

FLEXA[®] study

WHY FLEXA STUDY?

At FLEXA, we want to improve children's lives. We created FLEXA Study for three main reasons:

To support a balanced development by allowing children to TRY, LEARN, and GROW.

To provide children with an inspiring study environment where they can unfold their creativity and learn new things.

To help secure good ergonomic study positions for any child of any age.

SAY HELLO TO FLEXA STUDY

- Try, Learn, Grow

At FLEXA, we want to improve children's lives. We wish to help children grow, nurture their interests, and develop new skills - right from their first big day of school to their teenage years.

We do this by offering a full study collection of ergonomic designs – desks, chairs, and

accessories. Clever features such as tilting surfaces and adjustable heights offer good ergonomic support for little students and let them switch position easily, helping them stay focused and energised.

The FLEXA Study collection allows children to TRY, LEARN, and GROW.

UNIQUE SELLING POINTS

Ergonomic design to give children
the best conditions for learning

Made to fit the changing needs
of growing children

Calm colours and timeless finish

Created from long-lasting,
quality materials

Rounded corners for extra
comfort and safety

[DOWNLOAD MATERIAL](#)

Every FLEXA Study product is especially selected and designed to allow children to TRY, LEARN, and GROW.

TRY

Encouraging children to challenge themselves.

When children are motivated, inspired and curious, they get new ideas, develop their skills and unfold their creativity.

For children who try their best.

LEARN

Giving children the best conditions for studying.

When children are ergonomically supported, able to switch position and feeling comfortable, it's easier for them to focus, concentrate and learn.

For children with many questions that need answers.

GROW

Allowing children to grow both physically and cognitively.

When children develop a skill or learn something new, they grow. Physically, children also grow quickly, and that's why our furniture grows with them.

For children who grow up in the blink of an eye.

WOODY

FLEXA Woody is a height-adjustable desk with tilt function, carefully designed to meet the needs of a growing child. With its rounded corners and dusty colours, combined with the warmth of the wood, Woody is a sculptural and Danish piece of furniture.

Woody is height-adjustable from 50-83 cm, and the tabletop can be tilted up to 35 degrees. This allows for frequent change of working posture, making the little student feel comfortable for longer periods of time.

MOBY

The FLEXA Moby desk is modern, Danish design with soft, rounded corners and little details like the built-in pencil holder in oak wood. The Moby desk is a height-adjustable desk, designed with three different tabletops because every child is different:

- One for right-handed children with tilt function on the left side of the table
- One for left-handed children with tilt function on the right side of the table
- One with tilt function in the middle of the desk

The right tabletop will help your child achieve a correct sitting posture, focus for longer, and make learning more fun.

EVO

With the FLEXA Evo study desk your child will have the perfect place to study and learn for many years to come. The height-adjustable Evo desk is minimalist in its design and available with one of two different tabletops to help your child achieve a better posture when studying:

- ◆ One where the entire tabletop tilts
- ◆ One where the back of the tabletop is fixed, and the front can be tilted

You can change the feet on the desk to grey, blue, rose, or white and add a drawer to help the little student stay organised.

CHILDREN'S DESK CHAIRS

Choosing an adjustable desk and desk chair will give your child the best conditions for learning. All our children's desk chairs are designed with focus on comfort, quality, and ergonomic design.
