

# END GAME

## Freespan system

This double sided bracket system wraps the wood rail. All of our systems can use the end mount and adjustable wall mount to "float" or cross an abutting wall, but the End Game does it with extra style.

### FINISH OPTIONS

Brushed Stainless

Matte Black

Raw Steel

### FEATURES

- Ultra flexible system with minimal attachment points
- This freespan system allows unique and creative installations
- Compatible with wood, glass and metal panels
- Sustainably made in Washington, USA

### WOOD TRACK WIDTH SIZES

4" or 6" standard

\*Brackets allow for smaller custom wood track sizes or material options to be created by user. If making own track select (No track in menu)

### DOOR CONFIGURATION OPTIONS

Single, Bi-parting, Bypassing, Stacking

### DOOR PANEL OPTIONS

Wood, Glass, Metal

### DETAILS

- Made for door panels 3/4" to 1 3/4" inch thickness. Baseboard and casing thickness allowance dependent on door panel thickness and mounting.
- Supports 225 lb door weight. Contact us for door panels over 225 lbs. \*Track must be adequately sized by installer to meet span engineering criteria for specified door weight.
- Available in standard track lengths: 60" up to 95" standard shipping. Other sizes available. Extra shipping costs for lengths over 96" or make your own using our custom router bit.
- Mounting fasteners for most wall construction types.
- Ability to customize door travel during install.

### WHAT'S INCLUDED

- Bracket, Wheel, and Wood Track system, plus:
- All necessary mounting hardware
- Two (2) standard door stops (premium available at extra cost)
- One (1) standard door guide (premium available at extra cost)
- Other accessories available in online shop
