

APARTMENT EV CHARGING

We believe our world is getting better thanks to the green energy

www.i-EV.com.au

CHALLENGES

The expense and technical challenges associated with installing private EV chargers become apparent, especially when the grid lacks the capacity to support for each apartment residence having their own chargers. Consequently, obtaining body corporate approval to install a charger in your designated parking space becomes challenging.

WE HAVE A SOLUTION

In tackling the cost and resource hurdle, iEV offers **free charger and installation** for the apartment complex. The AC 22KW charger usually replenishes your vehicle's battery within a few hours, depending on its capacity. EV owners only need to cover the charging service cost when charging.

EVERYBODY IS A WINNER

1. No upfront cost*

iEV will provide free charger and installed in the apartment public parking space and charge lower fare than commercial fast charging, meaning no upfront cost for all EV owners.

2. Shared charging facility

Due to the shared charging facility, there is no need for a substantial grid capacity overhaul.

3. Versatile payment option

EV owner can either pay by deposit when the charger has no access to internet, or pay by membership.

4. Facilitate body corporate approval

iEV can work with body corporate to negotiate a contract that the property manager can profit from the EV charging management.

5. Increase property value

Your property value can be significantly increased due to the onsite charging facility.

*The cost of service shall be determined based on a comprehensive site inspection conducted by iEV Pty. Ltd.

APARTMENT CHARGING
