

Water heaters for the RV market

Thermo Pro 90

Webasto water heaters are ideal supplementary heaters that utilize the vehicle's own heating and ventilation system to provide a dedicated heating system for the driver's compartment. The supplementary heater is mounted in the engine compartment and is integrated into the water circuit of the vehicle, in order to provide either dedicated heating to the driver's compartment or engine pre-heating. The heater may also be integrated into an existing water heating system in order to provide an alternative heat source independent from LPG.

Key benefits at a glance:

- May be used to preheat the engine or to be integrated into an existing water heating system
- Low weight, compact design
- Wide heating power range from 1.8 to 9.1 kW
- High operational readiness of vehicles even at low temperatures
- Automatic altitude adjustment up to 3.500 m

Technical specifications

	Thermo Pro 90
Heating power (kW)	1.8 – 7.6/9.1
Fuel	Diesel
Fuel consumption (l/h)	0.15 – 0.90/1.1
Rated voltage (V)	12
Operating voltage range (V)	10.5 – 16
Rated power consumption (W)	37 – 83/90
Dimensions L x W x H (mm)	355 x 131 x 232
Weight (kg)	4.9

Controls

MultiControl

The MultiControl sets new standards in terms of its modern design and user-friendliness that allows fast and intuitive operation. It includes features like an immediate start button, the ventilation function and fault code display. You can program up to three start times per day for your heater which allows the best individual comfort.

ThermoCall App

Even greater comfort with our innovative Webasto ThermoCall App. Run your water or air heater easily with a smartphone via App for iOS and Android device.
