Cymatics

A menu mixed by music

What is Cymatics?

Cymatics is the science of making sound waves and vibrations visible. For our new concept menu we explored this innovative technique to use baselines, beats and vocals from music to mix our new cocktails.

As each song creates such a unique movement, the ingredients in each drink have been chosen based on the sound waves and vibrations created from its selected track. We place small speakers into the liquid during the preparation stage and play the song as many times as necessary to enable the sound waves to mix the ingredients to perfection.

If you want to see the blending in action click on the play button on the relevant cocktail track page.
