ILLUMINATED SECOND FOCAL PLANE RETICLE

New for 2020, the ZMOAi-T30 reticle is the illuminated version of the ZMOA-T30. It also strikes the perfect balance between a dedicated shooting reticle and hunting reticle. Hunters and shooters alike prefer this option for their do-all riflescope. The minute of angle (MOA) reticle incorporates 1 MOA hash marks, offers 30 MOA of drop below centerline, and has highly useful windage correction and hold-over dots that are properly placed in the field of view for maximum effectiveness and minimal distraction. Only the center section of the reticle illuminates – providing a most effective and precise point of aim in low-light environmental conditions.

INTENDED APPLICATIONS

Predator / Varmint

Plains Game

Big Game

Long Range
