OUT STORY

'Lit' as a term is used to describe a state of mild intoxication, the 'sweet spot'.

From the sweet spot, by the sweet spot and for the sweet spot, we bring to you LIT rolling papers that are made from the finest quality of the natural paper.

Two brothers in India were having an amazing session when they realised that they should contribute their bit as the productive members of the society. They came up with the idea of making your smoking sessions more awesome, long-lasting and hassle-free by providing rolling papers which are completely non-toxic, 100% organic and unbleached. We believe in the quality of life, we believe it should be LIT as fabulous.

HOW ARE WE LITFABULOUS

We are proud of the difference we are creating whilst rolling good times. After getting India Lit, we've got distribution rights of LIT products in the region of Europe, Africa, Russia, and South America in December 2019 and we also proudly exhibited in the world biggest tobacco fair in Dortmund, Germany called Intertabac.

Talking about the quality, Every quality assurance employee has to take care of exactly 5 hand rollers so as to maintain the top end Quality and Productivity as the whole process is done by human hands. We make sure every unit is identical to each other in there respective product category.

Economically, our costs of hand crafting a pre rolled cone are considerably lower than the prices proposed by any other facility in the world. We have expertise of doing better job at almost 30-40% or lesser of their minimum price.

Every Pre Roll we roll, " we empower a woman" as our company is run by 90% of female employees and currently we are blessed with hundreds of women hand rollers in our in-house high standard facility.
