OF MAXTRAX

THE MAXTRAX STORY

We're a household name in the 4WD industry, with well over a decade of experience in producing the world's best recovery tracks.

Brad McCarthy, author of Dirty Weekends "The Essential 4WD Guides", devised the idea for MAXTRAX in 2001 after a particularly stressful incident on a remote north Queensland beach where he almost lost his bogged vehicle to the incoming tide, despite being equipped with all of the traditional recovery equipment.

From his experiences, Brad recognised the need for a system that makes vehicle recovery and extraction a safe, simple, one-person task and eliminates the need for any outside assistance such as towing, snatching, or winching.

We tested several types and grades of super tough nylons to create a lightweight, yet durable product that provides superior performance with our focus on the key issues of strength, effectiveness, usability and aesthetics. MAXTRAX was trialled countless times using typical (and not so typical) bogging scenarios and after many late nights and product refinements.

Since then, MAXTRAX have been discovered by 4WD adventurers around the world as the safe, simple, quick and easy method of vehicle recovery. We didn't stop with the MKII, and the last decade has seen the MAXTRAX product range expand to include the XTREME, the INDEFLATE, the MINI and the JAXBASE! 2020 saw the release of our very own safe, simple Recovery System, designed to take the risk off lying metal out of the equation in a recovery situation.

Stay tuned to find out what's next for MAXTRAX...

MAXTRAX MKII

THE ORIGINAL & THE BEST

MAXTRAX MKIIs are the lightweight, easy-to-use vehicle recovery and extraction device that are easily carried by almost anything with four-wheels ensuring an easy way out if your vehicle becomes stuck. The aggressive large cleats on MAXTRAX sink their teeth into the tyre tread and the terrain under your 4WD vehicle to prevent it from slipping back into mud, snow, or sand and make vehicle recovery quick and easy.

TOUGHEST

Engineered with deep structural beams, the MAXTRAX can easily bear the weight of a fully-laden 4WD over soft terrain.

LIGHTWEIGHT

Light but strong, easy to carry and load onto your roof racks or attach to your vehicle with MAXTRAX mounting kits. Each MAXTRAX weighs just 3.4kg.

SHOVELS

Use the underside of the ramps to easily shovel debris from around tyres and underbody components, helping you get unstuck quicker.

HANDLES

MAXTRAX are equipped with six comfortable, ergonomic handles for easy carrying, digging and maneuvering.

DUAL RAMPS

Only MAXTRAX are constructed with sloping ramps on both ends, allowing you to easily insert beneath your vehicle's tyres.

EASY TO USE

Easy to clean, stack, store and transport. MAXTRAX are easily used by one person. No need for another vehicle or anchor point.

ALL TERRAIN

Whether your tyres are wet, dry or bogged in mud, sand, dust, wet grass or snow, MAXTRAX provide superior traction in boggy and soft ground, letting you "take the easy way out!"

UNIQUE DESIGN

Invented by 4WD adventurers and designed by award winning industrial designers, MAXTRAX are engineering laboratory tested by the University of Queensland.

TRUSTED

The most trusted recovery device, used around the world since their invention in 2005. Manufactured in Australia from the highest quality, UV stabilised engineering grade reinforced Nylon.

MAXIMUM TRAXION

MAXTRAX's three rows of aggressive, tough teeth provide superior traction and large lugs on the bottom surface bite into the ground to provide sure footed grip. A huge 115cm x 33cm footprint provides excellent flotation

How Big Are MAXTRAX MKIIs?

1150mm long X 330mm wide x 85mm tall (45 inches long X 13 inches wide), Each set of MKIIs stacks together at a height of just 85mm (3.5 inches). Each MKII weighs just 3.4 kilograms (7.5 pounds).

MAXTRAX

SAFE, SIMPLE RECOVERY SYSTEM

We're excited to announce the arrival of the all-new MAXTRAX Recovery System! After decades of 4x4ing in tough Aussie conditions and witnessing close calls with flying metal during recoveries, we knew there had to be a safer way.

- Reduction of metal in recovery components
- Any metal components made with high safety factors
- Build in a predictable point of failure if the system was overloaded

MAXTRAX Fuse™ Shackle

Made from Ultra-High-Molecular-Weight-Polyethylene and Polyester the MAXTRAX FUSE SHACKLE is designed to be the controlled failure point of the MAXTRAX RECOVERY SYSTEM if the system is overloaded.

MAXTRAX Core™ Shackle

The MAXTRAX CORE SHACKLE is designed to be at the CORE of two interacting MAXTRAX Products or connecting MAXTRAX Products to the vehicle.

MAXTRAX Kinetic Ropes (2m, 3m, 5m & 10m)

Produces up to 30% ELONGATION providing a smoother safer recovery. Joining the different length ropes provides flexibility to make kinetic ropes suitable in length to your specific recovery scenario.

MAXTRAX Static Rope

Designed to be a static element during a vehicle recovery. Can be used as a Load Sharing Bridle, Tree Trunk Protector or an Extension Rope. Available in 3m & 5m.

MAXTRAX Hitch 50

The MAXTRAX Hitch 50 is designed exclusively for use with soft shackles. Designed, engineered & tested in Australia.

MAXTRAX Winch Ring

Designed for use with soft shackles and synthetic winch ropes, The MAXTRAX Winch Ring 120 is Australian designed, engineered & tested. Lightweight Heavy Duty Snatch Block alternative.

MAXTRAX Winch Rope

The MAXTRAX WINCH ROPE is a metal-free replacement winch rope and is designed as a safe alternative to steel winch cable, or synthetic winch ropes with a metal hook, metal or hard plastic thimble.

MAXTRAX Recovery Kit Bag

Designed & engineered for sand, dirt and snow, the heavy duty, triple-layer, weather resistant carry bag provides functional & stylish storage for all your MAXTRAX Recovery Gear.

STATIC ROPE EXTENSION 10m

A metal-free replacement winch rope, designed as a safe alternative to steel winch cable, or synthetic winch rope with a metal hook, or a metal thimble.

BUSH Recovery Kit

The BUSH Recovery Kit is geared for bush tracks. It includes a variety of connectable rope lengths - connect them with core shackles to lengthen them based on how much space you have.

BEACH Recovery Kit

The Beach Kit is a bundle built for open coastal spaces. All the essential equipment wrapped up in our high-quality Recovery Kit Bag.

WATCH NOW

MAXTRAX INDEFLATE

Deflating/inflating tyres individually can be a pain; bending over or squatting beside each wheel while you wait for the air to flow in/out of the tyre, constantly stopping to check the pressure. Groan no more! MAXTRAX INDEFLATE makes it quick and easy.

Easily deflate 2 tyres at once, and spend more time adventuring! Featuring a 700kpa (100psi) combination pressure gauge so that you can monitor your tyre pressures while inflating, deflating or equalising the tyre pressures.

STORAGE & MOUNTING

ENGINEERED FOR EXPLORING

Keep mud, sand, and dirt out of your vehicle with our range of heavy duty, four layer, weather resistant carry bags. The MAXTRAX Black Carry Bag will store your MKIIs and Xtremes, while the MAXTRAX Mini Carry Bag provides an attractive tote and storage for your MAXTRAX mini and Jaxbase.

Need extra space inside your vehicle for bulky camping gear? Set up a mount on your roof with the MAXTRAX Roof Rack Mount Kit, or on your rear wheel with the MAXTRAX Rear Wheel Harness. Mounting pin sets for the MKII and XTREME are also available separately with options for both 40mm and 17mm of M10 thread.
