

DLS-2
#00-2506

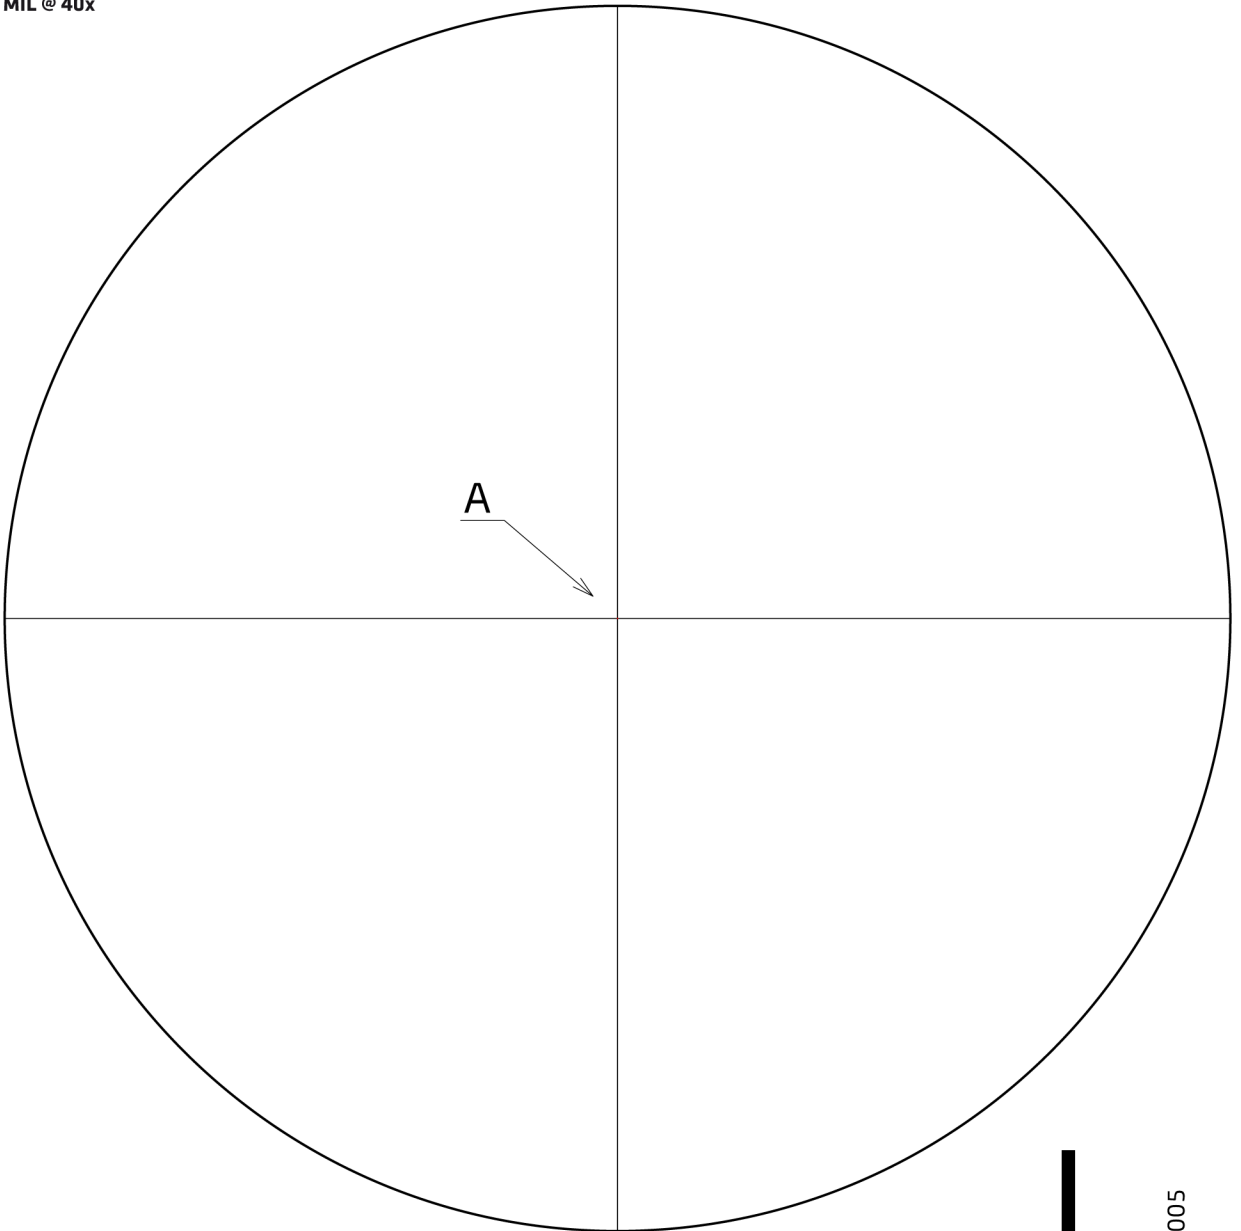

DLS-2 RETICLE

Precision in pure form. Two thin 0.005 Mil (0.5 mm 100 m) cross-hairs intersect in the center at an angle of 90 degrees. Nothing can distract the eye of a shooter providing an optimal overview of the field. In the intersection there is a central illuminated target point.

Calibrated ranging magnification: 40x

MIL @ 40x
