

**Stephen Shears - Hills District Club Central  
Cumberland Federation NSW Australia - Trusts  
Orego-Stim to keep his breeding and racing  
pigeons in good health**

"I have been using Anpario's Orego-Stim Liquid for all of my breeding and racing pigeons for the last three years. I can testify that this product gives them an iridescent shine on their neck that is indicative of good health. They also have firm droppings.

Now this product is sold in a commercial concentration it is important that pigeon flyers know the dose is 0.15ml per litre so as not to incorrectly dose and waste product. At this concentration one litre should last the average pigeon flyer 12 months."
