

# Alpha LED Pool Lights

## POOL GLOW SLIM265

### CHOOSE YOUR AMBIENT LIGHTING

Available in 16-pre-programmed light scenes

### RGB Slim 18W & 30W and Super Bright Pool Light

This slimline light not only has a super bright light, it also provides better protection from being broken. The LED chipset has been specifically designed for widespread underwater illumination, ensuring there are no hot spots. Compared to other pool lights, this slimline design sits flatter to the pool wall so it is less likely that it can be trodden on or pool cleaners getting caught on it. This light is best suited for new pool builds (pool builders or self-managed projects) or when retrofitting old lights. It can be installed with or without a bracket.
