AURA DOME™

Extraordinary frameless dome

Aura Dome™ is a VikingDome developed technology for the construction of frameless dome-shaped buildings. Due to unique materials and engineering used, you can easily build domes out of light and transparent, yet robust panels, without adding any reinforcing frames.

Why is Aura Dome™ unique?

Fully transparent

Clear polycarbonate structure creates a 360° view experience.

Robust

Aura Dome™ remains stable, robust, and resistant to most environmental conditions. Polycarbonate withstands high loads of wind, water and snow.

Frameless

Strong Aura Dome™ system shell allows to make domes without any reinforcing frame.

Adjustable transparency

Dome can have blackout panels with mixed colours and transparency, based on custom design.

UV resistant

Polycarbonate is UV resistant, which adds longevity and protection to the dome.

Sound isolated

Polycarbonate is a soft material that reflects sound waves – isolating noise from inside and outside.

Natural micro ventilation

Tiny few mm air gaps between plates make Aura Dome™ breathable infinitely.

Corrosion resistant

All materials used to connect the polycarbonate plates are stainless-steel.

Anti-vandal

Aura Dome™ includes a stainless-steel door frame with safety glass door, hinges and lock. Polycarbonate shell is strong and robust.

Multi-surface

Aura Dome™ can be built on multiple surfaces like terrace, rooftop, grassland, concrete and other.

Flammability class B

Self-extinguishing material.

Easy-to-assemble

Aura Dome™ kit comes with individual polycarbonate panels, separate doors and everything else you need to build a full frameless dome. Detailed drawing is provided, and no special tools are required. 95% of our clients assemble domes themselves and have a great time.

Customizable

Aura Domes™ can be customized by request. Any panel can be changed at any time. Panels can be laser engraved, of different color or material.

Light

Aura Dome™ weight starts from 100kg, with the door included. Easier to assemble and transport.

Warranty

2 year standard warranty with possible extension to 5 years for an additional fee.

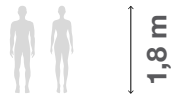

Interact with the environment

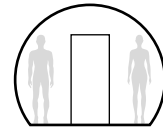

Unique transparent design allows you to interact with the environment, while being sheltered and protected. Create an unforgettable and cozy experience for your family, friends or clients.

Shapes and sizes

Aura Dome™ comes in many shapes and sizes from 3 to 12 meters in diameter. It can be modified to any other dimensions.
