## Ring size guide

### By measuring your ring

If your ring is already the perfect fit, place it over a circle to determine its size. Ensure the circle comfortably sits within your ring. If it falls between two sizes, opt for the larger size. Print this sheet at 100% scale (avoid stretching to fit!).

**Please note:** that the ring size might slightly vary based on the style of the ring.

### By measuring your Finger

Carefully cut this rings sizer. Once cut thread the pointed end through the slit, forming a loop, and place it on the finger you wish to measure, don't leave any room. Adjust the loop around your finger where you prefer the ring to rest. If it falls between two sizes, choose the larger size.
