

OREGO-STIM™

Nature's Answer from Anpario

Carol Nightingale, a multi-award winning Pekins breeder:

"I have been breeding and showing Pekins for eight years. Over the last two years I have been using Orego-Stim Liquid in their everyday water, the visible difference I have noticed is firm droppings and beautiful silky feathers.

Their overall health has improved, I haven't had a single bout of illness or coccidiosis in that time, so no need for medication, also they are less stressed during their preparations for show.

Using Orego-Stim helps me to get my Pekin Bantams to the best show quality. I have doubled my success at the shows. I highly recommend Orego-Stim Liquid."
