

Hello, my name is Lofty and I am here to help you install your Loft Ledges. Below are four simple steps for you to follow, however should you need any more help, feel free to email: asklofty@loftleg.com or call us on 01282 861001, alternatively you can visit www.loftleg.com/loftledge for even more information.

Loft Ledge Contents

YOU WILL NEED...

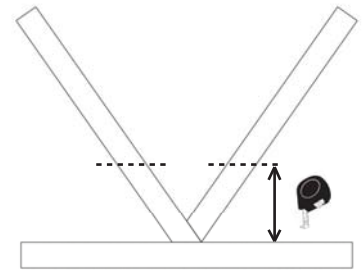

ELECTRIC DRIVER / SCREWDRIVER

TAPE MEASURE

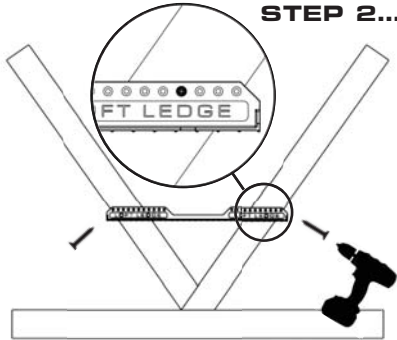

PENCIL

STEP 1...

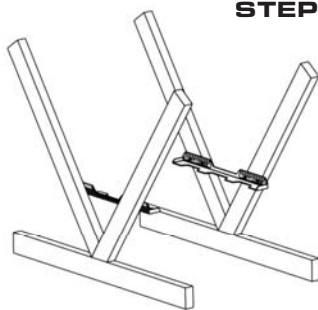

MARK THE TRUSSES AT THE REQUIRED HEIGHT ABOVE THE INSULATION

STEP 2...

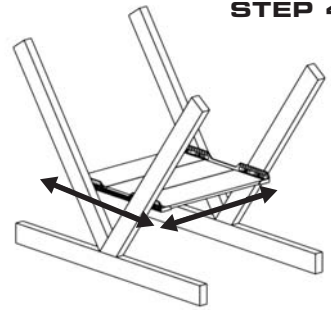

SCREW BRACKET INTO PLACE.

STEP 3...

REPEAT WITH THE SECOND BRACKET ON THE OPPOSITE SIDE.

STEP 4...

PLACE SHELF ON BRACKETS AND CENTRALISE.

IMPORTANT:

LOFT LEDGES CREATE A CONVENIENT STORAGE SHELF BETWEEN TRUSSES AND ABOVE INSULATION. THE SHELF SHOULD BE USED FOR LIGHT DOMESTIC STORAGE ONLY. RECOMMENDED STORAGE OF UPTO 12KG MAX, EVENLY DISTRIBUTED ACROSS THE SHELF. THIS PRODUCT IS DESIGNED FOR DOMESTIC USE ONLY. DO NOT USE IN DAMP CONDITIONS. OVERLOADING CAN EFFECT THE STRUCTURAL OF YOUR ROOF CONSTRUCTION. IF IN DOUBT CONSULT A STRUCTURAL ENGINEER. SAFETY INSTRUCTIONS: ENSURE ADEQUATE VENTILATION. USE OF MASKS AND GLOVES RECOMMENDED.

LOFTY'S TOP TIP:

"For easy access and even more storage space use Loft Legs to create a safe energy efficient platform above your insulation."

DETACH HERE AND STAPLE TO THE TRUSS ABOVE A LOFT LEDGE

WARNING

THIS IS A SUSPENDED SHELF

DO NOT OVERLOAD

Caution: Max weight loading is 12kg. Truss centres can vary from distances apart by +/- 20mm, please ensure the shelf slats are central on top of the Loft Ledges and ensure even weight distribution.

It is the fitters responsibility to ensure that the trusses are in good condition before applying the Loft Ledges.
