TEKWARM

REVEAL BOARD

High performance laminated plasterboard providing a thinner solution for the insulation of window and door reveals, without excessively covering the window or door frame.

PRODUCT SIZES

The boards are available either 1200mm x 298mm, or as a 2400mm x 298mm larger version for doors and larger windows.

Either can easily be trimmed to size on site with a Plasterboard Saw or sharp knife as required.

	Board Size (nominal)	
	1200mm x 298mm	2400mm x 298mm
Insulation Thickness (mm)	10	10
R Value (M2k/w)	0.03	0.03
Approx Weight (kg per board)	2.5	5.0
Nominal Overall Thickness (mm)	20	20

KEY FEATURES

- High performance plus polystyrene insulation
- Suitable for use with most thermal laminates at window & door reveals
- Thinner boards designed not to obscure the window frame
- 9.5mm SE Plasterboard bonded to 10mm HP+
- Thermal conductivity of insulation 0.030 W/mk
- Board Size: 1200mm x 298mm (nominal)
- Time saving – 2-in-1 solution to insulate and dry line at the same time
