precision waxing™

COMPANY

LYCON Cosmetics, established in Australia in 1978 by Lydia Jordane, an internationally acclaimed beauty therapist. Cosmetic manufacturing has been a family concern since 1935, which Lydia was exposed to and involved in since taking her first footsteps, while getting under her father's feet in his laboratory. In her country of birth, hair removal was considered a cultural taboo at the time. The family migrated to Australia in 1964 and after much research and secretly ordering ingredients under the guise of her father's cosmetic business, Lydia created her first wax in secret on the family kitchen stove in 1968, when she was just a teenager!

It wasn't long before LYCON became a well-known and sought after brand in Australia, and globally, with a well-deserved reputation as the Crème de la Crème of hair removal waxes. LYCON is the trusted wax of choice in the top spas and salons in over 90 countries with a celebrity following.

Formulated with the finest resins, beeswax and sensuous aromatherapy, LYCON delivers superior results, removing stubborn hair as short as 1mm like no other. At the same time, LYCON low temperature, super pliable and gentle waxes, provide a nurturing and skin conditioning treatment for extra client comfort, even on the most sensitive skins. Professionals use LYCON with confidence, to achieve completely hair free results for all types of hair growth and skin types, every-time.

The range consists of an array of LYCON traditional hot waxes based on Lydia's original hot wax formula, the unique LYCOjet hot waxes, LYCOTec film waxes along with the amazing hybrid hot waxes, LYCODream, Pinkini and MANifico. To complete the LYCON waxing experience, LYCON strip waxes are ideal as they are super gentle and remove hair with ease, without skin drag or sticky residue.

LYCON quality waxes come in many exciting colours and scents, and the unique LYCON waxing experience is complimented with LYCON's comprehensive and harmonising
