Primobolan Depot is a high quality anabolic steroid. However, the stigma that surrounds it has often made it sound more appealing than it really is. Many steroid. Primobolan Depot (Methenolone enanthate) 200 mg/ml. Alias: Primo 100, Primobolone 100, Methenolone Enanthate 100. Solvents: benzyl alcohol & benzyl benzoate. Carrier: USP Grape Seed Oil. 250ml Methenolone enanthate @100mg/ml recipe: 25 grams Methenolone enanthate powder. 176.25 ml Grapeseed Oil.

How to take Primobolan The optimal dose is considered to be 200-800mg of the active substance per week. For a uniform effect, it is recommended to divide it into 2-3 doses per week. The course duration is 6 or 8 weeks. Due to the relative safety of Primobolan, this drug can be called universal for combination with other anabolics.

SportLifePower is a legit online pharmacy where you can buy Primobolan 200 in the USA with discreet and fast shipping. Primobolan 200 Substance: Methenolone enanthate (Primobolan depot) Package: 10 mL vial (200 mg/mL) Manufacturer: Dragon Pharma [on the main page](#)

hi John, I have a lot of Primobolan I want take for long time 6 to a 1 year at dose 200 mg a week and little test e 250 a week , and I 47 y old , is this good amount of primo I am not looking fast results and what for this kind of cycle what you recommend pct will be , thanks so much
At the 400 mg/week usage level, post-cycle therapy (PCT) may be started only 5 days after the last injection, whereas at a higher level of usage such as 1000 mg/week, at least 10 days will be needed until recovery is likely to become possible. Primobolan Depot Does Not Convert to Estrogen or DHT

The price of this drug ranges from \$62 for Alphabolin to \$195 for Primobolan 200, which depends on the form of release and dosage. Primobolan Depot for Sale is available in injections. Conclusion Unlike other steroids, it does not have a high androgenic effect and does not cause baldness. Most oral primo is dosed at 10mg/pill and most injectable primo is dosed at 100mg/mL. That being said, 200mg/ml injectable primo and 200mg primo tablets are possible to make. Most UG labs just don't dose the products at that high of a concentration because the cost of raw primo is so expensive. 07-07-2016, 04:14 PM #3 jp4355 Senior Moderator

Primobolan Depot is a relatively mild anabolic steroid carrying an anabolic rating of 88 and an androgenic rating of 44-57. In order for these ratings to hold some teeth consider the rating system. All ratings are derived using the testosterone hormone as the baseline. Testosterone holds a rating of 100 in both categories. [browse around here](#)
