# COMPLETE HARDWARE

## IS THE CORNERSTONE OF HIGH QUALITY

### MUTE TECHNOLOGY

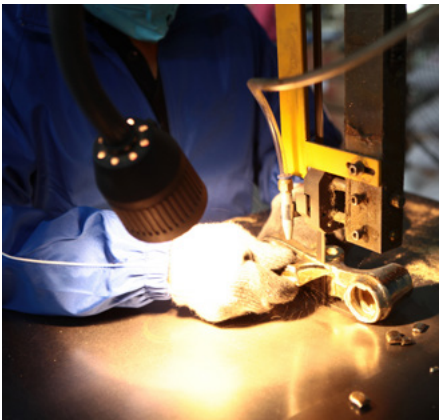

When it comes to mute technology, we are undoubtedly in a better position. Whether it is the smooth wall of the tap cavity. The bubbler has seven layers of filtering, which can save water, reduce noise and prevent splashing. The filter screen of the valve element, silencing treatment, etc. are all just right and meticulous.

### SMOOTH TECHNOLOGY

Speaking of smooth operation, our unique valve element is made of advanced ceramic alloy in a tightly closed environment, and is coated with a special lubricating coating. At the same time, the special oil tank design on the surface of the ceramic chip makes your faucet smooth for many years. Therefore, the smooth technology ensures that the product can maintain a comfortable and reliable performance during its service life without any maintenance. At the same time, the large operation rotation angle means that the cold and hot adjustment process of water temperature is smooth, gradual and accurate.

### FLOW TECHNOLOGY

We pay attention to the precious water resources and at the same time let you enjoy your bath. Whether it is the seven layer filtering of the bubbler or the aerated constant flow device of the shower. In general, the higher the water pressure of the bubbler, the greater the flow. Even when the water pressure of our washbasin and kitchen faucet is above 0.3MPa, the flow of our special bubbler is constant. This constant current technology has been widely recognized and respected by the industry.

0000 Series

001 Series

-Surface finished: Mirror and Brushed  
-with colorful LED light, can be changed by power control

Three kinds of air outlet mode  
1.Big size rainfall  
420x270, The best outlet position ,combined the air and water together , let you feel like having the bath in the nature  
2. Mist spraying mode  
4 x 2L spray, the Atomization come out evenly, give you a romantic atmosphere in the bathroom  
3. Bubble massage mode  
New type of bubble massage mode bring you an unexpected shower feeling,Using the certificated silica gel nozzle, easy to clean and keep the water pure

Recommend collocation program:  
Concealed multifunctional controller BAX401X

In order to combine the beautiful water outlet and the functional control perfectly , we advise you to use the high flow capacity multifunctional control valve.

**APPLICATION INSTRUCTION**

Flush the pipe system  
Wash both of the cold and hot water supply pipes after finishing installed the whole system

The correct way of connecting the overhead shower  
This overhead shower is only allowed to be connected with the diverter valve

Surface condition  
Pls make sure the points below before you are ready to install the head :All fasten surfaces must be smooth (no salient or protruding ceramic)and contains no flaw , and pls be sure the wall structure in suitable for the roof shower head

Electrical connection  
Preinstallation service cable: 230V/N/PE/50Pz (Electrical connection must be handled by professional electrician)

Lamplight switch  
Must be installed out of the shower range or connected with the ceiling light together. (Refer to the following electrical connection graphical representation)

IUSTALLATION GUIDE

1. 参考支架的开孔位置尺寸，尺寸看线定位，开孔直径9.5mm-10mm钻头，开孔深度50mm，然后放入膨胀螺栓。

1. Refer the size of frame, positioning, drilling the wall hole in 2. Screw on the expansion screw, screw the nut with 10 mm Screw the nut with wrench around 90 mm with 9.5-10mm drill.

2. 装上膨胀螺栓，用10mm扳手收紧螺母至合适力度。

2. Screw on the expansion screw, screw the nut with 10 mm wrench

3. 支架缺口朝外穿入，用螺母收至合适的高度（此高度为活动尺寸，根据天花板安装尺寸高度调节）保证每个支架的高度一致。

3. Outward the notch, install the bracket, adjust the height (the height could be flexible, depends on the ceiling) keep all bracket in same level

4. 将花洒抬起来插入支架的安全结构（请注意确保已挂稳）向上挂起另一侧支架螺丝的位置，稍微推开支架两边的螺母，将螺丝卡入支架孔中，用M4螺母固定牢固，然后将剩余的螺母全部装上支架固定牢固。

4. Hang the shower to the hook of bracket. (insure the shower is stable), push up the other side up to the bracket, adjust the pothook hang the screw to bracket, fixed with M4 screw, lock the rest nuts.

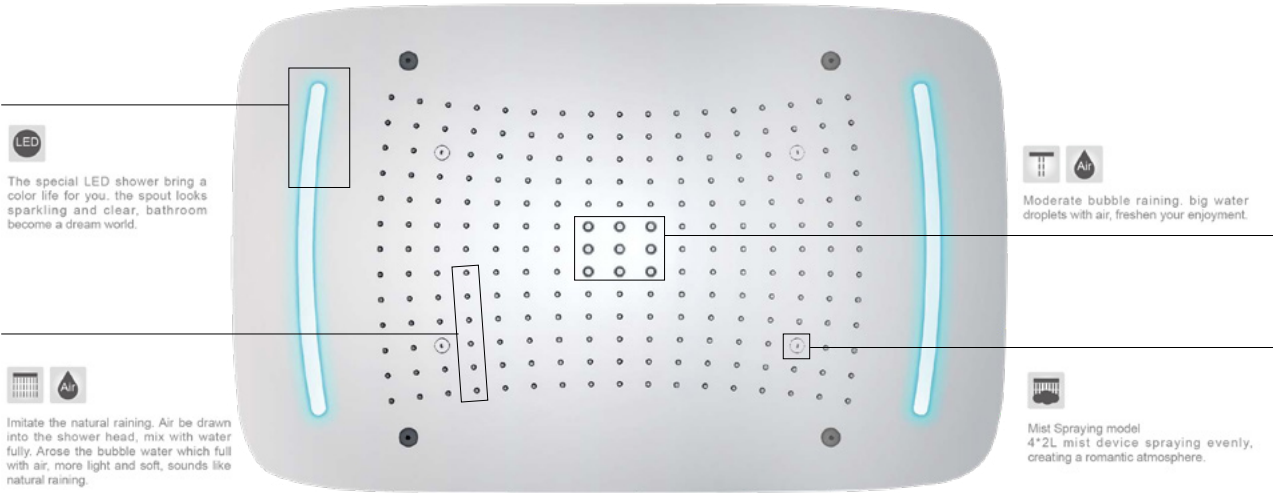

5. 连接水管到花洒，安装后试水，必须确保管道没有渗漏（连接前必须将管道进行预冲洗，避免管道堵塞）。

5. Connect the pipe to the shower, leaking test, insure not any leaking (for avoid clogging, it must be flushing before connect the pipe)

6. （注意此工序需要两个劳动力）带上手套将面板孔位对准玻璃上，用4mm六角匙拧上螺丝（注意面板跟天花板平齐即可，不必过于用力拧紧）。

6. (note:This process requires two man), with gloves, Push up the panel accord the nozzles, tighten the screw with 4mm Allen key(keep the panel in same level with ceiling)

ADORN THE ELEGANT BATH FOR YOU.  
USE HIGH STANDARD SHOWER HEAD PRODUCTS.
