

## **Kevin Finnemore, Breeder of Kings and Modena Pigeons, is Delighted with the Results of Using Orego-Stim**

Kevin Finnemore, a breeder of Kings and Modena Pigeons, based in Australia says:

"I am a breeder of Kings and Modena Pigeons. Like many breeders, I am aware of the risk Salmonella and various diseases pose to my birds, as they are very difficult to keep on top of.

Two year ago, I made a phone call to Anpario and they suggested a programme which included Orego-Stim Powder and Orego-Stim Liquid, which in turn helped control problem-causing bacteria build-up in bird feed. Plus adding a prebiotic at the same time.

In summary, this breeding season, my birds have produced a greater number of viable eggs, which have resulted in more quality chicks than in previous years. I feel they have been better supported nutritionally and benefited from Orego-Stim being part of the ration."
