ADVICE

Softwash & Pressure Washing

Increase your profits and maximise your time by offering both pressure washing and softwashing capabilities on your next job.

Built with maximum flexibility in mind we have created a soap supply system that allows the operator to quickly and efficiently change from surfactant soap to degreaser, neutraliser, fertiliser or other solution allowing the most versatility in softwashing systems yet.

The Blend High / Low Unit has a full remote control on softwash Pump and solution/rinse switching, ensuring you spend more time working and less time running from the job to the machine.

Designed to mount directly onto your aluminium tray or Trailer Mount these systems are packed with a ton of punch, minimal maintenance and practicality in mind.

Extensively tested, **NOW** is the time to get ahead of the rest and invest in your 'Business in a Box'.

Upgrades

ADVICE

COMMERCIAL EXTERIOR CLEANING UNIT

Built with maximum flexibility in mind we have created a soap supply system that allows the operator to quickly and without effort change from surfactant soap to degreaser, neutraliser, fertiliser or other solution allowing the most versatility in softwashing systems yet.

The blend low softwash unit incorporates the mighty 'Booster In A Box' and comes fully loaded with 2 x 200 L poly tanks on a robust aluminium checker plate skid.

Designed to mount directly onto your aluminium tray or trailer mount these systems are packed with a ton of punch. With a footprint of 1250mm long x 1250mm wide x 1000mm high, these systems are ideal for commercial and residential softwash applications.

If you are serious about your external cleaning business or want the ultimate way to enter the industry, look no further than the revolutionary Softwash Systems.

Upgrades

Bespoke service available
18" Reel & 58" hose for additional length
Bespoke builds possible! We can configure our unit to suit your style of washing or transport available.

Maintenance

Pump rebuild every 12 - 18 months - that's it!
