

Carol Nightingale Singleton, a multi-award winning Pekins breeder:

“I breed and show pekins, I have about 40 at the moment but often have around 100. I use Orego-Stim Liquid in their water every day, even when I am at shows. Giving my chickens Orego-Stim Liquid means:

Their feathers are beautiful.

They are not stressed when travelling and during shows. I don't need to give them antibiotics after shows.

Their droppings are always firm and never running, which means clean bums.

I tell other breeders that I feel good knowing that my chickens are the healthiest they have been since I started using Orego-Stim Liquid.”

Carol's recent winners
