The Maxgreenwall in all its elegance. See for yourself.

System Features

Air circulation fan

The green wall contains a specialized system which circulates oxygen to effectively maintain the good condition of the greenery. The silent fan ensures the distribution of produced oxygen throughout your surroundings. By choosing for Maxgreenwall, you are choosing for an improved indoor climate!

Water reservoir

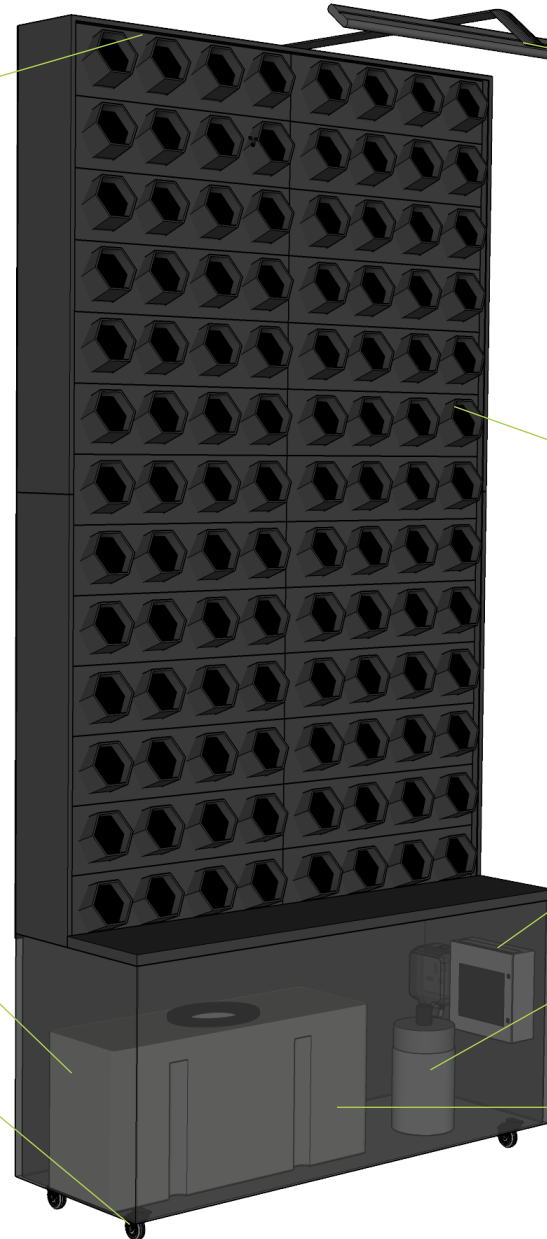

The Maxgreenwall can be installed in less than an hour and the automatic watering system only needs to be refilled every four weeks. The capillary method makes sure the plants get all the water they need.

Movable

This free-standing and movable living room divider gives you freedom to design spaces according to your own taste. The Maxgreenwall can easily be moved to other locations because of its wheels and low weight. The possibilities for your interior are endless!

LED grow light

A specially designed grow light is included to ensure that the plants remain in a good condition. This way, the Maxgreenwall can be installed everywhere in your interior, while maintaining the quality of the plants. Even in the darkest of places, this green wall will thrive!

104 plants

In total, 104 plants fit in this green wall.

Wi-Fi sensor

All technical aspects, such as the watering system and light activity, are accessible online via a mobile application.

Microfilter

The microfilter ensures a clean water flow through the system.

UV filter

Built-in UV filter for disinfecting the water.

Technical Specifications

The Maxgreenwall is one of a kind due to its movability and effortless maintenance. Not only does the living wall brighten up your private or business surroundings, it also improves health status and air quality. This living indoor wall is a sound investment because of its positive influences, movability and customizability. This vertical garden provides a great opportunity to install over 100 plants in your environment!

Link the wall!

This green wall is not only easy to move but can also be connected to other Maxgreenwalls in order to form a large living wall. Play around and create your ideal interior!

Plant Assortments

With three different assortments, including 5-8 types of plants and varying designs, we make sure there is plenty of choice!

To focus even more on natural air purification, we also created a plant assortment consisting solely of plants which are Air So Pure®.

We offer the possibility of ordering the Maxgreenwall without plants, so you can install your own.

Front Customization

We offer the possibility to add custom-made signs to the front of the Maxgreenwall. A great way to showcase your brand or give your visitors a warm welcome!

The signs are easy to install and adjust to your preference. The size, font and colour of the sign can be adapted to your taste.

Imagine multiple Maxgreenwalls linked together with your grandiose sign stretched out over all the living walls.

Back Customization

On the back of the Maxgreenwall, you have the possibility to feature your desired illustration, logo or text.

The back is applied using the support of a secure, magnetic system. It is therefore easy to change and you can effortlessly alter your illustration, brand or advertisement.

You can contact us all year round to order new backplates for your Maxgreenwall.

'Infinite possibilities'
