

GENESIS

Uncork. Preserve. Indulge.

Napa Technology, the makers of the WineStation® have long perfected the ability to sip, sample and preserve fine wines by the glass in retail, grocery and restaurant locations nationwide. Now they bring this same innovation to the home.

Genesis is the first single bottle preservation and dispensing system designed for both sparkling and still wine. Napa Technology developed the Genesis system to provide wine lovers the freedom to uncork, preserve, and pour their finest wine by the glass without wasting a drop.

- GENESIS is the first at-home technology that preserves both still and sparkling wine
- Easily fits on a kitchen counter or tucked into a wine cellar
- GENESIS is commercial-grade technology in a single bottle format.
- Using proprietary **IntelliCork™ Technology**, once an uncorked bottle of still or sparkling wine is placed in the system, oxygen is removed and replaced with **WineGas™**, ensuring each glass is as the winemaker intended
- GENESIS preserves still wine for up to **two months** and sparkling wine or champagne up to **five days**
- GENESIS dispenses preserved wine, allowing wine lovers the luxury of enjoying just a glass of their favorite wine or multiple varietals at any time
- GENESIS arrives with three IntelliCorks; Two (2) for still wine and one (1) for sparkling wines or champagne as well as two (2) canisters of WineGas, enough to preserve and pour 24 bottles
- Additional Genesis Accessories and WineGas are available for purchase via the GENESIS website
