

WILCO IMAGING

A LORE TECHNOLOGY COMPANY

Established in 2003, Wilco Imaging has been a global leader of imaging products, offering a variety of customized and specialized services to fit unique application requirements for our client's varied and precise needs. Newly partnered with Lore Technology, we can now offer a wider range of products, services, client support, and technical knowledge.

At Wilco, a Lore+ Technology Company, we strive to stay on the pulse of all the rapid advancements in technology and robotics. It is our mission to help companies push boundaries to achieve breakthrough innovation while adapting to industry trends and the growing demand for vision in automation and machinery. We do this by continually staying up to speed and educated on the most current technologies and market trends. We have established and dedicated relationships with our manufacturers and partners that allow us to stay current on availabilities and delays. We have excellent support service; we will treat your company as if it were ours. And we offer a wide range of customization services, which include but are not limited to:

- ✓ Sensor Glass Removal (CCD & CMOS)
- ✓ Sensor & Filter Cleaning
- ✓ Filter Installation and Alignment
- ✓ Cable Customization
- ✓ Custom Product Branding
- ✓ Custom Camera Enclosures
- ✓ Contract Manufacturing
- ✓ Designing Development
- ✓ Prototyping
- ✓ C/CS Mount Removal
- ✓ Opto-Mechanical Ruggedization
- ✓ Optical Testing
