

MOISTURE MANAGEMENT SYSTEM

Allows the transfer of moisture away from the surface of the skin to keep feet warm, dry and comfortable.

PERFORMANCE FIT

Every course has LYCRA® fibre running through it giving a close supportive fit from foot to calf.

COMFORT FIT

Close supportive fit on your foot with a looser comfort fit around your calf. Allows sock cuff to be worn up or down.

THERMO FIT

Thermo setting every Bridgedale sock ensures a perfect fit. Wash after wash the sock returns to its designed size ensuring a perfect fit every time.

WOMENS FIT

Bridgedale were the first to offer a true WOMENS FIT sock. Women's styles are slimmer fitting, have bespoke sizing, adapted toe box and heel cup areas.

FLAT TOE SEAM

An almost invisible toe seam closes the toe box creating a comfortable, flat seam that doesn't create excess bulk or cause irritation.

OVERFOOT VENTILATION

Bridgedale's open mesh structure reduces insulation and promotes easy moisture transportation.

FORWARD FLEX

Prevents the sock from 'bunching' under the shoe tongue which helps to ensure comfort.

SHOCK ZONES

Advanced zonal padding system that provides extra support and comfort to areas of the foot and leg.

ELASTICATED ARCH

Keeps the sock locked in position. During wear this reduces the possibility of bunching and rucking which could cause irritation or blisters.

Y HEEL

Creates a 3D shaped heel cup that prevents excess bulk and slippage which helps to ensure comfort.

ANTI-SHOCK CUSHIONING

A loop within a loop that offers an additional level of impact protection resulting in all day long comfort.

SPORT FIT

Supportive compression from the cuff through the arch improves Proprioception (joint position awareness) around the ankle and mid foot aiding stability and improving balance.

NATURAL TOE SPREAD

Wide and un-restrictive, natural toe box allows toes to splay naturally.

ZERO DEBRIS CUFF

Extended, close fitting cuff to prevent debris entering the sock.

TOE GUARD

Reinforced toe box to avoid splits holes & blow outs when descending.

COMBED COTTON

The cotton fibres are combed to create a soft more luxurious feel against the skin.

WATERPROOF & BREATHABLE

Allows perspiration to pass to the outer layer of the sock while preventing outside water from getting inside. 15,000 MP / 10,000 WP.

WINDPROOF

Prevents wind chill, the lowering of body temperature due to the passing flow of cool air across the skin, exacerbated when skin is wet.

4 WAY STRETCH

A stretch PU membrane together with a matrix lamination process bonds three layers together ensuring they have excellent stretch.

DURABLE OUTER

An extremely durable and long lasting outer sock protects the Waterproof Membrane against abrasion from the boot.

UNDERFOOT TOE SEAM

Toe seam under the toes to eliminate the potential cold spot and increase warmth.

ANATOMICAL VIBRATION DAMPENING FOOTBED

Additional underfoot padding, strategically placed to eliminate vibration.

HEEL BAND

"Tight" heel band to ensure close fit to eliminate friction.

ACHILLES PROTECTION

Padding to provide protection and additional warmth for your Achilles.

ANKLE PROTECTION

Additional protection around the sides and back of your ankle.

ASYMMETRIC FOOT SPECIFIC SOCKS

Socks specifically designed for the right and left foot to provide protection from the friction areas with cycling shoes.

HOW TO CHOOSE

Bridgedale socks are guaranteed for their lifetime against faults in workmanship and materials.

(5 years in Germany)

Fusion Technology is the unique blend of yarn and knitting technology that sets Bridgedale apart from other sock brands. It is the combination of the highest quality natural yarns, wrapped with high performance microfibres knit and finished on the latest machinery to create socks that ensure all day comfort. These unique combinations place yarns where they are needed to ensure that whichever Bridgedale sock you choose, they will perform to the highest level.

MERINO PERFORMANCE

FusionTech Merino Performance brings together Merino Wool, known for its anti-bacterial properties, New Wool with its soft, resilient fibres and technical synthetic yarns in a knit to provide a close supportive fit, moisture wicking and outstanding durability for all day comfort. Ideal for long distance walking.

MERINO COMFORT

FusionTech Merino Comfort blends Merino Wool with its unrivalled fineness and anti-bacterial properties with technical synthetic fibres in a knit that has a faster drying time and longer lasting durability than that of Merino Wool alone.

MERINO COOL

FusionTech Merino Cool keeps feet dry and comfortable when you are working at your hardest.

MERINO SPORT

FusionTech Merino Sport brings together Merino Wool and Lycra Sport to provide a supportive compression fit from calf through to the foot arch. This improves the joint position awareness around the ankle and mid foot aiding stability and balance.

