

#### **A Company Success Story**

Metamar Marble has been founded by Mr. Hasan Tigli in 1988. **Throughout the 36-year journey**, Metamar has gained an extensive knowledge and experience in the industry and turned into the leading international natural stone source and service provider. Today Metamar benefits from it's **1700 employees**, **3 manufacturing factories**, **owned 11 quarries and other exclusive quarries around the globe**.

Metamar has earned a prominent reputation in the global stone industry from its inception. It played a pivotal role in introducing "light Bursa Beige" marble to the international stone market in 1989, establishing themselves as leaders in promoting the export of beige stone from Turkey. Furthermore, as the demand for travertine grew, Metamar was among the early adopters in developing advanced machinery lines. **This forward-thinking approach transformed the quality of travertine production, transitioning it from traditional methods to modern technological processes**.

Metamar is well-known for its contributions to the international stone industry and is recognized for its signature stones. In 2005, Metamar was the first company to mine **Tundra Grey** in its own quarry, giving the stone its name as the 'Tundra' and introducing this now well-known grey stone to the world. Metamar Marble has also introduced other trend-setting stones in the design and natural stone industry today, such as **Bianco Dolomiti, Nordic Grey, Aero Cream, and Simena. Alpaca, Nordbay, and Oceania** are the new stones from Metamar's own quarry, recently presented to the industry

With its production capacity, advanced technology, and experienced work force, Metamar is able to offer variety of solutions and services. Metamar's visions are delivering absolute customer satisfaction, searching for innovative stone technologies, and continuously seeking new stone colours.

Isparta Main Factory & Headquarters

Ayvalıpınar-Sutculer Factory

**Demre** Factory

#### **Stone Procurement and Supply:**

- Variety of colours available from Metamar's world known own quarries.
- Worldwide block and stone procurement from reliable sources

#### **Fabrication & Atelier:**

Metamar fabricates all kind of shapes, forms and details within its states of the art production facilities.

- Large Capacity on Tile and Mosaic Production
- Cut To Size Tiles and Slabs
- Waterjet Mosaics and Designs
- CNC Stone Carving and Dimensional Stone, Columns and Arches
- Exterior Cladding
- Honeycomb Backed-Light Weight Stone Panels

#### **Architectural and Design:**

- Architectural Design Development and Consulting
- Shop Drawings
- Value Engineering
- 3D Modelling and Rendering

#### **Installation and Consultancy:**

- Installation
- On Site Supervision
- Project Management
- Project Scheduling

## **SCOPE OF WORKS**

Blocks Slabs Tiles Cut to Sizes Facade Cladding Columns Arches Waterjet CNC Bathtubs Shower Bases Sink Fireplaces Custom Finishings 3D Panels Mosaics Borders Liners

#### Dear Valued Partners,

Before we delve into some recent **project references** and the **products** featured in this brochure, we would like to take this opportunity to express our heartfelt **gratitude** to you. **From the construction and design community, developers, architects, to stone mechanics and engineers, it is through the collective efforts of all our partners that these projects and <b>products come to life**. Our partnership is instrumental in creating unique projects, and we are truly thankful for your dedication and cooperation.

Thank you all for your hard work and collaboration.

Metamar Team
