

Poppie Cotton's Face Mask N95 Compatible

Disclaimer

(this face mask is not meant to replace the recommended surgical face mask)

Includes Four sizes

Large: Adult Man

Medium: Teen to Adult Woman

Small: Child 7 to 12 years old

Extra Small: Child 3 to 6 years old

FABRIC REQUIREMENTS

Prewash all fabric

6" x 12" mask outside fabric

6" x 10" mask lining fabric

6" of pipe cleaner or piece of wire

(1) 20" round elastic band 1/16" wide or

(1) 16" hair elastic or (4) 18" fabric ties or ribbon

SEWING INSTRUCTIONS

- (1) With wrong sides of fabric together, cut (2) mask outside templates and (2) mask lining templates from 100% cotton fabric.

- (2) With right sides together sew the curved center seam of the mask lining pieces together. Repeat for the mask outside pieces. Clip curves.

(3) Press seams with fingertips to one side. Topstitch close to the seamline.

(4) Fold the raw side edges of the mask lining. Fold $\frac{1}{4}$ " then $\frac{1}{4}$ " again. Topstitch. Press.

(5) Place the mask lining inside the mask outside. Match center seams. Pin.

(6) Stitch across the top and bottom seams. Clip curves. Turn right side out. Press.

(7) Topstitch close to edge on the top and bottom of the mask. Stitch $\frac{1}{2}$ " down from top of mask to thread in pipe cleaner or wire to help secure around nose.

(8) Press raw side edges of the mask outside. Press $\frac{1}{4}$ " then $\frac{1}{4}$ " again. This seam should line up with the edge of the mask lining finished seam. Stitch close to the folded edge. This will create the casing for the elastic or fabric ties.

(10) It is N95 compatible. You can make a piece of fabric or interfacing to insert as the filter or use an air-dried piece of anti-bacterial wet wipe or cling free sheet from the dryer.

(9) This mask has an opening to insert the filter or surgical mask.

(11) Round Elastic: Thread the 20" round elastic through one side of the casing and then the other side of the casing. Tie the elastic in a knot. Hide the knot in the casing. This can be adjusted to fit any size head. It is much more comfortable when the elastic can go behind the head rather than the ears.

of the casing. Repeat for the bottom end of the casing, by sewing each end of the other 8" elastic to secure in place.

(13) Fabric Ties: The fabric ties or ribbons can be inserted in each opening at the top of the mask sides. Repeat for the other ties by sewing each tie at each bottom end of the side of the mask. The ties can tie behind the head to secure in place. The ties can be made from left over binding. Topstitch around all edges.

(12) Hair Elastic: 16" hair elastic, cut in half and tie knots in ends. Sew each end of an 8" elastic to each top end
