HY-GEN

COCOPEAT FEEDING SCHEDULE

- Applications are based on 10 Litres of water. Rates are for part A and part B. (e.g. WEEK 1 is 20ml Part A and 20ml Part B)
- The EC target is based on RO or demineralised water. Tap water quality may vary depending on location. This will affect final EC readings.
- The supplements and plant boosters are organically based and can safely be used at higher dosage rates.
- This feeding schedule should be used as a guide only. Growers should continually monitor their plants and establish their own ideal growing conditions. Consult with your local hydroponic store for further advice.

* BUDLINK® should always be used with nutrient as part C. It compliments nutrients and helps compensate for changes in nutrient uptake in the presence of silica.
