## 1. Safety tips

#### 1.1 Preface

Thanks for choosing Topway New Energy power wall battery. In order to make you better use and maintain this product, please read the user manual carefully before use.

The features of this product are as follows:

- 1. Adopt brand new lithium iron phosphate cell; Higher security; In the standard state, 100% DOD charge-discharge ≥4000 times cycle;
- 2. Highly integrated analog front end; Isolating power supply circuit;
- 3. Integrated serial port IC, high voltage accuracy (≤20mV), high current accuracy (≤2%@FS);
- 4. Four-channel battery temperature detection (≤2°C), SOC estimation function, SOH estimation function;
- 5. Short-circuit protection function, adjustable overcurrent protection, a variety of sleep and wake up mode, low power consumption;
- 6. Dual-port RS485 communication, parameter adjustable setting, buzzer alarm function, LED status indicator function, with charge balance power;
- 7. Wide temperature range: -20°C~60°C;
- 8. Parallel connection (up to 15 groups) application expansion is supported, but serial connection is not recommended.

#### 1.2 Safety disclaimer

When installing, using and maintaining this product, users must read this chapter carefully and follow the safety precautions required in this chapter. Any injuries and losses caused by illegal operation are not related to our company.

#### 1.3 Description of safety matters

- 1. Keep the battery out of the reach of children and babies;
- 2. Do not put the battery in the oven or other similar equipment;
- 3. Do not remove the product label;
- 4. Do not try to open the battery pack;
- 5. Do not be exposed to the environment above 60°C(300F);
- 6. Do not short-circuit the positive and negative terminals of the battery with wires or other metal objects. Do not transport or store batteries with metal objects;
- 7. Do not expose the battery to direct heat or flame. Do not use or store batteries near fire or high temperature;
- 8. Do not immerse the battery in water, salt water or any other liquid or make it wet;
- 9. Do not pierce the battery with any sharp object, knock it with a hammer or similar device,

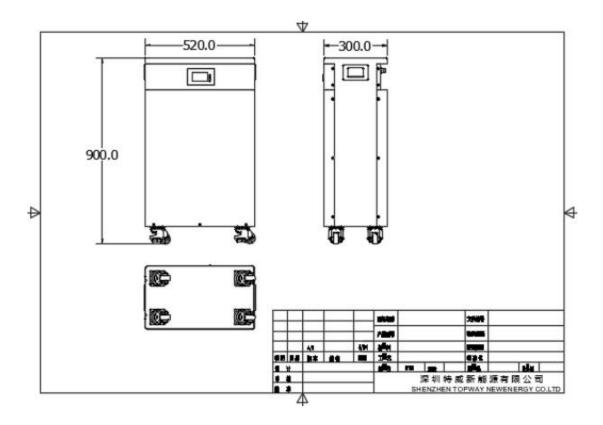

step on it, fall it or get strong vibration;

- 10. Do not use the battery if it is damaged or deformed;
- 11. If the battery produces odor, smoke or abnormal heat, please stop using it immediately;
- 12. If the battery liquid leaks and comes into contact with your eyes, please don't rub your eyes, and immediately rinse them with plenty of water before seeking medical assistance.

#### 4.2 Boot and sleep mode

Sleep mode: the battery will be in sleep mode if any of the following conditions are met

- 1) The battery or battery pack over discharge protection lasts for 30 seconds and is not released.
  - 2) Press the power on / off button for 3 seconds and release.
- 3) The minimum voltage of the battery is lower than the "sleep voltage" setting in the setting, without charging and discharging.
  - 4) Standby for more than 24 hours without charging and discharging.
  - 5) Switch to the upper computer for sleep manually.

Wake up: the battery will exit sleep mode if any of the following conditions are met

- 1) Charger is plugged in; The charger voltage is greater than 48V.
- 2) Press the power on / off button for 3 seconds and release.
- 3) Plug in the communication cable and open the upper computer software (not available if it is under over discharge protection).

Note: if over discharge protection is enabled, the battery will be in sleep mode. The battery will wake up automatically every 4 hours and turn on the charge / discharge MOS. If charging is available, the battery will be charged, otherwise it will return to sleep mode. If it has been awakened 10 times but cannot be charged, the battery will not wake up again automatically.

#### 4.3 Communication area

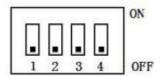

Picture 4 Communication interface diagram

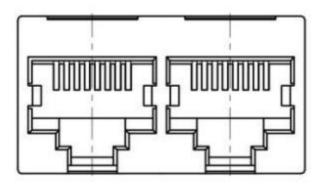

- 1. RS232: BMS can communicate with upper computer through RS232 interface, so as to monitor various information of battery, including battery voltage, current, temperature, status and battery production information, etc. the default baud rate is 9600bps.
- 2. RS485: with dual RS485 interface, you can view the information of pack. The default baud rate is 9600bps. If it is necessary to communicate with the monitoring equipment through RS485, the monitoring equipment is used as the host, polling data according to the address, and the address setting range is  $1 \sim 15$ .
- 3. CAN: CAN communication, baud rate 9600bps.
- 4. DCT: dry contact interface.

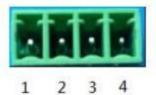

5. ADS: dial switch

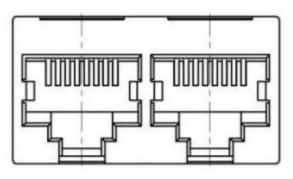

6. Rst: reset button

6 Hibernation and activation functions

After 1 minute of button-free operation in normal operation, the display will turn off (backlight only), and pressing any button while the screen is off will allow the screen to light up and function normally.

## 6 Product list and tools

### 6.1 Product packing lists

Home energy storage system series power supply has been strictly inspected before delivery, but may be damaged in transit, therefore, after unpacking the box, please check whether the following items are complete, confirm the model, capacity, input voltage and output voltage, and whether the specified content when ordering; If anything abnormal or inconsistent occurs, please contact the distributor as soon as possible.

	Picture	Description	Qty
Power wall battery	**Cewaycell**		1 pieces
Product manual			1 pieces
Positive/negative connector plug (with 6AWG*1000mm wire and SC-25 copper terminal)			Positive/ negative each one
Signal line		Communication cable	2 pieces

## 7 Instruction manual

1. Place the battery in an appropriate position, plug the positive/negative connector into the positive/negative socket, and then plug in the network cable.
