# WiFi WEATHER STATION

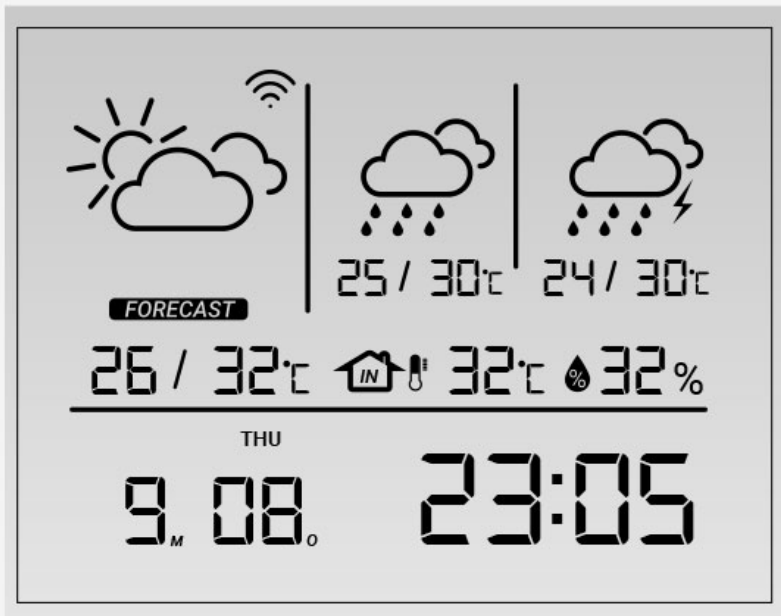

1. Download the "WiseMirror APP" by scanning the provided QR code using your mobile phone.

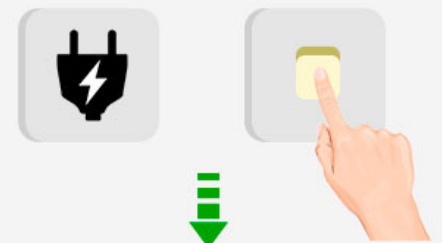

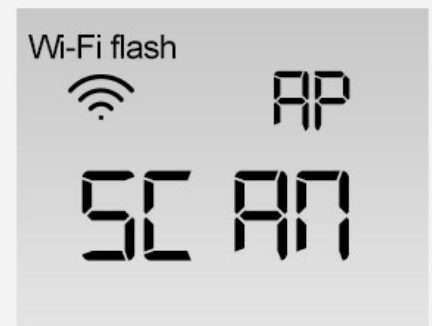

# WiFi WEATHER STATION

2. Ensure that your mobile phone is connected to WiFi. Then open the "WiseMirror APP" to gain control over the weather station.

### 3. Intelligent mode:

- Power on the weather station.
- It will display for **two seconds** and then automatically enter the intelligent network configuration mode.
- The WiFi indicator light will flash.
- Follow the in-app instructions to complete the network configuration.

### 4. compatible mode:

- Plug in the power supply to the weather station.
- Repeat the power supply connection process **six times**.
- This will activate the compatible configuration mode.
- Use the "**WiseMirror APP**" to connect the weather station to your WiFi router.
