

BEING SINGLE IS EASIER

COCOPEAT SPECIFIC SINGLE PART BLOOM FORMULA

CORNUCOPIA COCOBLOOM™ SINGLE PART

CORNUCOPIA COCOBLOOM™ is a *single part, flowering and fruiting stage cocopeat specific nutrient*. The chemistry is similar to our cocopeat specific two part formulations and compliments the CORNUCOPIA COCOROW™ formula. The difference is that it is all in one easy to use bottle.

The nutrient levels are carefully formulated ensuring optimum ratios between nitrogen and phosphorous are achieved to give maximum flowering and fruiting benefit. All other major and minor elements are optimised and *readily soluble* when diluted in water. We include additional calcium and a natural kelp extract to condition the coco peat while stimulating and maintaining a healthy root system.

As flowering is initiated, flowers and fruit formation will require higher levels of phosphorous, potassium and trace elements. COCOBLOOM™ contains soluble forms of these nutrients, which produce the best results by giving improved colour, flavours and yields. It's essential that plants have an adequate supply of easily absorbable nutrients available at the correct ratios.

CORNUCOPIA COCOGROW™ is also designed for use during the early stages of flowering. Continue using COCOGROW™ until there are visible signs that flowers and buds have clearly started to form. Start using COCOBLOOM™ in conjunction with the COCOGROW™ to ensure an optimal transition. This is the best-optimised way to follow the plant's changing requirements. It's important to use both *growth specific* and *flower specific* nutrient to get outstanding results. Use *one single bottle* for grow and *one single bottle* for bloom – *Single is easy!*

- FLOWER SPECIFIC FORMULA
- IMPROVES FLOWER QUALITY
- IMPROVES YIELD
- CONTAINS NATURAL INGREDIENTS
- OPTIMISED CALCIUM LEVELS
- BALANCED TRACE ELEMENT RATIOS
- ADDED COCO CONDITIONER
- SINGLE BOTTLE FOR EASY USE
- READILY SOLUBLE
- SUITABLE FOR SOIL

*Optimised
for flowering!*

PACK SIZES AVAILABLE

Code	Description	Box
CCBS01	1 Litre	12
CCBS05	5 Litre	2

WHEN TO USE

Only use CORNUCOPIA COCOBLOOM™ when buds and fruit have formed. To ensure maximum performance, regularly test and flush your system to prevent nutrient and plant waste build up..

- Use for:
- Pre-flower
 - Flowering
 - Fruiting
 - Foliar
 - Soil

SINGLE PART nutrients are also manufactured without compromising calcium, phosphorous or sulphur ratios. Single part nutrients make life simple, just shake and pour.
