

Lorna found that Orego-Stim® Equine greatly supported her mare Millie's health after treating for her high worm count

Lorna tells us her experience with using Orego-Stim Equine for her mare Millie:

"Fantastic stuff! I started using this natural product a month ago after my new mare Millie came back with a FEC of 2500!!! I had treated her but wanted to support her with Orego-Stim Equine Liquid, so I started using it with all three of my horses. I am using 10ml per day in their feed, they were a bit iffy at first but from day two there were no issues. In hindsight I should have started with half the dose and then increased once they were used to the taste.

Two weeks after treatment and starting Orego-Stim Equine Millie has a zero worm count. Other noticeable differences are how calm they are, their droppings have changed in consistency and are much firmer. A healthy gut is a happy horse in my mind."
