

Customized Stretch Wrappers with Advanced Technology since 1994

COLD WEATHER PACKAGE OPTION

The Cold Temperature Package option is designed for applications where the Stretch Wrap Machine must operate in an environment where the temperature may be between 33° F (1° C) and 55° F (13° C), such as in a refrigerator, or where limited exposure to cold winter temperatures may occur.

The Cold Weather Package Option consists of:

- Replacement of the Film Carriage Elevator Gear-Reducer and Turntable Drive Gear-Reducer lubricant with Synthetic Gear Lube rated for operation down to 34° F (1° C).

FREEZER PACKAGE OPTION

The Freezer Package option is designed for applications where the Stretch Wrap Machine must operate in an environment where the temperature is below 32° Fahrenheit (0° C), such as in a freezer, or where exposed to cold winter temperatures.

The Freezer Package Option includes the following:

- Installation of a Control Panel Heater.
- Installation of a thermostat to control the Panel Heater.
- Replacement of the Film Carriage Elevator Gear-Reducer and Turntable Drive Gear-Reducer lubricant with Synthetic Gear Lube rated for operation between -22° F (-30° C) and 122° F (50° C).
- Use of cold temperature rated cables to ensure flexibility at low temperatures.
- NEMA 4 rated control panel enclosure.
- Reduction of prestretch level to 150% or 100% depending upon the actual minimum temperature. (0°F to 32°F = 150% max. / -30°F to 0°F = 100% max.)
