DIRECT AIR ADAPTOR INSTALLATION

Woolly Mammoth Stoves
20-28 Albert Road, Braintree, Essex, CM7 3JQ

How To Install The Direct Air Adaptor to Woolly Mammoth mkii Stoves

It is very straightforward to install a direct air adaptor to your Woolly Mammoth mkii stove. You just need to get access to the rear of the stove and follow the directions below:

STEP 1

Locate the two lugs on the rear of the stove.

STEP 2

Offer up the direct air adaptor to the lugs as shown.

STEP 3

Put the supplied washers onto the lugs.

STEP 4

Screw the supplied nuts onto the lugs and nip tight with a spanner.

Congratulations, you have successfully installed the direct air adaptor to your Woolly Mammoth mkii stove. Now attach a 4" pipe or hosing to the outlet at the back and seal with fire cement. Pass the pipe through an external wall and your stove will no longer take air from the room.
