## RUGBY BALLS

### GILBERT 2014 BALL TECHNOLOGY

#### MULTI-MATRIX 3D GRIP

Maximises hand contact with the ball and provides ultimate passing and catching control. Performs in all conditions. Star shape, dual height pimples allow maximum grip coverage whilst maintaining kicking distance and accuracy.

#### SYNERGIE X3 GRIP

Designed specifically for Sevens rugby to assist long accurate passing and one-handed pickups and off loads. Heavily defined star shaped pimples provide maximum grip.

#### STANDARD GRIP

Traditional all-purpose grip, using round pimples of uniform height.

#### TOUCH PRO GRIP

Multi height touch grip for superb handling characteristics required for match play.

#### TOUCH DPX GRIP

Specific touch grip for excellent handling and greater durability.

#### AIR-LOC BLADDER

Copolymer bladder for improved air retention and enhanced energy transfer.

#### ELLIPSE TRUFLIGHT™ VALVE

The unique valve shape redistributes weight along the seams of the ball to improve rotational stability ensuring that the ball will not deviate from the line of kick, resulting in greater accuracy.

#### TRUFLIGHT™ VALVE

The Patented valve design ensures that it sits securely in the seam of the ball, without affecting the shape of the ball. Provides improved accuracy and truer, longer flight.

#### REACTION LAMINATE

High quality internal laminations ensure optimal energy transfer between boot and ball to improve strike consistency.

#### HYDRATEC

Technical fabrics and waterproof laminations are combined to enhance the life and performance of balls. The outer surface repels moisture to maintain ball shape.

#### PRE-KICKED

Kicking Machines strike the ball repeatedly to remove residual stress. Ready for match play from the first kick.

#### IRB IRB SPECIFICATIONS

Conforms to IRB Ball specifications.
