Standard Equipose doses will normally fall in the 200-400mg per week range. Most men will find 400mg to be very well-tolerated and generally the minimal amount of EQ they'll want to use. Many will also find 600mg per week to be extremely well-tolerated with side effects being extremely easy to control. Buy Equipose In The USA. Equipose is a fairly powerful, injectable steroid that can be used in both bulking and cutting cycles. Gains while running Equipose will be slow and steady and will be quality lean mass gains. This steroid is well-tolerated by most men. In addition, women can enjoy Equipose with minimal side effects. The effects of the drug are enhanced by the ether Undecylenate.

An Equipoise cycle usually lasts for 12 weeks and the Equipoise dosage ranges from 200 to 600 mg per week. There are several Equipoise side effects, and the higher the dose, the more severe the symptoms. Let's review the top five side effects of the EQ steroid right here. 1 Oily, spotty skin. Equipoise is both an anabolic and androgenic steroid. During EQ 200/Test E 200 cycle, you should take Anastrozole to reduce side effects of Testosterone Enanthate (possible water retention, appearance of gynecomastia). Test E 200mg/EQ 200mg recommended dosage is 200-600 mg once a week.
