

TESTIMONIAL

OREGO-STIM™

Nature's Answer from Australia

Tommy Lett - Airly - NSW - Australia

"I have had racing pigeons 35 years and I have been using Orego-Stim Liquid for over 8 years and I swear by it. Our collection of breeders (many imported) are on Orego-Stim liquid in their water and also have their pellets made with the Orego-Stim Powder.

My breeding pigeons are never medicated, and my flyers are rarely medicated. I never lose young ones in the nest. I feel my pigeons are in top condition with a strong immunity.

I have seen flyers pay \$80 for 200ml of medications to treat sick birds and the medication just acts as a band aid until you address the cause of the illness.

I tell all pigeon fanciers, just try Orego-Stim Liquid in your pigeon's water.

I fly my pigeons in a lot of one loft races, and sell race teams, of these birds sent out to other lofts our birds raised with Orego-Stim are well reared and often feature well in the results.

I would definitely recommend the use of Orego-Stim in any loft."
