

# Sterling Lighting 300W Transformer

## Materials

- Stainless Steel Case
- Conforms to UL STD 1838
- Bottom panel pre-punched with four conduit knockouts
- Magnetic, lockable door swings up and down for easy installation
- Mounting bracket with three holes for secure installation
- Lifetime warranty

## Electrical

- 4 taps: 12V, 16V, 18V, and 22V
- Higher taps allow for longer runs and more lights with less voltage drop
- Magnetic core
- 5' heavy-duty power cord
- Primary side with thermal protector that will shut off if unit overheats
- Secondary side circuit breaker in case of shortage or exceeded wattage

## Dimensions

- Dimensions, including mounting bracket:  
15.375"H x 5.375"W x 5.75"D

## Notes

- Do not exceed 2.5 AMPS on primary
- Mount unit at least 1' above ground level
- Install transformer 5' or more from pool, spa, fountain, or other waterscape
