Smart Drive has a free-spinning cap for applying additional downward pressure and an LED light for dark spaces. Completing the set are 83 standard and metric black oxide-coated gun bits. Gun bits are hollow ground and square cut for precise fitment.

LEVEL-RIGHT® PRO

Correctly mounting a scope so it's level to the gun's receiver is critical to getting maximum accuracy from your rifle. A level scope means that the reticle (crosshairs) will be perfectly aligned with the rifle bore. A level reticle is critical for long-range accuracy. Balancing small levels on scope turrets and gun receivers has been a commonly-accepted practice for years. Not only is this a clumsy process, it's wrong. The turret on most scopes is not perfectly aligned with the reticle, so even if your turret is level to the gun, your scope may not be. Level-Right Pro changes all that by simplifying scope alignment in 4 easy steps. Accurate and intuitive, this time saving instrument quickly aligns the actual scope reticle to the horizontal gun plane (regardless of turret alignment), which is key to the long-range accuracy of your rifle. Level-Right Pro helps you quickly and confidently mount a scope for maximum accuracy.

REVOLUTIONARY BORE CLEANING SYSTEM.

Maximizing bore contact yields better results. Bore cleaning is a chore, and so the goal is simple – get it done faster and get it done right. The Bore-Max Speed Clean System delivers up to 4 times more bore cleaning contact per pass than traditional brushes, jags and patches. This means less passes to clean your bore and less time spent on the chore. Upgrade to High Performance Gun Care!

BORE-MAX SPEED BRUSHES™

Twice the bristle density of standard brushes for maximum scrubbing power. Stiff, nickel-plated phosphor bronze bristles eliminate chemical breakdown in the bore and extend the life of the brush.

BORE-MAX SPEED JAGS™ & PATCHES

Speed Jag and Speed Jag Patches are sized exactly to work in tandem delivering precise bore fitment by caliber, resulting in the removal of up to 4 times the copper and carbon of shorter traditional jags and square patches. This means a cleaner bore with less pass throughs.

BORE-MAX SPEED CLEAN SYSTEM INCLUDES SPEED BRUSH, JAG AND PATCHES

An all-in-one upgrade system for faster and easier bore cleaning. System includes the Bore-Max Speed Brush with twice the bristle density of traditional brushes, making it twice as effective in agitating the surface in preparation for the jag and patch. Finish off with the Speed Jag and Patch combination to remove up to 4 times the carbon and copper of shorter traditional jags and square patches.

BORE-MAX SPEED JAG PATCHES™ REFILL

Speed Jag Patches are specifically designed to provide no-bunch scrubbing when used with corresponding caliber specific Speed Jags. The micro-pore fibers provide maximum absorbency and grit-grabbing surface texture without fraying or dropping lint.

UNWAVERING COMMITMENT.

We all choose and are sometimes given different missions in our lives. The success or failure of those missions often hinges upon who you choose as your partner. Real Avid hungers to make a difference. To be real in our relationships. To go deeper and not compromise in our search for what's important. To serve our customers by inventing new and smarter ways to solve real-world problems for gun owners. We'll know we've succeeded when we earn the right to be your partner in the missions that you live to achieve.

For the owners of Real Avid, our partner in all of our missions is Jesus Christ. Everything that we do is gently governed by our faith in who He is and how He has changed our lives. It guides our business practices, fuels our creativity and drives us to do everything that we can to honor Him. He leads us to serve others with love and grace and to show by example what real faith looks like in a hurting world. We hope that ultimately, He becomes your partner in your life's mission.

John 3:16 "For God so loved the world that He gave his one and only son, that whoever believes in Him will not perish but have eternal life."