COOLMAX® - PERFORMANCE

FusionTech Coolmax® - Performance brings together Coolmax® known for its moisture wicking properties with technical synthetic fibres in a knit to provide a thin, close supportive fit, balanced insulation and outstanding durability. Ideal for warmer climates in lighter footwear.

COOLMAX® - COTTON COMFORT

FusionTech Coolmax® - Cotton Comfort maximises the natural benefits of cotton yarns with the wicking properties and softness of Coolmax®. The softness and superb wicking performance help keep feet dry and comfortable in warmer climates.

COOLMAX® - SPORT

FusionTech Coolmax® - Sport brings together Coolmax® and Lycra Sport to provide a supportive compression fit from calf through to the foot arch. The structure of the sock helps improve the joint position awareness around the ankle and mid foot aiding stability and balance.

MERINO LINER

Fusion Tech Merino Performance brings together Merino wool and technical synthetic fibres to provide a close fitting warm sock for use under your Bridgedale's or as an everyday sock.

COOLMAX® - LINER

Coolmax® liners have a large contact area with the skin and utilise the moisture wicking properties of Coolmax® to move moisture swiftly out to the larger surface area of main sock where it can be evaporated quicker.

THERMAL LINER

FusionTech Thermal Liners are primarily knit with EnduroFil™ our own formulation of polypropylene fibre, with the lowest thermal conductivity of any yarn making our thermal liners our warmest by weight of sock in our range.

COOLMAX® EcoMade is an incredibly soft yarn with a 4 channel cross-section that Bridgedale use to draw moisture away from the body to keep the wearer cool and dry on hot days. The yarn is made from 100% post-consumer recycled materials.

LYCRA® is used in every sock in the Bridgedale range. It is an elastic fibre, which ensures Bridgedale socks give long-lasting fit.

LYCRA® SPORT branding is the accreditation given to sports socks with a premium level of elastification in the sock body. The LYCRA® fibre also gives Bridgedale socks long lasting fit and comfort, keeping their shape wash after wash.

At Bridgedale we believe it's the little things that make the biggest difference to our lives.

It's the little things that put a smile on our faces and a spring in our step.

It's the little things that come together to make big things happen. For over a century our socks have been one of the little things that transform your journey every day.

Our passion, experience, and care for every tiny detail, from our FIT, our FUSION TECHNOLOGY and our GUARANTEE, have helped us create the world's most comfortable and enduring socks.

Little by little. Step by step. We're changing the world beneath your feet.

+
**LITTLE
THINGS
MATTER**

MTB

Born directly from Mountain Bikers, providing a unique level of technicality for all season warmth and temperature control, together with anatomical vibration dampening footbed, Achilles and ankle protection.

The MTB range delivers fantastic comfort for those biking the world's great trails. Bridgedale Fusion technology maximises the benefits of natural and technical fibres knit in such a way as to create superior comfort and longevity.

OUR TESTERS

- 10 Male, 5 Female
- Aged 34 – 62 years
- Enthusiasts who were not paid for their involvement
- Cycling off road 2/3 times a week
- Riding on average between 25 – 50 miles per ride
- 2 of the testers regularly ride more than 150 miles on a single trip

MOUNTAIN BIKE DEVELOPMENT PROCESS

- We followed the same process as we did when we developed the Trail RUN collection.
- We met and worked closely with a team of 15 amateur Mountain Bike enthusiasts in the Peak District UK to understand Mountain Biking and their needs.
- From the group we identified 6 key issues to address –
- Warmth – Precise non-slip Fit – Underfoot Vibration – Achilles Protection – Ankle Protection – Asymmetrical Left and Right Foot protection.
- Over a two year period through in person meetings and Teams Meetings (during Covid) we developed, tested, redeveloped and tweaked.

TRAIL RUN

Where Less becomes more. Less weight, more distance. Less bulk, more comfort. Less shock, more performance. Socks in the Trail Run range deliver fantastic comfort for those hiking, biking or running on the world's great trails.

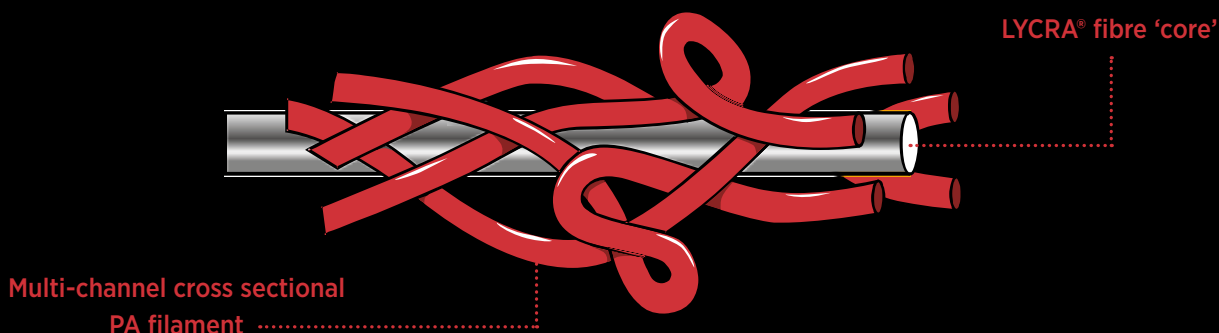

Fusion technology maximises the benefits of natural and technical fibres knit in such a way as to create a highly ventilated and perfectly cushioned sock providing advanced fit and comfort.

