# SENSU BED

The Sensu bed is a celebration of complexity through simplicity. There is purpose to every line and a deliberate sense of continuity between the front and the back, the left and the right. The bed-head form, inspired by traditional Japanese sensu fans, flows into the bed frame with the same ease as the front legs run into the back ones. The subtly curved bedhead rail and repetition of the vertical slats create the perception of a complex 3-dimensional surface. Paired with the Bow head-rest cushions, the Sensu Bed provides unrivaled support and comfort.

MATERIAL : solid oak

DESIGN : Patryk Koca