LYCRA® DRY TECHNOLOGY

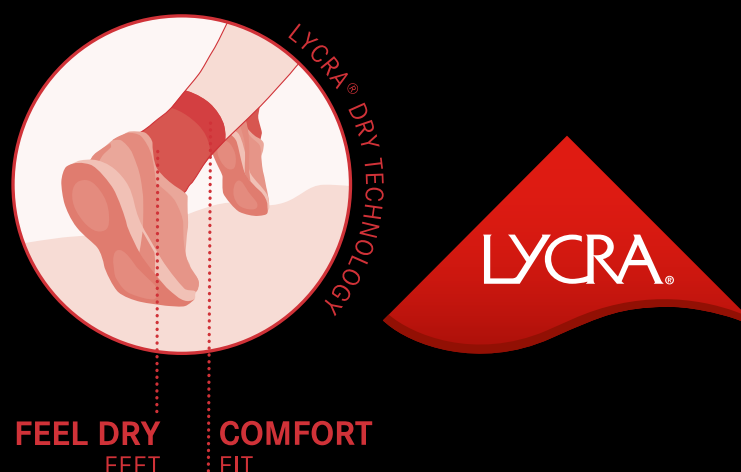

Developed with Bridgedale

- LYCRA® fibre, since its invention over sixty years ago, has set the standard for premium stretch fibre. While our fibre is lightweight and nearly invisible, it makes all the difference in socks. The unique properties of LYCRA® fibre provide long-lasting fit and shape retention helping you perform to your best ability; LYCRA® fibre inspires confidence.
- Now, newly launched **LYCRA® DRY TECHNOLOGY** provides the long-lasting fit and comfort you expect with LYCRA® fibre with the additional benefits of **dryness**.
- This new yarn combination of LYCRA® fibre and a multi-channel polyamide covering, has been knit into the new **Bridgedale Trail Run range** on the inside where it is closest to the skin. This yarn provides close-fitting comfort and also draws moisture away from the foot helping to keep the leg and foot dry.

LYCRA® DRY TECHNOLOGY:

- *Provides long-lasting fit and comfort with dryness – helping feet to feel comfortable whatever your activity*
- *Permanent benefit, does not wash off*
- *Non Hazardous material used, limiting possible skin irritation*
- *Allows socks to have a 'quick dry performance benefit'*

NEW

Trail RUN Mid-weight T2

This has been achieved by:

Removing the ventilation from the top of the foot.

Adding increased insulation around the front of the ankle and over the front of the foot for increased warmth.

Creating a NEW Achilles protection pad on the back of the leg.

Increasing the ankle protection.

Increasing the sock height from $\frac{3}{4}$ crew to Crew.

S M L

15 years ago, Bridgedale launched the first truly sized women's technical outdoors socks. Through research and testing we recognised women have a wider forefoot with shorter toe bones, a narrower heel, and a shorter arch length. With this research and our continual quest to challenge what our knitting machinery could allow us to do, not only did we make a bespoke womens fit but we could also knit better fitting socks throughout our entire range.

+

**A BETTER
FIT**

HIKE

Whether you're trekking around the world or walking around the block, socks in the HIKE range are suitable for every type of adventure delivering comfort and durability, mile after mile.

With a variety of weights and lengths and from bold lifestyle patterns to Bridgedale solid colours, the Fusion Technology provides balanced insulation, perfect fit and moisture control giving the highest levels of comfort and durability, allowing you to outperform from the most demanding trail to leisurely strolls.

DID YOU KNOW?

Bridgedale were the first technical sock brand to introduce specific Women's fit.

An unravelled HIKE midweight sock has 1.6km yarn.

We use LYCRA® in every sock to help ensure our socks have lasting fit and comfort, keeping their shape wash after wash.

Every sock is quality checked by hand before being paired for packing.

We use COOLMAX® because it's an incredibly soft yarn that keeps you cool and dry on hot days.

Washing your socks inside out helps keep the cushioning active.

Bridgedale[®]
LITTLE THINGS MATTER

In 1992 we started to “twist” natural yarns with man-made fibres to create proprietary yarns that enhance the durability and comfort of Bridgedale socks. Still found at the heart of every Bridgedale sock we branded this process Fusion Technology and for the last 25 years we have been refining and improving this technology to bring great comfort and durability to our customers.
